WORKING DOCUMENT

From:	Presidency
To:	Working Party on Technical Harmonisation (Dangerous Substances - Fertilisers)
N° Cion doc.:	ST 6896/23 + ADD1-ADD4 - COM (2023)98 final
Subject:	Proposal for a Regulation amending Regulation (EU) 2019/1009 as regards digital labelling of EU fertilising products - 4-column table

Delegations will find attached the text of the four-column document for the above-mentioned proposal after the third technical meeting which took place in 11 January 2024.

**Proposal for a REGULATION OF THE EUROPEAN PARLIAMENT AND OF THE COUNCIL
amending Regulation (EU) 2019/1009 as regards the digital labelling of EU fertilising products

10	(1) Annex III to Regulation (EU) 2019/1009 lays down the labelling requirements applicable to EU fertilising products. The information referred to in Annex III is to be provided on a label in a physical form attached to that packaging or, for the labelling elements that cannot be provided on the label due to the packaging being too small, in a separate leaflet accompanying that packaging ('physical label'). Products without a packaging are accompanied by a leaflet. The labelling requirements concern various parameters linked to the agronomic efficiency of EU fertilising products (e.g., content of nutrients in a fertiliser) and the content of such products (e.g., quantity). The labelling requirements also cover information needed for the protection of human health and the environment when using EU fertilising products (e.g., information needed for the correct application of Council Directive 91/676/EEC¹) and information needed for the correct handling and use of such products after purchase (e.g., information on storage conditions). ¹. Council Directive 91/676/EEC of 12 December 1991 concerning the protection of waters against pollution caused by nitrates	(1) Annex III to Regulation (EU) 2019/1009 lays down the labelling requirements applicable to EU fertilising products. The information referred to in Annex III is to be provided on a label in a physical form attached to that packaging or, for the labelling elements that cannot be provided on the label due to the packaging being too small, in a separate leaflet accompanying that packaging ('physical label'). Products without a packaging are accompanied by a leaflet. The labelling requirements concern various parameters linked to the agronomic efficiency of EU fertilising products (e.g., content of nutrients in a fertiliser) and the content of such products (e.g., quantity). The labelling requirements also cover information needed for the protection of human health and the environment when using EU fertilising products (e.g., information needed for the correct application of Council Directive 91/676/EEC¹) and information needed for the correct handling and use of such products after purchase (e.g., information on storage conditions). ¹. Council Directive 91/676/EEC of 12 December 1991 concerning the protection of waters against pollution caused by nitrates	(1) Annex III to Regulation (EU) 2019/1009 lays down the labelling requirements applicable to EU fertilising products. The information referred to in Annex III is to be provided on a label in a physical form attached to that packaging or, for the labelling elements that cannot be provided on the label due to the packaging being too small, in a separate leaflet accompanying that packaging ('physical label').
