Remarks

The GNI-based resource is an ‘additional’ resource, providing the revenue required to cover expenditure in excess of the amount yielded by traditional own resources, VAT-based payments, the plastic-based own resource and other revenue in any particular year. By implication, the GNI-based resource ensures that the budget is always balanced *ex ante*.

The GNI call rate is determined by the additional revenue needed to finance the budgeted expenditure not covered by the other resources (plastic-based own resource, VAT-based resource, traditional own resources and other revenue). Thus a call rate is applied to the GNI of each of the Member States.

The rate to be applied to the Member States’ GNI for financial year 2024 is 0,5088 %.

Remarks

The Commission may impose fines, periodic penalty payments and other penalties on undertakings and associations of undertakings for not respecting bans or not carrying out their obligations under the Regulations enumerated below or under Articles 101 and 102 TFEU.

The fines must normally be paid within three months of the Commission decision being notified. However, the Commission will not collect the amount due if the undertaking has lodged an appeal with the Court of Justice of the European Union. The undertaking must provide the Commission with either a provisional payment or a financial guarantee covering both the principal of the debt and the interest or surcharges by the final date for payment.

Remarks

EASA is the Union's agency for aviation safety. Its mission is to ensure the highest common level of safety protection for Union citizens, ensure the highest common level of environmental protection, establish a single regulatory and certification process among Member States, facilitate the internal aviation market and create a level playing field, and work with other international aviation organisations and regulators.

The main activities of EASA include the collection and analysis of safety intelligence and performance data to derive strategic action plans, the certification of aviation products and the approval of organisations in all aviation domains (design, production, maintenance, training, air traffic management, etc.), the preparation of regulatory material setting up common standards for aviation in Europe and the monitoring and inspections of the effective implementation of such standards in the Member States and the Union's neighbouring States that have signed aviation agreements with the Union.

The tasks performed by EASA cover the whole spectrum of the Union's aviation safety rules and have an important international component as EASA is legally mandated to cooperate with international actors in order to achieve the highest safety level for EU citizens globally (e.g. EU safety list, authorisation of third country operators, and implementation of technical assistance programming towards third countries). Established in 2002, EASA is composed of more than 800 aviation experts and administrators and it has 31 Member States (27 EU Member States + Switzerland, Iceland, Norway and Liechtenstein). It has four international offices in Montreal, Washington, Beijing and Singapore. Typically, its budget consists mainly of fees and charges (64%), a subsidy from the Union (23%), earmarked funds (11%) and third country contributions (2%).

Remarks

ERA contributes to the further development and effective functioning of a single European railway area without frontiers, by guaranteeing a high level of railway safety and interoperability, while improving the competitive position of the railway sector. In particular, the ERA contributes, on technical matters, to the implementation of Union legislation by developing a common approach to safety on the Union rail system and by enhancing the level of interoperability on the Union rail system. Further objectives of the ERA are to follow the reduction of national railway rules in order to support the performance of national authorities acting in the

fields of railway safety and interoperability, to promote the optimisation of procedures, to monitor national safety authorities and conformity assessment bodies and to manage and keep up-to-date a number of registers, which is vital for the smooth operation of the European railway area.

The entry into force of the technical pillar of the Fourth Railway Package designated ERA as the Union authority responsible for issuing authorisations for placing railway vehicles on the market, single safety certificates for railway undertakings and track-side approvals of the European Rail Traffic Management System.

Remarks

Article 3 of Regulation (EC) No 851/2004 provides that the mission of the European Centre for Disease Prevention and Control is the following:

- In order to enhance the capacity of the Union and the Member States to protect human health through the prevention and control of communicable diseases in humans and related special health issues, the mission of the Centre is to identify and assess current and emerging threats to human health from communicable diseases and related special health issues, to report thereon and, where appropriate, to ensure that information thereon is presented in an easily accessible way. The Centre acts in collaboration with competent bodies of the Member States or on its own initiative, through a dedicated network. The mission of the Centre is also to provide science-based recommendations and support in coordinating the response at Union and national levels, as well as at cross-border interregional and regional level, to such threats, where appropriate. In providing such recommendations, the Centre, where necessary, cooperates with Member States and takes into account existing national crisis management plans and the respective circumstances of each Member State.
- In the event of other outbreaks of diseases of unknown origin that may spread within or to the Union, the Centre acts on its own initiative until the source of the outbreak is known. In the case of an outbreak that is clearly not of a communicable disease, the Centre acts only in cooperation with the coordinating competent bodies and upon their request, and provides a risk assessment.
- In pursuing its mission, the Centre respects the responsibilities of the Member States, the Commission and other Union bodies or agencies, and the responsibilities of third countries and international organisations active within the field of public health, in particular the WHO, in order to ensure that there is comprehensiveness, coherence and complementarity of action and that actions are coordinated.
- The Centre supports the work of the Health Security Committee (HSC), established by Article 4 of Regulation (EU) 2022/2371 of the European Parliament and of the Council of 23 November 2022 on serious cross-border threats to health and repealing Decision No 1082/2013/EU (OJ L 314, 6.12.2022, p. 26), the Council, the Member States and, where relevant, other Union structures, in order to promote effective coherence between their respective activities and to coordinate responses to serious cross-border threats to health, within its mandate.

Remarks

European Food Safety Authority (EFSA) is the cornerstone of the Union system of risk assessment for food and feed safety. Its scientific advice on existing and emerging risks underpins the policies and decisions of risk managers in the Union institutions and Member States with the objective of protecting consumer health. The Authority's most critical commitment is to provide objective, transparent and independent advice and clear communication grounded in the most up-to-date scientific methodologies, information and data available. The Authority is committed to the core standards of scientific excellence, openness, transparency, independence and responsiveness.

The establishment plan of the Authority, as the outgoing Chair of the Network of Agencies, includes one post to create a position for the Head of the Shared Support Office in Brussels. This is with the aim of promoting efficiency gains and synergies across agencies and with the institutions, so that individual agencies can focus their resources on core tasks. The financing of the post for the Head of the Shared Support Office will be shared between the agencies, which means that no additional funding for the Authority is required in this respect.

Remarks

In order to promote the protection of human and animal health and of consumers of medicinal products throughout the Union, and in order to promote the completion of the internal market through the adoption of uniform regulatory decisions based on scientific criteria concerning the placing on the market and the use of medicinal products, the objective of the European Medicines Agency (EMA) is to provide the Member States and the institutions of the Union with the best possible scientific advice on any question relating to the evaluation of the quality, the safety, and the efficacy of medicinal products for human and veterinary use, in accordance with the provisions of the Union legislation relating to medicinal products.

Regulation (EU) 2022/123 strengthened the role of the EMA in crisis preparedness and the management of medicinal products and medical devices, allowing the EMA to closely monitor and mitigate shortages of medicines and facilitate the faster approval of medicines that could treat or prevent a disease causing a public health crisis. After an initial transition period, the EMA will also coordinate responses of the Member States on shortages of critical medical devices in the event of a crisis.

Remarks

The European Foundation for the improvement of living and working conditions (Eurofound) delivers and disseminates important knowledge on work-related and social matters to contribute to sound and evidence-based policies in those fields. Its core activity relates to research in the areas of employment, working conditions, industrial relations and quality of life. The activities of Eurofound contribute to the following priorities: increasing labour market participation and combating unemployment by creating jobs, improving labour market functioning and promoting integration and gender equality, improving working conditions and making work sustainable throughout the life course, developing industrial relations to ensure equitable and productive solutions in a changing policy context, and improving standards of living and promoting social cohesion in the face of economic disparities and social inequalities such as the gender employment gap and the gender pay gap.

Part of this appropriation is intended for studies on working conditions and industrial relations in support of policies ensuring more and better jobs, making work more sustainable and strengthening social dialogue in Europe.

Another part of this appropriation is intended for studies and forward-looking research on labour markets, specifically the monitoring and anticipation of structural change, its impact on employment and the management of the consequences.

This appropriation will also cover research and gathering of knowledge on living conditions and quality of life with a particular focus on social policies and the role of public services in improving quality of life. Research into reconciliation of professional and private life and precarious employment, including breaking down by gender, is also covered by this appropriation.

Finally, this appropriation will be used for the analysis of the impact of digitalisation on all of the above-described areas and for studies contributing to policies aimed at upward convergence in the Union.

Remarks

This appropriation is intended to cover the expenditure related to the implementation of the specific sub-programme for circular economy and quality of life of the LIFE programme.

This sub-programme aims to facilitate the transition towards a sustainable, circular, energy-efficient and climate-resilient economy and to protect, restore and improve the quality of the environment.

It supports projects focusing on delivering the European Green Deal. These will be actions related to the shift towards a resource-efficient economy, the management of natural resources, such as air, water and land towards achieving the zero-pollution ambition, the strengthening the implementation of environmental legislation, as well as the promotion of good environmental governance.

It includes:

- the financing of innovative techniques, methods and approaches for reaching the objectives of the Union legislation and policy on environment and to contribute to the knowledge base and to the application of best practices,
- the development, implementation, monitoring and enforcement of the relevant Union legislation and policy on environment, including by improving governance at all levels, in particular through enhancing capacities of public and private actors and the involvement of civil society,
- the support of actions intended to catalyse the large-scale deployment of successful technical and policy-related solutions for implementing the relevant Union legislation and policy on environment, by replicating results, integrating related environmental objectives into other policies and into public and private sector practices, mobilising sustainable investments, and improving access to finance.

Costs of technical assistance for selecting, monitoring, evaluating and auditing projects and of support for communication, IT actions, organising workshops, conferences and meetings, as well as other governance activities (including non-governmental organisations supported via operating grants) may also be financed by this appropriation.
