WORKING DOCUMENT

From:	General Secretariat of the Council
To:	Working Party on Transport - Intermodal Questions and Networks
N° Cion doc.:	ST 11821 2023 INIT + ADD 1 to 4
Subject:	Proposal for a Regulation of the European Parliament and of the Council on the accounting of greenhouse gas emissions of transport services – Preparation for the trilogue – Draft revised four-column document

Delegations with find a revised version of the Annex of WK 13527 2025. The Annex has been updated to reflect the outcome of the 8th ITM held on 15 October 2025.

Changes mainly concern the recitals. On the operative part, only rows 107a and 111c have been modified.

REGULATION on the accounting of greenhouse gas emissions of transport services (Text with EEA relevance)

Recital 12a				
R 22a		***(12a) EN ISO standard 14083:2023 has its limitation, particularly the shortage that it does not consider greenhouse gas emissions from the whole lifecycle of transport services. Therefore, the Commission should assess the possibility of expanding the scope of the reference methodology for calculating greenhouse gas emissions of transport services in the near future to provide for the calculation and reporting of lifecycle greenhouse gas emissions of transport services. The future methodology should take into consideration the uptake of zero emission vehicles and the provisions of Article 14, paragraph 5 of Directive 2003/87/EC. To that end, the Commission should consider existing efforts such as the ISO 14067:2018 and the Product Category Rules on transport services established in the International Environmental Product Declaration System.***		*deleted*
