Operational Coordination Mechanism for the External Dimension of Migration

MOCADEM

Action file

EGYPT

22 September 2025

Introduction / objectives

Within the framework of the continuous policy dialogue and taking into consideration the Union's general interest in building mutually beneficial partnerships with key migratory countries, the aim is to further strengthen and operationalise already established cooperation on migration between Egypt and the EU, with a Team Europe approach and in line with the Action Plan on Egypt presented at the External Migration Working Party of 20 June 2022, as well as with the Joint Declaration of 17 March 2024 establishing a Strategic and Comprehensive Partnership (SCP) between the EU and Egypt. Migration is one of the priorities identified in the new EU-Egypt Partnership Priorities 2021 – 2027 endorsed at the 9th EU-Egypt Association Council in Luxembourg on 19 June 2022, as well as one of the key pillars of the Joint Declaration on a Strategic and Comprehensive Partnership signed on 17 March 2024. The actions outlined in the following Action fiche focus on areas of engagement to address migration-related challenges for the short and long term agreed by the EU and Egypt in the Terms of Reference of the Migration Dialogue and reflect EU priorities, as identified under the Pact on Migration and Asylum.

Against this background, the objective is to develop and further strengthen the Egyptian legal framework for asylum and migration management, as well as Egypt's institutional and technical capacities to address different areas of migration, notably through the following set of actions stemming from the six pillars for managing migration and addressing forced displacement identified in the Action Plan on Egypt:

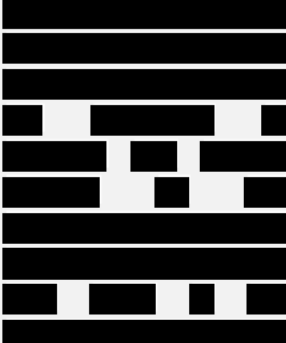

- Provide support to Egypt in the reception of large numbers of migrants and refugees, while ensuring effective and sustainable protection for vulnerable migrant and refugee groups;
- Support Egypt on the establishment of a single, sustainable national asylum system;
- Contribute to securing effective land and sea border management with a view to preventing irregular departures and combating migrant smugglers and human traffickers, while protecting the human rights of migrants;
- Support Egypt in building their capacity to readmit and sustainably reintegrate their own citizens, towards ensuring enhanced cooperation on readmission;
- Contribute to an effective national strategy on returns and readmissions with the aim of improving the effectiveness of readmissions;
- Tackle root causes of migration through skills development, education and improving living conditions, especially for young people, as well as through awareness-raising and information campaigns;
- Implement a mutually beneficial Talent Partnership in line with national competences, building upon pilot projects developed with Egypt in recent years.
