WORKING DOCUMENT

From:	Presidency
To:	Working Party on Financial Services and the Banking Union (Sustainable Finance)
Subject:	European Green Bond Regulation - Updated consolidation of comments (Annexes) - ddl 16.09.2021 (8 MS)

Commission proposal	Drafting Suggestions Comments
<p>2021/0191 (COD) ANNEXES to the Proposal for a Regulation of the European Parliament and of the Council on on European green bonds</p>	<p>SE: (Comments): Harmonising templates against existing standards as far as possible might make the EUGBS more attractive to use.</p> <p>FI: (Comments): FI General remarks regarding Annex I.</p> <p>From our point of view, it seems that the portfolio approach is not fully taken noted in Annex I and Annex III. This needs to be corrected for ensuring the level-playing-field for different kinds of bonds.</p> <p>The Annex I text is written as the factsheet could be done only for one bond, although article 8.2 says that the factsheet can relate one or several green bonds.</p> <p>If we have understood correctly the factsheet is an ex-ante document, not ex-post. Some of the information can be difficult to disclose ex-ante. If this kind of information is going to be required to be disclosed, we think that disclosing this kind of information should not be obligatory.</p> <p>DE: (Comments): Suggest harmonising the templates as far as possible with existing standards in order to facilitate the adoption of the EU GBS.</p>
ANNEX I	

Commission proposal	Drafting Suggestions Comments
EUROPEAN GREEN BOND FACTSHEET	DE: (Comments): Different from the proposed legislative text, the template seems to be designed only for single EuGB issuance. This should be adjusted.
1. General Information	
– [Date of the publication of the European green bond factsheet]	
– [The legal name of the issuer] [where available, legal entity identifier (LEI)] [website address providing investors with information on how to get in contact, and a telephone number]	
– [Name of the bond assigned by the issuer] [where available, international securities identification numbers (ISIN)]	DE: (Drafting): — [Name of the bond assigned by the issuer] [where available, international securities identification numbers (ISIN)] DE: (Comments): This does not seem feasible, if the GB factsheet can be used for multiple, future issuances.
– [The identity and contact details of the external reviewer, including website address providing investors with information on how to

Commission proposal	Drafting Suggestions Comments
get in contact, and a telephone number]	
2. Adhesion to the requirements of the European Green Bonds Regulation	
[A statement showing that the issuer of the given bond voluntarily adheres to the requirements of this Regulation]	
3. Environmental strategy and rationale	
– [Information on how the bond aligns with the broader environmental strategy of the issuer]	DE: (Drafting): – [Information on how the bond programme aligns with the broader environmental strategy of the issuer] DE: (Comments): See comment above.
– [The environmental objectives referred to in Article 9 of Regulation 2020/852 pursued by the bond]	BE: (Comments): The indication of any detrimental effect on another objective (DNSH principle) should also be part of the environmental strategy DE: (Drafting): – [The environmental objectives referred to in Article 9 of Regulation 2020/852 pursued by the bond programme]

Commission proposal	Drafting Suggestions Comments
	DE: (Comments): See comment above.
4. Intended allocation of bond proceeds	IE: (Comments): Requiring issuers to provide detailed indicative allocation information in the factsheet is likely to result in unnecessary extra work and costs for issuers, while the additional benefit for investors is questionable. The information requested under point 4 seems to create an indicative allocation report, while current good practice is to provide in the pre-issuance document (GB framework) only information on the defined eligible project categories or types. The proposed provision would require issuers in many cases to prepare and publish a new factsheet with each new bond issuance. For frequent issuers, this creates significant additional work and costs, including to obtain additional pre-issuance reviews with each updated factsheet. To avoid such unnecessary costs, this provision should only refer to types of qualifying green projects but not specific projects. The present system works well and has not seen complaints.
4.1 Estimated Time until full allocation of proceeds	DE: (Comments): See comment above. This section should be deleted or adjusted to cater for several bond issuances.
– [The period within which the proceeds are expected to be allocated]	
– [The date by which proceeds are	AT:

Commission proposal	Drafting Suggestions Comments
expected to be fully allocated]	(Drafting): [The date by which proceeds are expected to be fully allocated] AT: (Comments): While it is possible to give an estimated time period within which the proceeds of issuing a green bond are expected to be allocated, it is very difficult to indicate the exact date by which the proceeds are expected to be fully allocated. Hence, information about the exact date should not be required.
– [If the date above is more than five years after the date of the issuance of the bond: a justification for the longer period, based on the specific features of the economic activities concerned, accompanied by relevant documentation in an annex]	
4.2 Process for selecting green projects and estimated environmental impact	
– [A description of the processes by which the issuer will determine how projects align with the taxonomy requirements]	
– [A description of the relevant technical screening criteria referred to in Articles 10 to 15 of Regulation (EU) 2020/852, and a specification of which delegated acts adopted	DE: (Comments): As per our general remarks in the main sheet, the regulation should allow for a reasonable degree of flexibility for sovereign issuers, requiring a respective adjustment of this section.

Commission proposal	Drafting Suggestions Comments
under Articles 10(3), 11(3), 12(2), 13(2), 14(2) and 15(2) of Regulation (EU) 2020/852 are taken into account]	
– [Where available: information on the methodology and assumptions to be used for the calculation of key impact metrics in accordance with delegated acts adopted under Articles 10(3), 11(3), 12(2), 13(2), 14(2) and 15(2) of Regulation (EU) 2020/852, and for any additional impact metrics. Where this information is not available, this must be justified.]	BE: (Comments): From experience, impact reporting on operating expenditures is a methodologically very challenging matter, yet is expected already at the level of the green bond factsheet, with justification required when it is not available. In our opinion differentiation between capital expenditures and operating expenditures for the purpose of the methodological explanations required in the pre-issuance and post-issuance reports would be justified.
– [Where applicable, information on any related standardisation or certification process in project selection]	
– [Where available, an estimation of expected positive and adverse environmental impacts in aggregated form. Where this information is not available, this must be justified.]	DE: (Drafting): – [Where available, an estimation of expected positive and adverse environmental impacts in aggregated form. Where this information is not available, this must be justified.] DE: (Comments): 1) Article 6 (1) requires, inter alia, compliance with the “do no significant harm” criteria and the minimum safeguards in accordance with Article 3 (b) and (c), respectively. Hence, there should be no need to include an estimation of adverse environmental impacts.

Commission proposal	Drafting Suggestions Comments
	<p>Otherwise, the requirement to provide an estimation of adverse environmental impacts may require more clarity.</p> <p>2) Under consideration whether this level of detail is necessary and feasible for several issuances, as it basically turns the factsheet into an indicative impact report.</p>
4.3 Intended qualifying green projects	<p>DE: (Drafting): 4.3 Intended types of qualifying green projects</p> <p>DE: (Comments): The provisions under point 4 and specifically this point 4.3 that requires issuers to provide project-level information in the factsheet, thereby basically turning the factsheet into an indicative allocation report. This would practically require issuers to prepare and publish a new factsheet and pre-issuance review with each new bond issuance. That creates significant additional work and costs for issuers, while the additional benefit for investors is questionable. We hence strongly suggest clarifying that project-level information must not necessarily be provided in the factsheet, as the reasons stated below (“confidentiality agreements, competitive considerations, or a large number of underlying qualifying projects”) may not be clear enough. It should be sufficient to disclose only the <i>types</i> or <i>categories</i> of eligible projects.</p> <p>Where a prospectus is to be published pursuant to Regulation (EU) 2017/1129, it might be reasonable or even required to publish such project-specific information in the GB factsheet. Where a prospectus is not to be published pursuant to Regulation (EU) 2017/1129, this provision should not apply.</p>

Commission proposal	Drafting Suggestions Comments
[Where available to the issuer, the following information shall be provided at project level, unless confidentiality agreements, competitive considerations, or a large number of underlying qualifying projects limit the amount of detail that can be made available, in which case the information shall be provided at least at aggregate level, with an explanation of why project-level information is not given:	DE: (Drafting): [Where available to the issuer, the following information shall be provided at project level, unless confidentiality agreements, competitive considerations, or a large number of underlying qualifying projects limit the amount of detail that can be made available, in which case the information shall be provided at least at aggregate level, with an explanation of why project-level information is not given: DE: (Comments): See above.
For intended qualifying projects:	DE: (Drafting): For intended types of qualifying projects: DE: (Comments): See above.
– Their environmental objectives referred to in Article 9 of Regulation 2020/852	
– Their types, sectors, and the respective NACE codes in accordance with the statistical classification of economic activities established by Regulation (EC) No 1893/2006 ¹	BE: (Comments): Sovereigns can use tax credits and subsidies as eligible expenditures. These need to support the environmental objectives, but should they also be linked to an underlying activity/NACE that is

¹ Regulation (EC) No 1893/2006 of the European Parliament and of the Council of 20 December 2006 establishing the statistical classification of economic activities NACE Revision 2 and amending Council

Commission proposal	Drafting Suggestions Comments
	<p>specified in the technical screening criteria? We can imagine that this is not unambiguous</p> <p>E.g. tax credit for the installation of chargers for electrical cars can be linked to a variety of activities such as the production of electric cars, the production of chargers, the services of installing such chargers or even the service of organizing transportation using electric vehicles.</p> <p>DE: (Drafting):</p> <p>– Their types, sectors, and, <u>where applicable</u>, the respective NACE codes in accordance with the statistical classification of economic activities established by Regulation (EC) No 1893/2006²</p> <p>DE: (Comments):</p> <p>Some activities re-/financed by sovereign issuers cannot be linked to a NACE code, which needs to be considered here.</p>
– Their countries	
– The respective amount to be allocated from bond proceeds, and the percentage of proceeds to be allocated respectively to projects financed after bond issuance and projects	<p>DE: (Drafting):</p> <p>– <u>Where available, t</u>The respective <u>indicative or intended</u> amount to be allocated from bond proceeds, and the percentage of proceeds to be allocated respectively to projects financed</p>

	<p>in the future, should only be provided if the issuer intends and is able to comply with the relevant requirements of the proposal, as to avoid “green washing” and as otherwise the external reviewer should provide a negative opinion. It does not make sense to foresee a situation where the issuer does not even intend to comply with the relevant articles.</p> <p>Article 3 only deals with the designation; as provided for in point 5, reference should therefore be made to articles 4 to 7.</p> <p>DE: (Drafting): (e) — where the opinion expressed by the independent reviewer indicates that the issuer does not intend to comply with Articles 3 to 7, or will not be able to do so, a statement that the designation ‘European green bond’ can only be used for the bond in question if the necessary steps have been taken to ensure that the bond complies with the requirements of this Regulation]</p> <p>DE: (Comments): The practical case of application for this provision is not clear to us. From the investor’s point of view, the external reviewer’s opinion should be either positive or negative, but not positive conditional on the implementation of further measures to be taken by the issuer where the fulfilment is not subject to a renewed review by the external reviewer. We propose deleting this provision.</p>
