INFORMATION

From:	General Secretariat of the Council
To:	Ad Hoc Working Party on the risk of deforestation and forest degradation associated with products placed on the EU market (AHWP Deforestation)
N° Cion doc.:	ST 14151/21 + ADD 1
Subject:	Regulation on Deforestation: Revised 4-Column Table: State of play of the negotiations with the EP

Delegations will find attached a revised 4-Column table with the state of play of negotiations on the Deforestation Regulation, as results from the technical meeting held on 11 November 2022.

Proposal for a REGULATION OF THE EUROPEAN PARLIAMENT AND OF THE COUNCIL on the making available on the Union market as well as export from the Union of certain commodities and products associated with deforestation and forest degradation and repealing Regulation (EU) No 995/2010

(Text with EEA relevance)

2021/0366(COD)

v. 11 November 2022

SUBTITLES:

Rows highlighted in green, means that agreement in principle has been reached at the technical level

Rows highlighted in green, with provisions highlighted in yellow, means that the provisions in yellow are still open for discussion and that agreement in principle has been reached at the technical level on the provisions of the row highlighted in green

Rows highlighted in yellow, means that the provisions are still open for discussion (or have not been discussed yet)

Rows highlighted in orange, means that the provisions will be discussed at political level at the trilogue

11	(1) Forests provide a broad variety of environmental, economic and social benefits, including timber and non-wood forest products and environmental services essential for humankind, as they harbour most of the Earth's terrestrial biodiversity. They maintain ecosystem functions, help protect the climate system, provide clean air and play a vital role for the purification of waters and soils as well as for water retention. In addition, forests provide subsistence and income to about one third of the world's population and their destruction has serious consequences for the livelihoods of the most vulnerable people, including indigenous peoples and local communities who heavily depend on forest ecosystems.¹ Furthermore, deforestation and forest degradation reduce essential carbon sinks and increase the likelihood of new diseases spreading from animals to humans. 1. Commission Communication of 27 July 2019 'Stepping up EU Action to Protect and Restore the World's Forests', COM(2019) 352 final.	(1) Forests provide a broad variety of environmental, economic and social benefits, including timber and non-wood forest products and environmental services essential for humankind, as they harbour most of the Earth's terrestrial biodiversity. They maintain ecosystem functions, help protect the climate system, provide clean air and play a vital role for the purification of waters and soils as well as for water retention <i>and recharge, while more than a quarter of modern medicines are derived from tropical forest plants. Large forest areas act as a moisture source and help prevent desertification of continental regions.</i> In addition, forests provide subsistence and income to about one third of the world's population and their destruction has serious consequences for the livelihoods of the most vulnerable people, including indigenous peoples and local communities who heavily depend on forest ecosystems.¹ Furthermore, deforestation, forest degradation <i>and forest conversion</i> reduce essential carbon sinks. <i>Deforestation, forest degradation and forest conversion also increase contacts between wild animals, farmed animals and humans, thereby increasing the likelihood of new diseases spreading and the risks of new epidemics and pandemics.</i> 1. Commission Communication of 27 July 2019 'Stepping up EU Action to Protect and		Not to raise the issue of forest conversion, but rest can be discussed

12	(2) Deforestation and forest degradation are taking place at an alarming rate. The Food and Agriculture Organization of the United Nations estimates that 420 million hectares of forest – about 10% of the world's remaining forests and an area larger than the European Union – have been lost worldwide between 1990 and 2020¹. Deforestation and forest degradation are, in turn, important drivers of global warming and biodiversity loss — the two most important environmental challenges of our time. Yet every year the world continues to lose 10 million hectares of forest. ¹ FAO, Global Forest Resource Assessment 2020, p. XII, https://www.fao.org/documents/card/en/c/ca9825en.	(2) Deforestation, forest degradation and forest conversion are taking place at an alarming rate. The Food and Agriculture Organization of the United Nations estimates that 420 million hectares of forest – about 10% of the world's remaining forests and an area larger than the European Union – have been lost worldwide between 1990 and 2020¹⁹. Deforestation, forest degradation and forest conversion are, in turn, important drivers of global warming and biodiversity loss — the two most important environmental challenges of our time. Yet every year the world continues to lose 10 million hectares of forest. Forests are also heavily impacted by climate change, and many challenges will need to be addressed to ensure the adaptability and resilience of forests in the coming decades. ¹ FAO, Global Forest Resource Assessment 2020, p. XII, https://www.fao.org/documents/card/en/c/ca9825en.		Not to raise the issue of forest conversion, but rest can be discussed

	Commission Proposal	EP	Council Mandate	Draft Agreement
		critical inputs for production, notably for medicines, <i>including antimicrobials. Furthermore, transpiration, the process by which trees take water from the ground and release it into the atmosphere from their leaves, is a major source of water to the atmosphere, and is estimated to be responsible for around half of all precipitation. Deforestation therefore heavily influences the rainfall regime and the natural regulation of water flows, both within forests but also in surrounding areas. The impact of deforestation on the Earth's water recycling system risks to be as devastating as its impact for climate change.</i>

19	(9) In 2019, the Commission adopted several initiatives to address the global environmental crises, including specific actions on deforestation. In its Communication ‘Stepping up EU Action to Protect and Restore the World’s Forests’¹, the Commission identified as a priority the reduction of the Union consumption footprint on land and encourage the consumption of products from deforestation-free supply chains in the Union. In its Communication of 11 December 2019 entitled ‘The European Green Deal’², the Commission set out a new growth strategy that aims to transform the Union into a fair and prosperous society, with a modern, resource-efficient and competitive economy, where there are no net emissions of greenhouse gases in 2050, where economic growth is decoupled from resource use and no person or place are left behind. It aims to protect, conserve and enhance the Union's natural capital, and protect the health and well-being of citizens and future generations from environment-related risks and impacts. Furthermore, the European Green Deal aims to provide citizens and future generations with, among others, fresh air, clean water, healthy soil and biodiversity. 			agreed notions, and ensure that the associated obligations can easily be implemented by operators and competent authorities. Those obligations should be operationally measurable and verifiable, as well as clear and unambiguous to provide legal certainty. In this context, this Regulation should focus on key elements of forest degradation that are measurable and verifiable, and that are particularly relevant to avoid environmental impacts, based on the most up-to-date scientific data. For that purpose, the definition should, initially and for a limited period of time, focus on structural changes to forest cover taking the form of conversion of primary forests to plantation forests and other wooded land, building on internationally agreed concepts that are defined by the FAO. The definition of forest degradation should be reviewed, in accordance with Article 32, to assess the extension of the definition with a view to covering a broader scope of forest degradation drivers and of forest ecosystems worldwide to further support the environmental objectives of this Regulation, taking into account progress made in international discussions on the matter, as well as the diversity of

68	(58) While this Regulation addresses deforestation and forest degradation, as envisaged in the 2019 Communication 'Stepping up EU Action to Protect and Restore the World's Forests, protecting forests should not lead to the conversion or degradation of other natural ecosystems. Ecosystems such as wetlands, savannahs and peatlands are highly significant to global efforts to combat climate change, as well as other sustainable development goals and their conversion or degradation require particular urgent attention. An evaluation of the need and the feasibility of extending the scope of this Regulation to other ecosystems than forests should therefore be undertaken within 2 years of the entry into force of this Regulation.	(58) While this Regulation addresses deforestation, forest degradation and forest conversion, as envisaged in the 2019 Communication 'Stepping up EU Action to Protect and Restore the World's Forests, protecting forests should not lead to the conversion or degradation of other natural ecosystems. Ecosystems such as wetlands, savannahs and peatlands are highly significant to global efforts to combat climate change and the biodiversity crisis, as well as other sustainable development goals and their conversion or degradation require particular urgent action and need to be prevented. There is no doubt that Union consumption is a considerable driver also of the conversion and degradation of biodiverse and carbon-rich non-forest ecosystems around the globe. In order to reduce the Union's footprint on all natural ecosystems, an evaluation of, and a legislative proposal to, extending the scope of this Regulation to other ecosystems than forests and other wooded land should be undertaken at the latest one year of the entry into force of this Regulation, for which the preparations should start at the latest at the day of entry into force of this Regulation. Further delaying to include other ecosystems in this Regulation risks shifting agricultural		Not to raise Package discussion on forest conversion

	Commission Proposal	EP	Council Mandate	Draft Agreement
		<i>production from forests to non-forest ecosystems. The latter are also increasingly under pressure of conversion and degradation due to commodity production for the Union market. The Commission should also assess the need and feasibility of extending the scope to further commodities at the latest two years after the date of entry into force of this Regulation. At the same time, the Commission should also undertake a review of the relevant products listed in Annex I to this Regulation by way of delegated act.</i>
