WORKING DOCUMENT

From:	General Secretariat of the Council
To:	Working Party on Transport - Intermodal Questions and Networks
N° prev. doc.:	ST 10915 2024 REV 1
N° Cion doc.:	ST 11821 2023 INIT + ADD 1 to ADD 4
Subject:	Proposal for a Regulation of the European Parliament and of the Council on the accounting of greenhouse gas emissions of transport services – Non-paper from the Presidency

In the view of the Working Party on Transport - Intermodal Questions and Networks of 23 September 2025, delegations will find, in Annex, a non-paper from the Presidency aiming at seeking delegations' views on the topics of the timeline of the application of the regulation.

The non-paper also presents the views of the Presidency on how the Regulation should be aligned to the clarified wording proposed in Article 1.

Lastly, the non-paper focuses on Article 15a, where minor amendments to the Council mandate appear necessary to reach an agreement between the institutions. Here, the Presidency is seeking delegations' views on the Presidency's proposed way forward.

Delegations are requested to send their comments, if any, in writing to intermodal@consilium.europa.eu by 23 September cob.

Proposal for a Regulation on the accounting of greenhouse gas emissions of transport services

Presidency non-paper

PUBLIC

For the use of future negotiations with the Parliament, the Presidency is seeking the delegations' views on the timeline of the application of the regulation.

The non-paper also presents the views of the Presidency on how, throughout the regulation, provisions should be aligned with the clarified wording in Article 1 (subject matter and scope), currently under discussion at technical level with Parliament.

Lastly, the non-paper focuses on Article 15a, where minor amendments to the Council mandate appear necessary to reach an agreement between the institutions. Here, the Presidency is seeking delegations' views on the Presidency's proposed way forward.

1. Timeline

In Annex 1, Delegations will find the timeline of application of Count Emissions EU, as provided for by the Commission's proposal and the respective Parliament and Council mandates.

The main difference between the institutions is the date of application, which is set to 42 months after the entry into force by in the Commission's proposal, whereas the Council has proposed 60 months, and the Parliament has proposed 24 months.

The Presidency assesses that the key point for the Council is to provide for sufficient time between the Commission completing the technical and legal prerequisites and the Regulation's date of application.

The Commission needs to perform several tasks before the Regulation can be applicable, namely (list based on the Council mandate): adopt the rules for the technical quality checks, establish the Commission-run calculation tool, establish the core EU database for GHG emission intensities, and adopt guidelines for SMEs.

In that context, **the pivotal date appears to be the establishment of the core EU database for GHG emission intensities**. It is the Presidency's understanding that such database requires substantial preparation and can only be established after the central EU database for emission factors has been established.

The Presidency intends to enter discussions with the Parliament along the following lines and is seeking delegations' views and flexibility on those:

1. Ensure there is sufficient time between the establishment of the core EU database of GHG emission intensities and the date of application; the Council mandate provides for 18 months, and it is the Presidency's assessment that lowering this period to 12 months would preserve the objectives sought by the Council;
2. Align the availability of prerequisites to one deadline, ensuring clarity and fostering accessibility of the Regulation (such as 12 months before the date of application);
3. Compromise, if necessary, with the Parliament on the date after which the requirement of receiving a positive assessment following a technical quality check becomes mandatory for third-party databases (line 106).

Following those lines, the Presidency believes the discussion on the timeline of application of the Regulation should be based on when the Commission can reasonably establish the core EU database for GHG emission intensities. Given the Parliament set this to be performed by 18 months after the entry into force, which is seen as unrealistic by the Commission, the Presidency intends to be positive towards the outcome of such discussion between the Commission and the Parliament.

PUBLIC

2. Clarification of the scope

For clarity reasons it has been tentatively agreed in principle with the EP during technical interinstitutional meetings to delete the definition of *concerned entities* and refer to *transport entities* and *data intermediaries*.

As already stated in Working Party, and confirmed by the Commission, it is the Presidency's assessment that such clarification does not affect the scope of the regulation.

This nonetheless requires adapting the language throughout the Regulation to ensure full consistency between Article 1 and the subsequent provisions.

Delegations will find in Annex 2 a table listing all the necessary changes, in the Presidency's views. The table is an excerpt of the table annexed to WK 11265/25, limited to the operative part of the regulation.

Changes have only been implemented on green lines and yellow lines where whether the Council has a mandate or the Presidency tentatively agreed at the technical level on the wording, subject to additional verifications.

3. Article 15a

The Council mandate introduced a new Article 15 aiming at enabling conformity assessment bodies accredited under aviation or maritime sectorial legislations to perform verification duties under Count Emissions for their sector of expertise.

The Commission has raised certain concerns about art. 15a. Those concerns are:

1) the scope of the verification those conformity assessment bodies could perform, and
2) the necessity of informing the national authority tasked with listing accredited conformity assessment bodies under Count Emissions.

The Presidency is considering proposing Parliament the following draft proposal (see below; changes compared to the Council mandate in **bold underlined** and ~~strikethrough~~). The Presidency assesses such drafting would ensure the consistency of Article 15a and its robustness.

Article 15a

1. ~~For the maritime sector,~~ The verifiers accredited pursuant to Article 14 of Regulation (EU) 2023/1805 and the delegated acts adopted on the basis thereof, or Article 16 of Regulation (EU) 2015/757 and the delegated acts adopted on the basis thereof, may perform the duties of conformity assessment bodies under this Regulation. Those verifiers shall be deemed to be accredited pursuant to Articles 14 and 15 of this Regulation **to perform duties for the maritime sector, provided they informed the authority referred to in Article 15(2) of their intention to perform the duties of conformity assessment bodies under this Regulation**.

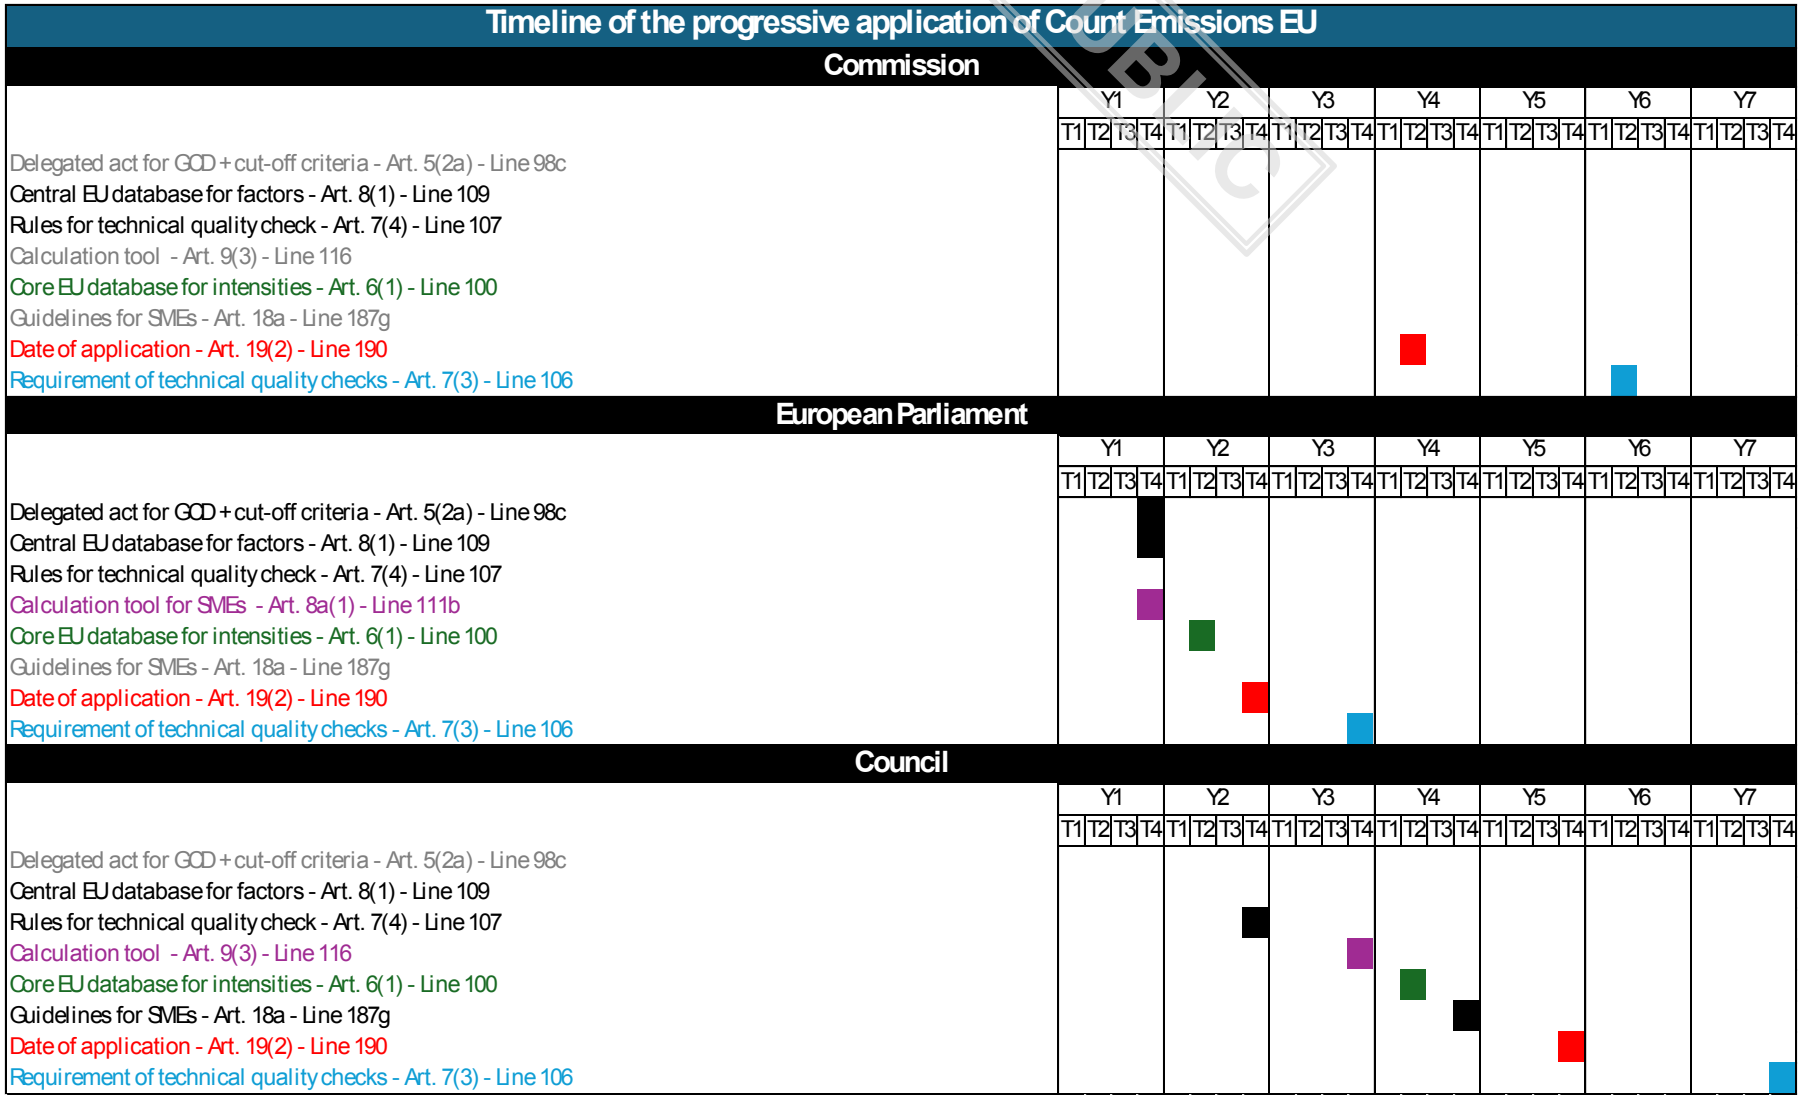

2. ~~For the aviation sector,~~ The verifiers accredited pursuant to Article 15 of Directive 2003/87/EC and to the implementing acts adopted on the basis thereof, may perform the duties of conformity assessment bodies under this Regulation. Those verifiers shall be deemed to be accredited pursuant to Articles 14 and 15 of this Regulation **to perform duties for the aviation sector, provided they informed the authority referred to in Article 15(2) of their intention to perform the duties of conformity assessment bodies under this Regulation**.

The Commission has indicated that the proposal put forward by the Presidency does not fully alleviate its concerns. The Commission has expressed the need for the inclusion of a safeguard in article 15a ensuring that the verifiers accredited under other EU legislation in the maritime sector and aviation sector have the necessary capacity to fulfil the tasks of a conformity assessment body in line with the requirements in CountEmissions. To ensure this, the Commission has proposed that verifiers accredited under MRV, FuelMaritime and ETS Aviation should also declare that they have the capacity to fulfil the tasks laid down in CountEmissions.

The Presidency considers this proposal as an interesting safeguard but also recognises it adds an additional administrative barrier. The Presidency is seeking delegations' views on the Presidency's compromise on article 15a. In addition, the Presidency would like to know whether Member States can show flexibility towards introducing a safeguard in line with the Commission's proposal.
