PRESIDENCY FLASH NOTE

1st Working Party on Company Law

Monday, 23rd March 2026, 09:30 a.m.

Dearest Colleagues,

We are very pleased to invite you to the 1st meeting of the Working Party on Company Law under the Cyprus Presidency, which will be held on Monday 23rd 2026, starting at 09:30 a.m.

During this meeting, we will present our Presidency's and our WP's priorities.

The floor will be given to the Commission which will present to us the legislative proposal on the 28th Regime/ EU Inc and its Impact Assessment. You will then have the opportunity to share your preliminary views and comments.

Our flash note will be an opportunity for you to learn about Cyprus; we will begin by deconstructing the artistic form below, step by step, as to not overwhelm you.

We look forward to seeing you and commencing our work together.

With warm regards,

[redacted]

Your CLWP Team

CYPRUS PRESIDENCY OF THE COUNCIL OF THE EUROPEAN UNION

Rose water is the distillate from the whole flower of the Damascene Rose, more commonly known as the Damask Rose. Rose water production has been carried out in Cyprus since the old days in the villages of Troodos, mainly in Agros village. It was sold during fairs and usually exchanged for other products that could not be produced in the area.
The roses are collected early morning and their petals are placed directly into a distiller. The derived steam passes through a cold tube, is liquified and collected. The rose water is stored away in dark-colored glass containers and kept away from sunlight. Rose water is widely used in Cypriot cuisine, mainly in the making of sweets, such as baklavas, kateifi or rice pudding.

Did you know that...

Cyprus is known as Aphrodite' s birthplace?

"Petra tou Romiou" is an interesting geological formation of huge rocks along one of the most beautiful coastlines of the island, located on the southwest coast of Pafos district.
