concerning common rules for the internal		
market in natural gas <sup>6</sup> ⊠ and Directive		
2009/73/EC of the European Parliament and of		- 1
the Council ☑ <u>have<del>has</del></u> made a significant		
contribution towards the creation of such an		
internal market in natural gas.		
<b>₽</b> new		
(4) As part of the Package "Clean Energy		
for all Europeans" proposed by the Commission		
on 30 November 2016, Regulation (EU)		
2019/943 <sup>7</sup> and Directive (EU) 2019/944 <sup>8</sup>		
brought about a further step in the development		
of the internal market for electricity with		
citizens at its core and contributing to the		

<sup>6</sup> OJ L 176, 15.7.2003, p. 57

Regulation (EU) 2019/943 of the European Parliament and of the Council of 5 June 2019 on the internal market for electricity (OJ L 158, 14.6.2019, p. 54).

Directive (EU) 2019/944 of the European Parliament and of the Council of 5 June 2019 on common rules for the internal market for electricity and amending Directive 2012/27/EU (OJ L 158, 14.6.2019, p. 125).

Important: In order to guarantee that your comments appear accurately, please do not modify the table format by adding/removing/adjusting/merging/splitting cells and rows. This would hinder the consolidation of your comments.

Presidency compromise text	Drafting Suggestions	Comments
Tresidency compromise text	Draiting Suggestions	Comments
Union's objectives of transition to a clean		
energy system and reducing greenhouse gas		
emissions. The internal market in natural gas		- //
should be built on those same principles and, in		
particular, ensure an equal level of consumer		
protection.		
(5) The Union has aims to cut greenhouse		
gas emissions. It has therefore adopted a set of		
initiatives to reach that goal, including the		
energy system integration strategy and the		
hydrogen strategy published by the Commission		
in July 2020, which set out how to update the		
energy markets, including the decarbonisation		
of gas markets as well as Regulation (EU)		
2018/1999 and Regulation (EU) 2021/1119.		
This Directive should contribute to achieving		
these goals, ensuring security of supply and a		
well-functioning internal market for gases,		
including for hydrogen.		

Important: In order to guarantee that your comments appear accurately, please do not modify the table format by adding/removing/adjusting/merging/splitting cells and rows. This would hinder the consolidation of your comments.

Presidency compromise text	Drafting Suggestions	Comments
(5a) This Directive should be seen in		
conjunction with other policy instruments,		- 1
notably those proposed under the Green		
Deal. Many of these other proposed		
instruments, such as the extension of the		
EU's [Emission Trading System, the Effort		
<b>Sharing Regulation, the Reneweble Energy</b>		
Directive, the Energy Efficiency Directive,		
the ReFuelEU initiatives and the proposed		
revision of the Energy Taxation Directive		
seek to incentivise the decarbonisation of the		
EU's economy and ensure its remains on a		
trajectory towards a climate neutral EU by		
2050, as mandated by the European Climate		
Law]. The main objective of this Directive is		
however not to incentivise the transition but		
to enable and facilitate it by ensuring the		
continuing existence of efficient markets for		
gases.		

Important: In order to guarantee that your comments appear accurately, please do not modify the table format by adding/removing/adjusting/merging/splitting cells and rows. This would hinder the consolidation of your comments.

Presidency compromise text	Drafting Suggestions	Comments
(6) This Directive aims to facilitate the		
penetration of renewable and low-carbon gases		- 1
into the energy system enabling a shift from		
fossil gas and to allow these new gases to play		
an important role towards achieving the EU's		
2030 climate objectives and climate neutrality in		
2050. The Directive aims also to set up a		
regulatory framework which enables and		
incentivises all market participants to take the		
transitional role of fossil gas into account while		
planning their activities to avoid lock-in effects		
and ensure gradual and timely phase-out of		
fossil gas notably in all relevant industrial		
sectors and for heating purposes.		
(6a) In the trajectory for the European		
Union to achieve climate neutrality by 2050,		
energy saving and direct electrification are		
expected to present the most cost-effective		

Important: In order to guarantee that your comments appear accurately, please do not modify the table format by adding/removing/adjusting/merging/splitting cells and rows. This would hinder the consolidation of your comments.

Presidency compromise text	Drafting Suggestions	Comments
and energy-efficient decarbonisation option		
in many cases. There will however remain a		
number of end-use applications where this		* //
might not be feasible or have higher costs. In		
such cases, it may be relevant to use		
renewable or low-carbon gases and fuels.		
including biomethane and renewable and		
low-carbon hydrogen . The incentives created		
by the European Green Deal Package are		
thus expected to result in a fundamental		
change in the structure of energy demand in		
general and that for gases in particular. For		
instance, where today natural gas is widely		
used for space heating purposes, this demand		
is expected to be met largely by other energy		
carriers, such as through electrified space		
heating appliances, in the future. The future		
use-cases for hydrogen are expected to		
primarily be in otherwise hard to		
decarbonise sectors. These include a number		

Important: In order to guarantee that your comments appear accurately, please do not modify the table format by adding/removing/adjusting/merging/splitting cells and rows. This would hinder the consolidation of your comments.

Presidency compromise text	Drafting Suggestions	Comments
of industrial processes, but also transport		
modes such as long haul heavy duty road		
transport, aviation and maritime. As the		- ' //
precise decarbonisation trajectories, role of		
energy carriers and their use cases will also		
depend on local starting points, endowments		
and circumstances, they should not be		
prescribed in detail. Efficient markets will		
ensure that, given local endowment and		
cirsumstances, consumers incentivised by		
other policy instruments are empowered to		
choose the decarbonisation options most		
suited to their particular use-case.		
(7) The EU hydrogen strategy recognises		
that, as EU Member States have different		
potential for the production of renewable		
hydrogen, an open and competitive EU market		
with unhindered cross-border trade has		
important benefits for competition, affordability,		

Important: In order to guarantee that your comments appear accurately, please do not modify the table format by adding/removing/adjusting/merging/splitting cells and rows. This would hinder the consolidation of your comments.

Presidency compromise text	Drafting Suggestions	Comments
and security of supply. Moreover, it stresses that		
moving towards a liquid market with		
commodity-based hydrogen trading would		• //
facilitate entry of new producers and be		
beneficial for deeper integration with other		
energy carriers. It would create viable price		
signals for investments and operational		
decisions. The rules laid down in this Directive		
should thus be conducive for hydrogen markets,		
commodity-based hydrogen trading and liquid		
trading hubs to emerge and any undue barriers		
in this regard should be eliminated by Member		
States. Whilst recognising the inherent		
differences, existing rules that enabled efficient		
commercial operations developed for the		
electricity and gas markets and trading should		
be rendered applicable to Union hydrogen		
markets to the extent appropriate and within a		
suitable time frame.		

Important: In order to guarantee that your comments appear accurately, please do not modify the table format by adding/removing/adjusting/merging/splitting cells and rows. This would hinder the consolidation of your comments.

Presidency compromise text	Drafting Suggestions	Comments
(8) In line with the EU Hydrogen Strategy,		
renewable hydrogen is expected to be deployed		
on a large-scale from 2030 onwards for the		- " //
purpose of decarbonising certain sectors,		
ranging from aviation and shipping to hard-to-		
decarbonise industrial sectors. All final		
customers connected to hydrogen systems will		
benefit from basic consumer rights applicable to		
final customers connected to the natural gas		
system such as the right to switch supplier and		
accurate billing information. In those instances		
where customers are connected to the hydrogen		
network, e.g. industrial customers, they will		
benefit from the same consumer protection		
rights applicable to natural gas customers.		
However, consumer provisions designed to		
encourage household participation on the		
market such as price comparison tools, active		
customers and citizen energy communities do		
not apply to the hydrogen system.		

Important: In order to guarantee that your comments appear accurately, please do not modify the table format by adding/removing/adjusting/merging/splitting cells and rows. This would hinder the consolidation of your comments.

Presidency compromise text	Drafting Suggestions	Comments
	0 00	
(9) In line with the EU Hydrogen Strategy,		
the priority for the EU is to develop renewable		
hydrogen produced using mainly wind and solar		
energy. Renewable hydrogen is the most		
compatible option with the EU's climate		
neutrality and zero pollution goal in the long		
term and the most coherent with an integrated		
energy system. However, low-carbon fuels		
(LCFs) such as low-carbon hydrogen (LCH)		
may play a role in the energy transition,		
particularly in the short and medium term to		
rapidly reduce emissions of existing fuels, and		
support the uptake of renewable fuels such as		
renewable hydrogen. In order to support the		
transition, it is necessary to establish a threshold		
for greenhouse gas emission reductions for low-		
carbon hydrogen and synthetic gaseous fuels.		
Such threshold should become more stringent		
for hydrogen produced in installations starting		

Important: In order to guarantee that your comments appear accurately, please do not modify the table format by adding/removing/adjusting/merging/splitting cells and rows. This would hinder the consolidation of your comments.

Presidency compromise text	Drafting Suggestions	Comments
operations from 1 January 2031 to take into		
account technological developments and better		
stimulate the dynamic progress towards the		- "//
reduction of greenhouse gas emissions from		
hydrogen production. The EU Energy System		
Integration strategy highlighted the need to		
deploy an EU-wide certification system to also		
cover low-carbon fuels with the aim to enable		
Member States to compare them with other		
decarbonisation options and consider them in		
their energy mix as a viable solution. In order to		
ensure that LCF have the same decarbonisation		
impact as compared to other renewable		
alternatives it is important that they are certified		
by applying a similar methodological approach		
based on a life cycle assessment of their total		
greenhouse gas ('GHG') emissions. This would		
allow deploying a comprehensive EU-wide		
certification system, covering the whole Union		
energy mix. Taking into consideration that LCF		

Important: In order to guarantee that your comments appear accurately, please do not modify the table format by adding/removing/adjusting/merging/splitting cells and rows. This would hinder the consolidation of your comments.

Presidency compromise text	Drafting Suggestions	Comments
and LCH are not renewable fuels, their		
terminology and certification could not be		
included in the proposal for the revision of		*//
Directive (EU) 2018/2001 of the European		
Parliament and of the Council <sup>9</sup> . Therefore, their		
inclusion in this Directive fills in this gap.		
<b>◆</b> 2009/73/EC Recital 3		
(10) The freedoms which the Treaty		
guarantees the citizens of the Union — inter		
alia, the free movement of goods, the freedom		
of establishment and the freedom to provide		
services — are achievable only in a fully open		
market, which enables all consumers freely to		
choose their suppliers and all suppliers freely to		
deliver to their customers.		

Directive (EU) 2018/2001 of the European Parliament and of the Council of 11 December 2018 on the promotion of the use of energy from renewable sources (OJ L 328, 21.12.2018, p. 82).

Important: In order to guarantee that your comments appear accurately, please do not modify the table format by adding/removing/adjusting/merging/splitting cells and rows. This would hinder the consolidation of your comments.

Presidency compromise text	Drafting Suggestions	Comments
(10a) Member States should, in respect of a		
fully open market, still be able to plan their		- 1
energy mix. Member States are able to		
choose to strategically close and adjust part		
of their distribution system in order to phase		
out households to ensure the transition into a		
sustainable and effective system.		
<b>◆</b> 2009/73/EC Recital 4		
(4) However, at present, there are obstacles		
to the sale of gas on equal terms and without		
discrimination or disadvantages in the		
Community. In particular, non-discriminatory		
network access and an equally effective level of		
regulatory supervision in each Member State do		
not yet exist.		

Important: In order to guarantee that your comments appear accurately, please do not modify the table format by adding/removing/adjusting/merging/splitting cells and rows. This would hinder the consolidation of your comments.

Presidency compromise text	Drafting Suggestions	Comments
<b>¥</b> 2009/73/EC Recital 5		
(5) The Communication of the Commission		
of 10 January 2007 entitled 'An Energy Policy		
for Europe' highlighted the importance of		
eompleting the internal market in natural gas		
and of creating a level playing field for all		
natural gas undertakings established in the		
Community. The Communications of the		
Commission of 10 January 2007 entitled		
'Prospects for the internal gas and electricity		
market' and 'Inquiry pursuant to Article 17 of		
Regulation (EC) No 1/2003 into the European		
gas and electricity sectors (Final Report)'		
showed that the present rules and measures do		
not provide the necessary framework for		
achieving the objective of a well-functioning		
<del>internal market.</del>		
<b>▼</b> 2009/73/EC recital 48 (adapted)		

Important: In order to guarantee that your comments appear accurately, please do not modify the table format by adding/removing/adjusting/merging/splitting cells and rows. This would hinder the consolidation of your comments.

Presidency compromise text	<b>Drafting Suggestions</b>	Comments
⇒ new		
→ new		
(11) Consumer interests should be at the heart		
of this Directive and quality of service should be		
a central responsibility of natural gas <i>and</i>		
<i>hydrogen</i> undertakings. Existing rights of		
consumers		
energy services, including energy, and		
safeguarding against energy poverty, as stated in		
the European Pillar of Social Rights		
communication ← need to be strengthened and		
guaranteed, and should include greater		
transparency. Consumer protection should		
ensure that all consumers in the wider remit of		
the <del>Community</del> ⊠ Union ⊠ benefit from a		
competitive ⊠ gas ⊠ market. Consumer rights		
should be enforced by Member States or, where		
a Member State has so provided, the regulatory		
authorities.		

Important: In order to guarantee that your comments appear accurately, please do not modify the table format by adding/removing/adjusting/merging/splitting cells and rows. This would hinder the consolidation of your comments.

Presidency compromise text	Drafting Suggestions	Comments
↓ new		
(12) The European Pillar of Social Rights		
places energy among the essential services		
everyone shall have access to and calls for		
support measures for those in need (principle		
20). UN Sustainable Development Goal number		
7 (SDG7) also calls for ensuring access to		
affordable, reliable, sustainable and modern		
energy for all.		
<b>◆</b> 2009/73/EC recital 47 (adapted)		
(13) The Ppublic service requirements and		
the common minimum standards that follow		
from them need to be further strengthened to		
make sure that all consumers, especially		
vulnerable ones, can benefit from competition		

Important: In order to guarantee that your comments appear accurately, please do not modify the table format by adding/removing/adjusting/merging/splitting cells and rows. This would hinder the consolidation of your comments.

Presidency compromise text	Drafting Suggestions	Comments
and fair prices. The public service requirements		
should be defined at national level, taking into		
account national circumstances; Community		- * //
➤ Union   law should, however, be		
respected by the Member States. The citizens of		
the Union and, where Member States deem it to		
be appropriate, small enterprises, should be able		
to enjoy public service obligations, in particular		
with regard to security of supply and reasonable		
<del>tariffs.</del>		
(14) Member States should have a wide		
discretion to impose public service obligations		
on gas undertakings in pursuing objectives of		
general economic interest. However, public		
service obligations in the form of price setting		
for the supply of natural gas constitute a		
fundamentally distortive measure that often		

Important: In order to guarantee that your comments appear accurately, please do not modify the table format by adding/removing/adjusting/merging/splitting cells and rows. This would hinder the consolidation of your comments.

Presidency compromise text	<b>Drafting Suggestions</b>	Comments
leads to the accumulation of tariff deficits, the		
limitation of consumer choice, poorer incentives		
for energy saving and energy efficiency		
investments, lower standards of service, lower		
levels of consumer engagement and satisfaction,		
and the restriction of competition, as well as to		
there being fewer innovative products and		
services on the market. Consequently, Member		
States should apply other policy tools, in		
particular targeted social policy measures, to		
safeguard the affordability of natural gas supply		
to their citizens. Public interventions in price		
setting for the supply of natural gas should be		
carried out only as public service obligations		
and should be subject to specific conditions. A		
fully liberalised, well-functioning retail natural		
gas market would stimulate price and non-price		
competition among existing suppliers and		
provide incentives to new market entrants,		

Important: In order to guarantee that your comments appear accurately, please do not modify the table format by adding/removing/adjusting/merging/splitting cells and rows. This would hinder the consolidation of your comments.

Presidency compromise text	Drafting Suggestions	Comments
thereby improving consumer choice and		
satisfaction.		
		- //
(15) Public service obligations in the form of		7
price setting for the supply of natural gas should		
be used without overriding the principle of open		
markets in clearly defined circumstances and		
beneficiaries and should be limited in duration.		
In order to mitigate the distortive effects of		
public service obligations in price setting for the		
supply of natural gas, Member States applying		
such interventions should put in place additional		
measures, including measures to prevent		
distortions of price setting in the wholesale		
market. Member States should ensure that all		
beneficiaries of regulated prices are able to		
benefit fully from the offers available on the		
competitive market when they choose to do so.		
To that end, they should be directly and		
regularly informed of the offers and savings		

Important: In order to guarantee that your comments appear accurately, please do not modify the table format by adding/removing/adjusting/merging/splitting cells and rows. This would hinder the consolidation of your comments.

concerning their rights in relation to the energy		
sector. The Commission <del>should establish</del>		
★ has established ★ , after consulting		<b>*</b>
relevant stakeholders including Member States,		
national regulatory authorities, consumer		
organisations and natural gas undertakings, an		
accessible, user-friendly energy consumer		
checklist providing consumers with practical		
information about their rights. That energy		
consumer checklist should be   ⇒ maintained to		
date, $\Leftarrow$ provided to all consumers and should be		
made publicly available.		
<b></b> new		
(18) Member States should take into account		
the fact that the successful transition requires		
enhanced investment in education and skills for		
workers in the gas industry, including in relation		
to infrastructure development. Such mention		

Important: In order to guarantee that your comments appear accurately, please do not modify the table format by adding/removing/adjusting/merging/splitting cells and rows. This would hinder the consolidation of your comments.

Presidency compromise text	Drafting Suggestions	Comments
would be in line with the proposal for a revision		
of EED (2021/0203 (COD).		
(19) Market rules should protect and		
empower customers to make low carbon		
choices, in order for new renewable and low		
carbon gases to be fully embedded in the energy		
transition.		
(20) Natural gas still plays a key role in		
energy supply, as household energy		
consumption from natural gas is still higher than		
from electricity. Although electrification is a		
key element of the green transition, in the future		
there will still be household natural gas		
consumption including increasing volumes of		
renewable gas.		

Important: In order to guarantee that your comments appear accurately, please do not modify the table format by adding/removing/adjusting/merging/splitting cells and rows. This would hinder the consolidation of your comments.

Presidency compromise text	Drafting Suggestions	Comments
(21) As the natural gas sector, including the		
natural gas retail market was not part of the		
Clean Energy for all Europeans Package, the		- 1
related provisions on consumer engagement and		
protection have not been adapted to the needs of		
the energy transition, which corresponds instead		
to the situation of over a decade ago when the		
Third Energy Package was adopted.		
(22) The natural gas market witnesses poor		
customer satisfaction and engagement as well as		
slow uptake of new renewable and low-carbon		
gases, which all reflect limited competition in		
many Member States. <i>Unlike falling prices in</i>		
wholesale markets, nNatural gas prices for		
household customers rose in the last decade		
resulting in household consumers paying two or		
three times more for their natural gas		
consumption than industrial customers.		

Important: In order to guarantee that your comments appear accurately, please do not modify the table format by adding/removing/adjusting/merging/splitting cells and rows. This would hinder the consolidation of your comments.

Presidency compromise text	Drafting Suggestions	Comments
(23) As in the electricity sector, market		
flexibilities and an adequate Union consumer		
rights' legal framework in the natural gas sector		- 1
are essential to ensure that consumers can		
participate in the energy transition		
and benefit from affordable prices, good		
standards of service, and effective choice of		
offers mirroring technological developments.		
(24) The switch from fossil gas to renewable		
alternatives will concretise if energy from		
renewable sources becomes an attractive, non-		
discriminatory choice for consumers based on		
truly transparent information where the		
transition costs are fairly distributed among		
different groups of consumers and market		
players.		
(25) To address the current gaps in the retail		
gas market, it is necessary to tackle the existing		

Important: In order to guarantee that your comments appear accurately, please do not modify the table format by adding/removing/adjusting/merging/splitting cells and rows. This would hinder the consolidation of your comments.

Presidency compromise text	Drafting Suggestions	Comments
competition and technical barriers to the		
emergence of new services, better levels of		
service, and lower consumer prices, whilst		- *//
ensuring the protection of energy poor and		
vulnerable consumers.		
(26) In order to ensure a high level of		
consumer protection and empowerment		
consistently across energy sectors, the		
legislative framework in the decarbonised gas		
market legislation should reflect the electricity		
market customer protection and where relevant		
its empowerment provisions.		
(27) To be coherent and effective, this		
mirroring approach should be encompass all		
consumer protection and empowerment		
provisions, whenever feasible and adaptable to		
the gas market. This should go from basic		
contractual rights to rules for billing		

Important: In order to guarantee that your comments appear accurately, please do not modify the table format by adding/removing/adjusting/merging/splitting cells and rows. This would hinder the consolidation of your comments.

Presidency compromise text	Drafting Suggestions	Comments
information, switching energy provider, having		
at disposal reliable comparison tools, protecting		
vulnerable and energy poor consumers, ensuring		* //
adequate data protection for smart meters and		
data management, and efficient alternative		
dispute resolution rules.		
(28) In pursuing the consistency of provisions		
across sectors, burdens for national		
administrations and businesses should be		
limited and proportionate by also building on		
the experience with the Clean Energy for All		
Europeans Package.		
(29) The modernisation of the gas sector is		
expected to lead to substantial economic and		
environmental benefits in terms of both		
improved retail competition and its social and		
distributional benefits and customer		
empowerment, including strengthened		

Important: In order to guarantee that your comments appear accurately, please do not modify the table format by adding/removing/adjusting/merging/splitting cells and rows. This would hinder the consolidation of your comments.

Presidency compromise text	Drafting Suggestions	Comments
contractual rights and better available		
information on consumption and energy sources		
leading to greener choices. Energy		- 1
communities-of-interest should contribute to the		
uptake of renewable gas.		
(30) Switching is an important indicator of		
consumer engagement as well as in-an		
important tool to boost competition on both, the		
natural gas and hydrogen markets. Switching		
rates remain inconsistent among Member States		
and consumers are discouraged from switching		
by exit and termination fees. Although		
removing such fees might limit consumer choice		
by eliminating products based on rewarding		
consumer loyalty, restricting their use further		
should improve consumer welfare, consumer		
engagement and competition in the market.		
L		

Important: In order to guarantee that your comments appear accurately, please do not modify the table format by adding/removing/adjusting/merging/splitting cells and rows. This would hinder the consolidation of your comments.

Presidency compromise text	Drafting Suggestions	Comments
(31) Shorter switching times are likely to		
encourage customers to search for better energy		
deals and switch supplier. With the increased		- 1
deployment of information technology, by the		
year 2026, the technical switching process of		
registering a new supplier in a metering point at		
the market operator should typically be possible		
to complete within 24 hours on any working		
day. Ensuring that it is possible by that date for		
the technical process of switching to take place		
within 24 hours would minimise switching		
times, helping to increase consumer engagement		
and retail competition.		
(32) Several factors impede consumers from		
accessing, understanding and acting upon the		
various sources of market information available		
to them. It follows that the comparability of		
offers should be improved and barriers to		
switching should be minimised to the greatest

Presidency compromise text	Drafting Suggestions	Comments
practicable extent without unduly limiting		
consumer choice.		
(33) Independent comparison tools, including		
websites, are an effective means for smaller		
customers to assess the merits of the different		
energy offers that are available on the market.		
They should aim to include the broadest		
possible range of available offers, and to cover		
the market as completely as is feasible so as to		
give the customer a representative overview. It		
is crucial that smaller customers have access to		
at least one comparison tool and that the		
information given on such tools be trustworthy,		
impartial and transparent. To that end, Member		
States could provide for a comparison tool that		
is operated by a national authority or a private		
company.

(34) Final customers should also be able to		
consume, to store and to sell self-generated		
renewable gas and participate in all natural gas		* //
markets by providing ancillary services to the		
system, for instance through energy storage.		
Member States should be able to have different		
provisions in their national law with respect to		
taxes and levies for individual and jointly-acting		
active customers.		
(35) Recognising the role they can play in		
decarbonizing the energy system, certain		
categories of citizen energy initiatives should be		
recognised in the natural gas market at the		
Union level as 'citizen energy communities'.		
These communities should facilitate the use of		
renewable gas in the natural gas system. In		
order to provide them with an enabling		
framework, fair treatment, a level playing field		
and a well-defined catalogue of rights and

Presidency compromise text	Drafting Suggestions	Comments
(37) Bills and billing information are an		
important means to inform and empower final		· //
customers. Energy bills remain the most		
common consumer concern and source of		
consumer complaints, a factor that contributes		
to the persistently low levels of consumer		
satisfaction and engagement in the gas sector.		
Provisions for billing information in the gas		
sector also lag behind rights granted to		
consumers in the electricity sector. It is		
therefore necessary to align them and to set		
minimum requirements for bills and billing		
information in the gas sector, so that consumers		
have access to transparent, easy to understand		
information. Bills should convey information to		
the final consumers on their consumption and		
costs, thus facilitating comparison between		
offers and switching supplier, as well as		
information on their consumer rights (such as on		

Important: In order to guarantee that your comments appear accurately, please do not modify the table format by adding/removing/adjusting/merging/splitting cells and rows. This would hinder the consolidation of your comments.

Presidency compromise text	Drafting Suggestions	Comments
alternative dispute resolution). In addition, bills		
should be a tool to actively engage consumers in		
the market, so that consumers can manage their		- *//
consumption patterns and make greener choices.		
It is important to provide comprehensive and		
accurate information to consumers to ensure		
they are aware of their environmental impact		
and, thus, consumers can express their		
preference for the most sustainable energy		
carriers.		
(38) The regular provision of accurate billing		
information based on actual gas consumption,		
facilitated by smart metering, is important to		
help customers to control their gas consumption		
and costs. Nevertheless, customers, in particular		
household customers, should have access to		
flexible arrangements for the actual payment of		
their bills.

interests, is clearly an effective and stable way		- 1
to solve the inherent conflict of interests and to		
ensure security of supply. For that reason, the		
European Parliament, in its resolution of 10 July		
2007 on prospects for the internal gas and		
electricity market <sup>13</sup> referred to ownership		
unbundling at transmission level as the most		
effective tool <del>by which</del> to promote investments		
in infrastructure in a non-discriminatory way,		
fair access to the network for new entrants and		
transparency in the market. Under ownership		
unbundling, Member States should therefore be		
required to ensure that the same person or		
persons are not entitled to exercise control over		
a production or supply undertaking and, at the		
same time, exercise control or any right over a		

<sup>13</sup>

transmission system operator or transmission		
system. Conversely, control over a transmission		
system or transmission system operator should		- 1
preclude the possibility of exercising control or		
any right over a production or supply		
undertaking. Within those limits, a production		
or supply undertaking should be able to have a		
minority shareholding in a transmission system		
operator or transmission system.		
<b>♦</b> 2009/73/EC Recital 9		
(52) Any system for unbundling should be		
effective in removing any conflict of interests		
between producers, suppliers and transmission		
system operators, in order to create incentives		
for the necessary investments and guarantee the		
access of new market entrants under a		
transparent and efficient regulatory regime and

(66) Pipeline networks for hydrogen should		- //
constitute an important means of efficient and		
sustainable transport for hydrogen, both onshore		
and offshore. As a result of the high capital		
expenditure required for their construction,		
hydrogen pipeline networks could constitute		
natural monopolies. Experience with the		
regulation of natural gas markets has shown the		
importance of ensuring open and non-		
discriminatory access to pipeline networks with		
a view to safeguarding competition on		
commodity markets. Therefore, well-established		
principles of network operation, such as third-		
party access, should be applicable to onshore		
and offshore hydrogen networks in the Union.		
(67) The operation of hydrogen networks		
should be separated from activities of energy		
1

production and supply in order to avoid the risk		
of conflicts of interest on behalf of the network		
operators. The structural separation of		
ownership of hydrogen networks and		
participations in energy production and supply		
guarantees the absence of such conflicts of		
interest. Member States should be able to rely		
on the alternative unbundling model of		
"integrated hydrogen network operator" until		
2030 to provide a transitional period for existing		
vertically integrated hydrogen networks.		
Member States should also be able to allow the		
use of the "independent hydrogen network		
operator" model to allow vertically integrated		
owners of hydrogen networks to retain		
ownership of their networks while ensuring the		
non-discriminatory operation of such networks		
after 2030.

Presidency compromise text	Drafting Suggestions	Comments
existing vertically integrated hydrogen		
networks. Member States should also be able		
to offer the use of an independent hydrogen		- *//
network operator to allow vertically integrated		
owners of hydrogen networks to retain		
ownership of their networks while ensuring the		
non-discriminatory operation of such networks		
after 2030.		
(70) In order to ensure transparency with		
regard to the costs and financing of regulated		
activities, activities of hydrogen network		
operation should be separated from other		
network operation activities for other energy		
carriers at least in relation to the legal form and		
accounts of network operators. For the sake of		
legal unbundling of hydrogen network		
operators, the creation of a subsidiary or a		
separate legal entity within the group structure		
of the gas transmission or distribution system		

Important: In order to guarantee that your comments appear accurately, please do not modify the table format by adding/removing/adjusting/merging/splitting cells and rows. This would hinder the consolidation of your comments.

Presidency compromise text	Drafting Suggestions	Comments
operator should be considered sufficient,		
without the need for a functional unbundling		
of governance or separation of management or		- *//
staff. Transparency with regard to the costs		
and financing of regulated activities is thus		
achieved without losing the synergies and cost-		
advantages that operating several networks		
may be able to bring.		
(71) Hydrogen networks should be subject to		
third-party access in order to ensure competition		
and a level playing field in the market for		
hydrogen supply. Regulated third-party access		
on the basis of regulated access tariffs should be		
the default rule in the long-term. In order to		
ensure the necessary flexibility for operators and		
to reduce administrative costs during the ramp-		
up phase of the hydrogen market, Member		
States should have the option to allow the use of		
negotiated third-party access until 2030.		

Important: In order to guarantee that your comments appear accurately, please do not modify the table format by adding/removing/adjusting/merging/splitting cells and rows. This would hinder the consolidation of your comments.

Presidency compromise text	<b>Drafting Suggestions</b>	Comments
(72) The availability of large-scale		
underground hydrogen storage facilities is		* //
limited and distributed unevenly across Member		
States. In view of the potentially beneficial role		
for the functioning of hydrogen transport and		
markets, the access to such large-scale		
underground storages should be subject to		
regulated third party access in order to ensure a		
level playing field for market participants.		
(72a) It is to be expected that hydrogen and		
hydrogen derivatives (like amonia or liquid		
organic hydrogen carriers) will be imported		
into the EU. However, it is as yet uncertain		
by what means and in what form hydrogen		
will be imported whilst various means and		
forms are likely to coexist and compete with		
each other. This Directive provides a		
regulatory framework for infrastructure and		

Important: In order to guarantee that your comments appear accurately, please do not modify the table format by adding/removing/adjusting/merging/splitting cells and rows. This would hinder the consolidation of your comments.

Presidency compromise text	Drafting Suggestions	Comments
markets for gaseous hydrogen. Consequently,		
only where other forms of hydrogen or		
derivatives and the facilities that handle them		- 1
are relevant to ensure the emergence of a		
competive market for gaseous hydrogen-is		
the role and the rules that may apply to them		
defined in this Directive.		
(73) Terminals for the conversion of liquid		
hydrogen or liquid ammonia into gaseous		
hydrogen constitute a means of hydrogen		
import, but they compete with other means of		
hydrogen transport. While third-party access to		
such terminals should be ensured, Member		
States should have the choice of imposing a		
system of negotiated third-party access with a		
view to reducing administrative costs for		
operators and regulatory authorities.		

Important: In order to guarantee that your comments appear accurately, please do not modify the table format by adding/removing/adjusting/merging/splitting cells and rows. This would hinder the consolidation of your comments.

Presidency compromise text	Drafting Suggestions	Comments
(74) Existing vertically integrated hydrogen		
networks should be integrated into the		
regulatory framework following a transition		- 1
period.		
(75) Localised hydrogen clusters should be		
an important building block of the European		
hydrogen economy. Such clusters could benefit		
from simplified regulatory requirements during		
the ramp-up phase of the hydrogen market.		
(76) Pipeline interconnectors with third		
countries can serve as a means of transport for		
imports or exports of hydrogen. The operating		
rules for such hydrogen interconnectors with		
third countries and rules on the certification of		
renewable and low-carbon hydrogen, should be		
enshrined in an intergovernmental agreement to		
ensure a coherent regulatory framework and its

Presidency compromise text	Drafting Suggestions	Comments
consistent application for the entire		
infrastructure.		
(77) To ensure the efficient operation of the		
European hydrogen networks, hydrogen		
network operators should be responsible for the		
operation, maintenance and development of the		
hydrogen transport network in close cooperation		
with other hydrogen network operators as well		
as with other system operators to which their		
networks are or can be connected with,		
including to facilitate energy system integration.		
(78) Hydrogen network operators should be		
tasked with building sufficient cross-border		
capacity for the transportation of hydrogen		
accommodating all economically reasonable and		
technically feasible demands for such capacity,		
thereby enabling market integration.		

Important: In order to guarantee that your comments appear accurately, please do not modify the table format by adding/removing/adjusting/merging/splitting cells and rows. This would hinder the consolidation of your comments.

Presidency compromise text	Drafting Suggestions	Comments
(79) In some cases, depending among others		
on the topography of hydrogen networks and the		- '/
population of end-users connected to the		
hydrogen networks, hydrogen quality		
management by hydrogen network operators		
could become necessary (e.g. purification).		
Therefore, regulatory authorities can task		
hydrogen network operators with ensuring		
efficient hydrogen quality management in their		
networks where necessary for system		
management. When undertaking such activities,		
hydrogen network operators should comply with		
applicable hydrogen quality standards.		
(80) Where system operators for natural gas		
or hydrogen network operators refuse requests		
for access or connection due to a lack of		
capacity, should refusals should be duly		
substantiated, and operators should be required

to enhance their system in order to enable the		
requested connections or access where it is		
economic to do so.		- 1
<b>Ψ</b> (EU) 2019/692 recital 3 (adapted)		
(81) This Directive seeks to address		
Oebstacles to the completion of the internal		
market in natural gas which result from the non-		
application of Union market rules to gas		
transmission lines to and from third countries		
$igtheref{initial}$ should also be adressed $igtheref{initial}$ . The		
amendments introduced by this Directive ☒> It		
is necessary 🖾 are intended to ensure that the		
rules applicable to gas transmission lines		
connecting two or more Member States are also		
applicable, within the Union, to gas		
transmission lines to and from third countries.		
This <del>will</del> ⊠ should ⊠ establish consistency of		
the legal framework within the Union while		

Important: In order to guarantee that your comments appear accurately, please do not modify the table format by adding/removing/adjusting/merging/splitting cells and rows. This would hinder the consolidation of your comments.

Presidency compromise text	Drafting Suggestions	Comments
avoiding distortion of competition in the internal		
energy market in the Union and negative		
impacts on the security of supply. It will		* //
provide legal certainty to market participants, in		
particular investors in gas infrastructure and		
system users, as regards the applicable legal		
regime.		
<b>↓</b> new		
(82) Member States and the Contracting		
Parties to the Treaty establishing the Energy		
Community <sup>15</sup> should cooperate closely on all		
matters concerning the development of an		
integrated gas market and its decarbonisation		
and should take no measures that endanger the		
further integration of gas markets or the security		

<sup>15</sup>

⇒ new		
, new		
(92) The security of energy supply is an		J/
essential element of public security and is		
therefore inherently connected to the efficient		
functioning of the internal market in gas and the		
integration of the isolated gas markets of		
Member States. Gas can reach the citizens of the		
Union only through the network. Functioning		
open gas markets and, in particular, the		
networks and other assets associated with gas		
supply are essential for public security, for the		
competitiveness of the economy and for the		
well-being of the citizens of the Union. Persons		
from third countries should therefore only be		
allowed to control a transmission system or a		
transmission system operator if they comply		
with the requirements of effective separation		
that apply inside the <del>Community</del> ⊠ Union ⊠.		

Important: In order to guarantee that your comments appear accurately, please do not modify the table format by adding/removing/adjusting/merging/splitting cells and rows. This would hinder the consolidation of your comments.

Presidency compromise text	Drafting Suggestions	Comments
Without prejudice to the international		
obligations of the $\frac{\text{Community}}{\text{Community}} \boxtimes \text{Union } \boxtimes$ ,		
the <del>Community</del> ⊠ Union ⊠ considers that the		- "//
gas transmission system sector is of high		
importance to the <del>Community</del> ⊠ Union ⊠ and		
therefore additional safeguards are necessary		
regarding the preservation of the security of		
supply of energy to the <del>Community</del>		
☑ Union ☑ to avoid any threats to public		
order and public security in the Community		
☑ Union ☑ and the welfare of the citizens of		
the Union. The security of supply of energy to		
the <del>Community</del> ⊠ Union ⊠ requires, in		
particular, an assessment of the independence of		
network operation, the level of the Community		
☑ Union ☑'s and individual Member States'		
dependence on energy supply from third		
countries, and the treatment of both domestic		
and foreign trade and investment in energy in a		
particular third country. Security of supply

facility, linepack or ancillary service operates in		
a sufficiently competitive market, access could		
be allowed on the basis of transparent and non-		- *//
discriminatory market-based mechanisms.		
<b>▼</b> 2009/73/EC recital 24 (adapted)		
(94) It is necessary to ensure the		
independence of storage system operators in		
order to improve third-party access to storage		
facilities that are technically and/or		
economically necessary for providing efficient		
access to the system for the supply of		
customers. It is therefore appropriate that		
storage facilities are operated through legally		
separate entities that have effective decision-		
making rights with respect to assets necessary to		
maintain, operate and develop storage facilities.		
It is also necessary to increase transparency in		
respect of the storage capacity that is offered to		

Important: In order to guarantee that your comments appear accurately, please do not modify the table format by adding/removing/adjusting/merging/splitting cells and rows. This would hinder the consolidation of your comments.

Presidency compromise text	Drafting Suggestions	Comments
third parties, by obliging Member States to		
define and publish a non-discriminatory, clear		
framework that determines the appropriate		
regulatory regime applicable to storage		
facilities. That obligation should not require a		
new decision on access regimes but should		
improve the transparency regarding the access		
regime to storage. Confidentiality requirements		
for commercially sensitive information are		
particularly important where data of a strategic		
nature are concerned or where there is only a		
single user of a storage facility.		
<b>♦</b> 2009/73/EC recital 25 (adapted)		
(95) Non-discriminatory access to the		
distribution network determines downstream		
access to customers at retail level. The scope for		
discrimination as regards third party access and		
investment, however, is less significant at		

Important: In order to guarantee that your comments appear accurately, please do not modify the table format by adding/removing/adjusting/merging/splitting cells and rows. This would hinder the consolidation of your comments.

Presidency compromise text	Drafting Suggestions	Comments
distribution level than at transmission level		
where congestion and the influence of		
production interests are generally greater than at		- 1
distribution level. <del>Moreover, legal and</del>		
functional unbundling of distribution system		
operators was required, pursuant to Directive		
2003/55/EC, only from 1 July 2007 and its		
effects on the internal market in natural gas still		
need to be evaluated. The rules on legal and		
functional unbundling currently in place can		
lead to effective unbundling provided they are		
more clearly defined, properly implemented and		
elosely monitored. To ereate ⊠ lay down ⊠ a		
level playing field at retail level, the activities of		
distribution system operators should therefore		
be monitored so that they are prevented from		
taking advantage of their vertical integration as		
regards their competitive position on the market,		
in particular in relation to household and small		
non-household customers

owner of the system, it should be possible to		
exempt the distribution system operator from		
obligations which would constitute an		- "//
unnecessary administrative burden because of		
the particular nature of the relationship between		
the distribution system operator and the users of		
the system. Industrial, commercial or shared		
services sites such as train station buildings,		
airports, hospitals, large camping sites with		
integrated facilities or chemical industry sites		
ean ⊠ could ⊠ include closed distribution		
systems because of the specialised nature of		
their operations.		
□ new		
(100) With the integration of growing volumes		
of renewable and low-carbon gases in the		
natural gas system, the quality of gases		
transported and consumed in Europea will		

Important: In order to guarantee that your comments appear accurately, please do not modify the table format by adding/removing/adjusting/merging/splitting cells and rows. This would hinder the consolidation of your comments.

Presidency compromise text	Drafting Suggestions	Comments
change. To ensure the efficient operation of the		
natural gas system, transmission system		
operators should be responsible for gas quality		- "//
management in their facilities. Where the		
injection of renewable and low-carbon gases		
takes place at distribution level and where		
necessary to manage their impact on gas quality,		
regulatory authorities can task distribution		
system operators with ensuring the efficient gas		
quality management in their facilities. When		
undertaking gas quality management tasks,		
transmission and distribution system operators		
should comply with applicable gas quality		
standards.		
<b>Ψ</b> 2009/73/EC recital 29 (new)		
(29) Directive 2003/55/EC introduced a		
requirement for Member States to establish		
regulators with specific competences. However,		

Important: In order to guarantee that your comments appear accurately, please do not modify the table format by adding/removing/adjusting/merging/splitting cells and rows. This would hinder the consolidation of your comments.

Presidency compromise text	Drafting Suggestions	Comments
experience shows that the effectiveness of		
regulation is frequently hampered through a lack		
of independence of regulators from government,		- 1
and insufficient powers and discretion. For that		
reason, at its meeting on 8 and 9 March 2007,		
the European Council invited the Commission		
to develop legislative proposals providing for		
further harmonisation of the powers and		
strengthening of the independence of national		
energy regulators. It should be possible for those		
national regulatory authorities to cover both the		
electricity and the gas sectors.		
<b>♥</b> 2009/73/EC recital 30 (adapted)		
(101) Energy regulators need to be able to take		
decisions in relation to all relevant regulatory		
issues if the internal market in natural gas is to		
function properly, and to be fully independent		
from any other public or private interests. This

Presidency compromise text	Drafting Suggestions	Comments
achieving the decarbonisation objectives.		
Therefore it is necessary to draw up a network		
development plan based on a joint scenario		- 1
developed on a cross-sectoral basis. While still		
keeping separate sectorial plans, infrastructure		
operators should work towards a higher level of		
integration taking into account system needs		
beyond specific energy carriers.		
(112) Network development plans are an		
important element to identify infrastructure gaps		
and provide information on infrastructure that		
either needs to be built or that can be		
decommissioned and could be used for other		
purposes, such as hydrogen transport. This is		
true irrespective of the unbundling model		
chosen for the network operators.		
(113) Providing information on infrastructure		
that can be decommissioned within the network		

Important: In order to guarantee that your comments appear accurately, please do not modify the table format by adding/removing/adjusting/merging/splitting cells and rows. This would hinder the consolidation of your comments.

Presidency compromise text	Drafting Suggestions	Comments
development plan may mean either leaving the		
infrastructure unused, dismantling it or using it		
for other purposes, such as hydrogen transport.		- 1
The objective of this increased transparency on		
infrastructure takes into account that repurposed		
infrastructure is comparatively cheaper than		
newly built infrastructure and hence should		
enable a cost effective transition.		
(114) In Member States where a hydrogen		
network will be developed, reporting on the		
development of hydrogen infrastructure should		
ensure that the construction of a hydrogen		
system is based on a realistic and forward-		
looking demand projections including potential		
needs from the perspective of the electricity		
system. If Member States decide to allow for		
dedicated charges as a means of co-funding new		
hydrogen infrastructure, the report should		
support the regulatory authority in its

Presidency compromise text	Drafting Suggestions	Comments
assessment of these charges. The report should		
be submitted to the regulatory authority on a		
regular basis to be decided by the regulatory		- *//
authority. In light of the ramp-up character of		
the hydrogen market, a disproportionate and		
continuous sequencing of the reporting		
obligation should however be avoided.		
(115) Information contained in the network		
development plan should enable a forecast on		
the impacts on tariffs based on planning and		
decommissioning affecting the regulated asset		
base as mentioned in Article 51 of this		
Directive.		
(116) Instead of providing a national network		
development plan on individual Member State		
level, Member States should be allowed to		
choose to draw up a network development plan		
on regional level including more than one		

Important: In order to guarantee that your comments appear accurately, please do not modify the table format by adding/removing/adjusting/merging/splitting cells and rows. This would hinder the consolidation of your comments.

(142) This Directive respects the fundamental		
rights, and observes the principles, recognised in		
particular by the Charter of Fundamental Rights		
of the European Union ⇒ Accordingly, this		
Directive should be interpreted and applied in		
accordance with those rights and principles, in		
particular the right to the protection of personal		
data guaranteed by Article 8 of the Charter. It is		
essential that any processing of personal data		
under this Directive comply with Regulation

(EU) 2016/679 of the European Parliament and		
of the Council <sup>24</sup> . ←		
		- //
□ new		7
(143) In order to provide the minimum degree		
of harmonisation required to achieve the aim of		
this Directive, the power to adopt acts in		
accordance with Article 290 TFEU should be		
delegated to the Commission in respect of non-		
essential elements of certain specific areas		
which are fundamental for achieving the		
objectives of this Directive. It is of particular		
importance that the Commission carries out		
appropriate consultations during its preparatory		
work, including at expert level, and that those		
consultations be conducted in accordance with		
the principles laid down in the Interinstitutional		

OJ L 119, 4.5.2016, p. 1.

Important: In order to guarantee that your comments appear accurately, please do not modify the table format by adding/removing/adjusting/merging/splitting cells and rows. This would hinder the consolidation of your comments.

Presidency compromise text	Drafting Suggestions	Comments
Agreement of 13 April 2016 on Better Law-		
Making <sup>25</sup> . In particular, to ensure equal		
participation in the preparation of delegated		- 1
acts, the European Parliament and the Council		
receive all documents at the same time as		
Member States' experts, and their experts		
systematically have access to meetings of		
Commission expert groups dealing with the		
preparation of the delegated acts.		
(144) In order to ensure uniform conditions for		
the implementation of this Directive,		
implementing powers should be conferred on		
the Commission to determine interoperability		
requirements and non-discriminatory and		
transparent procedures for access to data. Those		
powers should be exercised in accordance with		
Regulation (EU) No 182/2011.		

<sup>25</sup> 

Important: In order to guarantee that your comments appear accurately, please do not modify the table format by adding/removing/adjusting/merging/splitting cells and rows. This would hinder the consolidation of your comments.

(145) The obligation to transpose this		
Directive into national law should be confined		- //
to those provisions which represent a		
substantive amendment as compared to the		
earlier Directive. The obligation to transpose the		
provisions which are unchanged arises under the		
earlier Directive.		
(146) In order to ensure a smooth and effective		
implementation of the provisions laid down in		
this Directive, the Commission supports		
Member States through the Technical Support		
Instrument <sup>26</sup> providing tailor-made technical		
expertise to design and implement reforms,		
including those promoting a competitive		
internal market in natural gas and in hydrogen,		
enabling the integration of renewables and low		

Regulation (EU) 2021/240 of the European Parliament and of the Council of 10 February 2021 establishing a Technical Support Instrument (OJ L 57, 18.2.2021, p.1).

granting of authorisations for transmission,		
distribution, supply and storage of natural gas		
⇒ gases using the natural gas system ⇔ and the		- "//
operation of systems.		
2. The rules established by this Directive		
for natural gas, including LNG, shall also apply		
in a non-discriminatory way to biogas and gas		
from biomass or other types of gas in so far as		
such gases can technically and safely be injected		
into, and transported through, the natural gas		
<del>system.</del>		
↓ new		
2. This Directive establishes rules for the		
transport, supply and storage of natural gas and		
the transition of the natural gas system to a		

Important: In order to guarantee that your comments appear accurately, please do not modify the table format by adding/removing/adjusting/merging/splitting cells and rows. This would hinder the consolidation of your comments.

Presidency compromise text	Drafting Suggestions	Comments
system based on renewable and low-carbon		
gases.		
3. This Directive establishes common rules		
for the transport, supply and storage of		
hydrogen using the hydrogen system. It lays		
down the rules relating to the organisation and		
functioning of this sector, access to the market,		
the criteria and procedures applicable to the		
granting of authorisations for networks, supply		
and storage of hydrogen and the operation of		
systems.		
4. This Directive establishes rules for the		
progressive establishment of a Union-wide		
interconnected hydrogen system contributing to		
the reduction of net greenhouse gas emissions,		
including within-of difficult to decarbonise		
sectors and thereby supporting to the		
decarbonisation of the EU energy system.

<b>◆</b> 2009/73/EC		
Article 2		
D. C		
Definitions		
For the purposes of this Directive, the following		
definitions apply:		
↓ new		
(1) 'natural gas' means all gases that		
primarily consist of methane, including biogas  and gas from biomass, in particular		
biomethane, or other types of gas, that can		
technically and safely be injected into, and		
transported through, the natural gas system;		

Important: In order to guarantee that your comments appear accurately, please do not modify the table format by adding/removing/adjusting/merging/splitting cells and rows. This would hinder the consolidation of your comments.

Presidency compromise text	Drafting Suggestions	Comments
(2) 'renewable gas' means biogas as defined		
in Article 2, point (28) of Directive (EU)		
2018/2001, including biomethane, and		- "//
renewable gaseous fuels part of fuels of non-		
biological origins ('RFNBOs') as defined in		
Article 2, point (36) of that Directive;		
(3) 'gases' mean natural gas and hydrogen;		
(4) 'natural gas system' means a system of		
infrastructures, including pipelines, LNG		
terminals and storage facilities, which transports		
gases, that primarily consist of methane and		
include biogas and gas from biomass, in		
particular biomethane, or other types of gas that		
can technically and safely be injected into, and		
transported through the natural gas pipeline		
system.		

Important: In order to guarantee that your comments appear accurately, please do not modify the table format by adding/removing/adjusting/merging/splitting cells and rows. This would hinder the consolidation of your comments.

Presidency compromise text	Drafting Suggestions	Comments
(5) 'hydrogen system' means a system of		
infrastructure, including hydrogen networks,		
hydrogen storage, and hydrogen terminals,		- "//
which contains hydrogen of a high grade of		
purity in line with applicable hydrogen quality		
standards for the hydrogen system,		
(6) 'hydrogen storage facility' means a		
facility used for the stocking of hydrogen of a		
high grade of purity:		
(a) including the part of an hydrogen		
terminal used for storage, but excluding the		
portion used for production operations, and		
facilities reserved exclusively for hydrogen		
network operators in carrying out their		
functions;		

Important: In order to guarantee that your comments appear accurately, please do not modify the table format by adding/removing/adjusting/merging/splitting cells and rows. This would hinder the consolidation of your comments.

Presidency compromise text	Drafting Suggestions	Comments
(b) including large, in particular		
underground, hydrogen storage but excluding		
smaller, easily replicable smaller hydrogen		- 1
storage installations;		
(6a) 'hydrogen storage operator' means a		
natural or legal person who carries out the		
function of storage of hydrogen and is		
responsible for operating a hydrogen storage		
facility;		
(7) 'hydrogen linepack' means the storage		
of hydrogen of a high grade of purity by		
compression in hydrogen networks, excluding		
facilities reserved for hydrogen network		
operators carrying out their functions;		
(8) 'hydrogen terminal' means an		
installation used for the transformation of liquid		

Important: In order to guarantee that your comments appear accurately, please do not modify the table format by adding/removing/adjusting/merging/splitting cells and rows. This would hinder the consolidation of your comments.

hydrogen, including hydrogen compounds		
such as or liquid ammonia and liquid organic		
hydrogen carriers, into gaseous hydrogen for		- 1
injection into the hydrogen network or the		
liquefaction of gaseous hydrogen, including		
ancillary services and temporary storage		
necessary for the transformation process and		
subsequent injection into the hydrogen network,		
but not any part of the hydrogen terminal used		
for storage;		
(9) 'hydrogen quality' means hydrogen		
purity and contaminants in line with applicable		
hydrogen quality standards for the hydrogen		
system;		
(10) 'low-carbon hydrogen' means hydrogen		
the energy content of which is derived from		
non-renewable sources, which meets a

Article 8		
Certification of renewable and low carbon		
fuels		
1. Renewable gases shall <i>comply with the</i>		
sustainability and greenhouse gas saving		
criteria set out in Article 29 of Directive (EU)		
2018/2001. Compliance with the sustainability		
and greenhouse gas saving criteria shall be		
demonstrated in accordance with Article 30 of		
that Directive be certified in accordance with		
Article 29 and 30 of Directive (EU) 2018/2001.		
2. In order to ensure that the greenhouse		
gas emissions savings from the use of low		
carbon fuels and low carbon hydrogen are at		
least 70% in accordance with the definitions in		
Article 2, points (10) and (12) under Article 2,		

Important: In order to guarantee that your comments appear accurately, please do not modify the table format by adding/removing/adjusting/merging/splitting cells and rows. This would hinder the consolidation of your comments.

Presidency compromise text	Drafting Suggestions	Comments
Member States shall require economic operators		
to show that this threshold and the requirements		
established in the methodology referred to in		- 1
paragraph 5 of this Article have been complied		
with. For those purposes, they shall require		
economic operators to use a mass balance		
system in line with Article 30 (1) and (2) of		
Directive (EU) 2018/2001.		
3. Member States shall ensure that		
economic operators submit reliable information		
regarding the compliance with the 70%		
greenhouse gas emissions savings threshold set		
in paragraph 2 and with the greenhouse gas		
emissions saving methodology referred to in		
paragraph 5, and that economic operators make		
available to the relevant Member State, upon		
request, the data that were used to develop the		
information. Member States shall require		
economic operators to put in place an adequate		

Important: In order to guarantee that your comments appear accurately, please do not modify the table format by adding/removing/adjusting/merging/splitting cells and rows. This would hinder the consolidation of your comments.

Presidency compromise text	Drafting Suggestions	Comments
standard of independent auditing of the		
information submitted, and to provide evidence		
that this has been done. The auditing shall verify		- *//
that the systems used by economic operators are		
accurate, reliable and protected against fraud.		
4. The obligations laid down in paragraph 2		
shall apply regardless of whether low carbon		
fuels are produced within the Union or are		
imported. Information about the geographic		
origin and feedstock type of low carbon fuels or		
low carbon hydrogen per fuel supplier shall be		
made available to consumers on the websites of		
operators, suppliers or the relevant competent		
authorities and shall be updated on an annual		
basis.		
5. Within 12 months of entry into force of		
this Directive By 31 December 2024, the		
Commission shall adopt delegated acts in		

Important: In order to guarantee that your comments appear accurately, please do not modify the table format by adding/removing/adjusting/merging/splitting cells and rows. This would hinder the consolidation of your comments.

Presidency compromise text	Drafting Suggestions	Comments
accordance with Article 83 to supplement this		
Directive by specifying the methodology for		
assessing greenhouse gas emissions savings		- "//
from low carbon fuels. The methodology shall		
ensure that credit for avoided emissions is not		
given for carbon dioxide the capture of which		
has already received an emission credit under		
other provisions of law and shall be consistent		
with the methodology for assessing greenhouse		
gas emissions savings from renewable liquid		
and gaseous transport fuels of non-biological		
origin and from recycled carbon fuels.		
6. The Commission may decide that		
voluntary national or international schemes		
setting standards for the production of low		
carbon fuels or low carbon hydrogen provide		
accurate data on greenhouse gas emission		
savings for the purposes of this Article and		
demonstrate compliance with the methodology		

Important: In order to guarantee that your comments appear accurately, please do not modify the table format by adding/removing/adjusting/merging/splitting cells and rows. This would hinder the consolidation of your comments.

Presidency compromise text	Drafting Suggestions	Comments
referred to in paragraph 5 of this Article. <i>The</i>		
Commission shall adopt decisions under		
<del>paragraph 4 of this Article</del> only if the scheme		- *//
in question meets adequate standards of		
reliability, transparency and independent		
auditing in line with the requirements set out		
in Regulation (EU) 2022/996 for the		
certification of renewable fuels.		
7. Where an economic operator provides		
evidence or data obtained in accordance with a		
scheme that has been the subject of a		
recognition pursuant to paragraph 6, a Member		
State shall not require the economic operator to		
provide further evidence of compliance with the		
criteria for which the scheme has been		
recognised by the Commission.		
8. Competent authorities of the Member		
States shall supervise the operation of		

Important: In order to guarantee that your comments appear accurately, please do not modify the table format by adding/removing/adjusting/merging/splitting cells and rows. This would hinder the consolidation of your comments.

Presidency compromise text	<b>Drafting Suggestions</b>	Comments
certification bodies that are conducting		
independent auditing under a voluntary scheme.		
Certification bodies shall submit, upon the		- *//
request of competent authorities, all relevant		
information necessary to supervise the auditing,		
including the exact date, time and location of		
audits. Where Member States find issues of non-		
conformity, they shall inform the voluntary		
scheme without delay.		
9. At the request of a Member State, which		
may be based on the request of an economic		
operator, the Commission shall, on the basis of		
all available evidence, examine whether the		
greenhouse gas emissions saving criteria laid		
down in this Article, the methodology		
developed in line with paragraph 5 of this		
Article, and the greenhouse gas emissions		
savings thresholds set in Article 2, points (109),		
(11) and (12 $\theta$ ) have been met. Within six		

Important: In order to guarantee that your comments appear accurately, please do not modify the table format by adding/removing/adjusting/merging/splitting cells and rows. This would hinder the consolidation of your comments.

Presidency compromise text	Drafting Suggestions	Comments
months of receipt of such a request, the		
Commission shall decide whether the Member		
State concerned may:		- //
(a) accept the evidence already provided to		
show compliance with the greenhouse gas		
emissions saving criteria for low carbon fuels;		
or		
(b) by way of derogation from paragraph 7,		
require suppliers of the source of low carbon		
fuels to provide further evidence of their		
compliance with the greenhouse gas emissions		
saving criteria and the 70% greenhouse gas		
emissions savings threshold.		
10. Member States shall also require the		
relevant economic operators to enter into the		
Union database information on the transactions		

Important: In order to guarantee that your comments appear accurately, please do not modify the table format by adding/removing/adjusting/merging/splitting cells and rows. This would hinder the consolidation of your comments.

Smart metering systems in the natural gas		
system		
1. In order to promote energy efficiency		
and to empower final customers, Member States		
or, where a Member State has so provided, the		
regulatory authority shall strongly recommend		
that natural gas undertakings optimise the use of		
natural gas, inter alia, by providing energy		
management services, and introducing smart		
metering systems that are interoperable, in		
particular with consumer energy management		
systems and with smart grids, in accordance		
with the applicable Union data protection rules.		
2. Member States shall ensure the		
deployment in their territories of smart metering		
systems. Such deployment may be subject to a		
cost-benefit assessment which shall be		
undertaken in accordance with the principles		

Important: In order to guarantee that your comments appear accurately, please do not modify the table format by adding/removing/adjusting/merging/splitting cells and rows. This would hinder the consolidation of your comments.

laid down in Annex II. In their cost-benefit		
assessment, Member States may make		
separate assessments for different categories		- 1
of customers and customer groups, such as		
households, small and medium-sized		
enterprises and industry.		
3. Member States that proceed with the		
deployment of smart metering systems shall		
adopt and publish the minimum functional and		
technical requirements for the smart metering		
systems to be deployed in their territories, in		
accordance with Article 18 and Annex II.		
Member States shall ensure the interoperability		
of those smart metering systems, as well as their		
ability to provide output for consumer energy		
management systems. In that respect, Member		
States shall have due regard to the use of the		
relevant available standards, including those		
enabling interoperability, to best practices and

the Member State or the designated competent		
authority may decide to grant a derogation.		
2. The Member State, or the designated		
competent authority, shall notify the		
Commission without delay of its decision to		
grant a derogation, together with all the relevant		
information with respect to the derogation. That		
information may be submitted to the		
Commission in an aggregated form, enabling		
the Commission to reach a well-founded		

Important: In order to guarantee that your comments appear accurately, please do not modify the table format by adding/removing/adjusting/merging/splitting cells and rows. This would hinder the consolidation of your comments.

Presidency compromise text	Drafting Suggestions	Comments
decision. Within eight weeks of receipt of that		
notification, the Commission may request that		
the Member State or the designated competent		- "//
authority concerned amend or withdraw the		
decision to grant a derogation.		
If the Member State or the designated		
competent authority concerned does not comply		
with that request within a period of four weeks,		
a final decision shall be taken expeditiously in		
accordance with the advisory procedure referred		
to in Article 51(2).		
The Commission shall preserve the		
confidentiality of commercially sensitive		
information.		
3. When deciding on the derogations		
referred to in paragraph 1, the Member State, or		

Important: In order to guarantee that your comments appear accurately, please do not modify the table format by adding/removing/adjusting/merging/splitting cells and rows. This would hinder the consolidation of your comments.

Presidency compromise text	Drafting Suggestions	Comments
the designated competent authority, and the		
Commission shall take into account, in		
particular, the following criteria:		
(a) the objective of achieving a competitive		
<del>gas market;</del>		
(b) the need to fulfil public-service		
obligations and to ensure security of supply;		
(e) the position of the natural gas		
undertaking in the gas market and the actual		
state of competition in that market;		
(d) the seriousness of the economic and		
financial difficulties encountered by natural gas		
undertakings and transmission undertakings or		
eligible eustomers;		

Important: In order to guarantee that your comments appear accurately, please do not modify the table format by adding/removing/adjusting/merging/splitting cells and rows. This would hinder the consolidation of your comments.

Presidency compromise text	Drafting Suggestions	Comments
(e) the dates of signature and terms of the		
contract or contracts in question, including the		
extent to which they allow for market changes;		- //
(f) the efforts made to find a solution to the		
<del>problem;</del>		
(g) the extent to which, when accepting the		
take-or-pay commitments in question, the		
undertaking could reasonably have foreseen,		
having regard to the provisions of this Directive,		
that serious difficulties were likely to arise;		
(h) the level of connection of the system		
with other systems and the degree of		
interoperability of those systems; and		
(i) the effects the granting of a derogation		
would have on the correct application of this		

Important: In order to guarantee that your comments appear accurately, please do not modify the table format by adding/removing/adjusting/merging/splitting cells and rows. This would hinder the consolidation of your comments.

Presidency compromise text	Drafting Suggestions	Comments
Directive as regards the smooth functioning of		
the internal market in natural gas.		
A decision on a request for a derogation		
concerning take-or-pay contracts concluded		
before 4 August 2003 should not lead to a		
situation in which it is impossible to find		
economically viable alternative outlets. Serious		
difficulties shall in any case be deemed not to		
exist when the sales of natural gas do not fall		
below the level of minimum offtake guarantees		
contained in gas-purchase take-or-pay contracts		
or in so far as the relevant gas-purchase take-or-		
pay contract can be adapted or the natural gas		
undertaking is able to find alternative outlets.		
4. Natural gas undertakings which have not		
been granted a derogation as referred to in		
paragraph 1 of this Article shall not refuse, or		
shall no longer refuse, access to the system		

Important: In order to guarantee that your comments appear accurately, please do not modify the table format by adding/removing/adjusting/merging/splitting cells and rows. This would hinder the consolidation of your comments.

Presidency compromise text	Drafting Suggestions	Comments
because of take-or-pay commitments accepted		
in a gas purchase contract. Member States shall		
ensure that the relevant provisions of Articles 32		- "//
to 44 are complied with.		
5. Any derogation granted under the above		
provisions shall be duly substantiated. The		
Commission shall publish the decision in the		
Official Journal of the European Union.		
6. The Commission shall, within 4 August		
2008, submit a review report on the experience		
gained from the application of this Article, so as		
to allow the European Parliament and the		
Council to consider, in due course, the need to		
adjust it.

Presidency compromise text  Drafting Suggestions  1. The power to adopt delegated acts is conferred on the Commission subject to the conditions laid down in this Article.	Comments
conferred on the Commission subject to the	
conditions laid down in this Article.	
2. The power to adopt delegated acts	
referred to in Articles 8, 56, 66, 74, 75 and 76	
shall be conferred on the Commission for an	
indeterminate period of time from [date of entry	
into force].	
3. The delegation of power referred to in	
Articles 8, 56, 66, 74, 75 and 76 may be revoked	
at any time by the European Parliament or by	
the Council. A decision to revoke shall put an	
end to the delegation of power specified in that	
decision. It shall take effect on the day	
following the publication of the decision in the	
Official Journal of the European Union or at a	
later date specified therein. It shall not affect the	
validity of any delegated act already in force.	

Important: In order to guarantee that your comments appear accurately, please do not modify the table format by adding/removing/adjusting/merging/splitting cells and rows. This would hinder the consolidation of your comments.

4. Before adopting a delegated act, the		
Commission shall consult experts designated by		- '/
each Member State in accordance with the		
principles laid down in the Interinstitutional		
Agreement of 13 April 2016 on Better Law-		
Making.		
5. As soon as it adopts a delegated act, the		
1 0		
Commission shall notify it simultaneously to the		
European Parliament and to the Council.		
6. A delegated act adopted pursuant to		
Articles 8, 56, 66, 74, 75 and 76 shall enter into		
force only if no objection has been expressed		
either by the European Parliament or by the		
Council within a period of two months of		
notification of that act to the European		
Parliament and the Council or if, before the

3. Where reference is made to this		
paragraph, Article 5 of Regulation (EU) No		
182/2011 shall apply.		
Article 85		
Review and reporting		
1. By 31 December 2030 the Commission		
shall review this Directive and shall submit a		
report to the European Parliament and to the		
Council. The review shall in particular examine		
the application of Article 8, and related		
definitions in Article 2, to assess whether		
facilities that begin operation from 1 January		
2031 should demonstrate higher greenhouse gas		
emission savings from the use of low carbon		
emission savings from the use of low carbon

fuels and low carbon hydrogen to receive		
certification pursuant to that Article.		
2. By 31 December 2031 and every two		V
years thereafter the Commission shall assess		
implementation of rules on independent		
transmission operators for natural gas on		
designated integrated hydrogen network		
operators, taking into account hydrogen		
market functioning, competition, liquidity and		
hydrogen infrastructure development, and		
submit a report to the European Parliament		
and to the Council. The report shall set out the		
findings of the Commission's assessment.		
Where appropriate, the Commission shall		
propose a review of the provisions set out in		
this paragraph.
