Working Party on Telecommunications and Information Society

Subject: Gigabit Infrastructure Act - FR comments macro table (doc. 6845/23)

Delegations will find in annex the FR comments macro table on Gigabit Infrastructure Act. (doc. 6845/23).

Commission proposal	Drafting Suggestions	Comments
2023/0046 (COD)		
Proposal for a REGULATION OF THE EUROPEAN PARLIAMENT AND OF THE COUNCIL on measures to reduce the cost of deploying gigabit electronic communications networks and repealing Directive 2014/61/EU (Gigabit Infrastructure Act)		Les autorités françaises souhaitent, à titre liminaire, rappeler qu'elles regrettent le choix opéré par la Commission de recourir au règlement pour atteindre les objectifs d'accélération des déploiements des réseaux à très haute capacité et de réduction des coûts. Une refonte de la directive par le biais d'une autre directive, tout en renforçant l'harmonisation entre les Etats membres, permettrait d'atteindre ces objectifs. Il faut rappeler que l'approche retenue pour la directive 2014/61/UE est celle de l'harmonisation minimale.
THE EUROPEAN PARLIAMENT AND THE COUNCIL OF THE EUROPEAN UNION,		

Commission proposal	Drafting Suggestions	Comments
Having regard to the Treaty on the Functioning of the European Union, and in particular Article 114 thereof,		
Having regard to the proposal from the European Commission,		
After transmission of the draft legislative act to the national parliaments,		
Having regard to the opinion of the European Economic and Social Committee ¹ ,		
Having regard to the opinion of the Committee of the Regions ² ,		
Acting in accordance with the ordinary legislative procedure,		

¹ OJ C,, p.

² OJ C,, p.

Commission proposal	Drafting Suggestions	Comments
Whereas:		
(1) The digital economy has been changing the internal market profoundly over the last decade. The Union's vision is a digital economy that delivers sustainable economic and social benefits based on excellent and secure connectivity for everybody and everywhere in Europe. A high-quality digital infrastructure based on very high capacity networks underpins almost all sectors of a modern and innovative economy. It is of strategic importance to social and territorial cohesion and overall for the Union's competitiveness and digital leadership. Therefore, people as well as the private and public sectors should have the opportunity to be part of the digital economy.		

Commission proposal	Drafting Suggestions	Comments
<p>(2) The rapid evolution of technologies, the exponential growth in broadband traffic and the increasing demand for advanced very high-capacity connectivity have further accelerated during the COVID-19 pandemic. As a result, the targets laid down in the Digital Agenda in 2010³ have mostly been met, but they have also become obsolete. The share of households having access to 30 Mbps internet speeds has increased from 58.1% in 2013 to 90% in 2022. Availability of only 30 Mbps is no longer future-proof and not aligned with the new objectives set in Directive (EU) 2018/1972 of the European Parliament and of the Council⁴ for ensuring connectivity and widespread availability of very high capacity networks.</p> <p>Therefore, in the Decision (EU) 2022/2481 of</p>		

³ Communication from the Commission to the European Parliament, the Council, the European Economic and Social Committee and the Committee of the Regions, 19.05.2010, COM(2010)245.

⁴ Directive (EU) 2018/1972 of the European Parliament and of the Council of 11 December 2018 establishing the European Electronic Communications Code (OJ L 321, 17.12.2018, p. 36).

Commission proposal	Drafting Suggestions	Comments
the European Parliament and Council ⁵ , the EU set updated targets for 2030 that better correspond to the expected connectivity needs of the future where all European households should be covered by a gigabit network, with all populated areas covered by 5G.		
(3) To achieve those targets, there is a need for policies to speed up and lower the costs of the deployment of very high-capacity fixed and wireless networks across the Union, including proper planning, coordination and the reduction of administrative burdens.		Il conviendrait de préciser que la réduction de la charge administrative concerne surtout les bénéficiaires des dispositions du présent règlement à savoir les opérateurs, car sa mise en oeuvre entraînera nécessairement une augmentation de la charge administrative pour ceux (opérateurs de réseau, organismes du secteur public) soumis aux obligations qu'il prévoit.

⁵ Decision (EU) 2022/2481 of the European Parliament and of the Council of 14 December 2022 establishing the Digital Decade Policy Programme 2030 (OJ L 323, 19.12.2022, p. 4).

Commission proposal	Drafting Suggestions	Comments
(4) Directive 2014/61/EU, which was adopted in response to the need for policies to lower the costs of broadband deployment, included measures on infrastructure sharing, civil works coordination and the reduction of administrative burdens. To further facilitate the roll-out of very high capacity networks, including fibre and 5G, the European Council, called in its Conclusions on Shaping Europe's Digital Future of 9 June 2020, called for a package of additional measures to support current and emerging network deployment needs, including by reviewing Directive 2014/61/EU.		
(5) The roll-out of very high capacity networks (as defined in Directive (EU) 2018/1972) across the Union requires substantial investment, a significant proportion of which is the cost of civil engineering works.		

Commission proposal	Drafting Suggestions	Comments
<p>Sharing physical infrastructure would limit the need for costly civil engineering works and make advanced broadband roll-out more effective.</p>		
<p>(6) A major part of the costs of deploying very high capacity networks can be attributed to inefficiencies in the roll-out process related to:</p> <p>(i) the use of existing passive infrastructure (such as ducts, conduits, manholes, cabinets, poles, masts, antenna installations, towers and other supporting constructions); (ii) bottlenecks related to the coordination of civil works; (iii) burdensome administrative procedures to grant permits; and (iv) bottlenecks in in-building deployment of networks, which lead to high financial barriers, particularly in rural areas.</p>		

Commission proposal	Drafting Suggestions	Comments
(7) Directive 2014/61/EU of the European Parliament and of the Council ⁶ , which was adopted in response to the need to lower the costs of broadband deployment, included measures on infrastructure sharing, civil works coordination and the reduction of administrative burdens. To further facilitate the roll-out of very high capacity networks, including fibre and 5G, the European Council, in its Conclusions on Shaping Europe's Digital Future of 9 June 2020, called for a package of additional measures to support current and emerging network deployment needs, including by reviewing Directive 2014/61/EU.	(7) Directive 2014/61/EU of the European Parliament and of the Council ⁷ , which was adopted in response to the need to lower the costs of broadband deployment, included measures on infrastructure sharing, civil works coordination and the reduction of administrative burdens. To further facilitate the roll-out of very high capacity networks, including fibre and 5G, the European Council, in its Conclusions on Shaping Europe's Digital Future of 9 June 2020, called for a package of additional measures to support current and emerging network deployment needs, including by reviewing Directive 2014/61/EU.	Le considérant 7 a le même objet que le considérant 4 et sa rédaction est quasiment identique au considérant 4. En l'absence d'apport, il ne paraît pas nécessaire.
(8) The measures set out in Directive 2014/61/EU contributed to less costly		

⁶ Directive 2014/61/EU of the European Parliament and of the Council of 15 May 2014 on measures to reduce the cost of deploying high-speed electronic communications networks (OJ L 155, 23.5.2014, p. 1).

⁷ Directive 2014/61/EU of the European Parliament and of the Council of 15 May 2014 on measures to reduce the cost of deploying high-speed electronic communications networks (OJ L 155, 23.5.2014, p. 1).

Commission proposal	Drafting Suggestions	Comments
deployments of high-speed electronic communications networks. However, these measures should be strengthened to further reduce costs and speed up network deployment.		
(9) Measures aiming to make using public and private existing infrastructures more efficient and reduce costs and obstacles in carrying out new civil engineering works should contribute substantially to ensuring a fast and extensive deployment of very high capacity networks. These measures should maintain effective competition without harming the safety, security and smooth operation of the existing infrastructure.	9) Measures aiming to make using public and private existing infrastructures more efficient and reduce costs and obstacles in carrying out new civil engineering works should contribute substantially to ensuring a fast and extensive deployment of very high capacity networks. These measures should maintain effective competition without harming the safety, security, public health, environnement and smooth operation of the existing infrastructure.	Les considérations sanitaires et environnementales sont également à prendre en compte, au même titre que la sécurité, la sûreté, dans l'équilibre à rechercher.
(10) Some Member States have adopted measures to reduce the costs of broadband roll-out, including by going beyond the provisions of		

Commission proposal	Drafting Suggestions	Comments
<p>Directive 2014/61/EU. However, those measures are still very different across Member States and have led to different results across the Union. Scaling up some of those measures across the Union and taking new reinforced measures could significantly contribute to the better functioning of the digital single market. Moreover, differences in regulatory requirements and inconsistent implementation of Union rules sometimes prevent cooperation across utility companies. The differences may also raise barriers to entry for new undertakings providing or authorised to provide public electronics communications networks or associated facilities, as defined in Directive (EU) 2018/1972 ('operators'). These differences may also close off new business opportunities, hindering the development of an internal market for the use and deployment of physical infrastructures for very high capacity networks.</p>		

Commission proposal	Drafting Suggestions	Comments
<p>Moreover, the measures notified in the national roadmaps and implementation reports adopted by Member States under Commission Recommendation (EU) 2020/1307⁸ neither cover all the areas of Directive 2014/61/EU nor address all issues in a consistent and complete manner. This is despite how essential it is to take action across the whole roll-out process and across sectors to achieve a coherent and significant impact.</p>		
<p>(11) This Regulation aims to strengthen and harmonise rights and obligations applicable across the Union to accelerate the roll-out of very high capacity networks and cross-sector coordination. Due to the persistent fragmentation of electronic communications markets in individual national markets,</p>		

⁸ Commission Recommendation (EU) 2020/1307 of 18 September 2020 on a common Union toolbox for reducing the cost of deploying very high capacity networks and ensuring timely and investment-friendly access to 5G radio spectrum, to foster connectivity in support of economic recovery from the COVID-19 crisis in the Union (OJ L 305, 21.9.2020, p. 33).

Commission proposal	Drafting Suggestions	Comments
<p>undertakings providing or authorised to provide electronic communications networks are unable to achieve economies of scale. This can have a strong downstream effect on cross-border trade and services provision, since many services can only be provided where an adequately performant network is in place across the Union. While ensuring an improved level playing field, this Regulation does not prevent national measures in compliance with Union law that serve to promote the joint use of existing physical infrastructure or enable a more efficient deployment of new physical infrastructure by complementing the rights and obligations laid down in this Regulation. For example, Member States could extend provisions on civil works coordination also to privately funded projects or require that more information on physical infrastructure or planned civil works is provided to a single information point in electronic</p>		

Commission proposal	Drafting Suggestions	Comments
format, provided that they do not violate Union law including the provisions of this Regulation.		
(12) To ensure legal certainty, including regarding specific regulatory measures imposed under Directive (EU) 2018/1972, under Title II, Chapters II to IV and Directive 2002/77/EC ⁹ , the provisions of these directives should prevail over this Regulation.		
(13) It can be significantly more efficient for operators, in particular new entrants, to reuse existing physical infrastructure, including that of other utilities, to roll out very high capacity networks or associated facilities. This is the case, in particular, in areas where no suitable electronic communications network is available or where it may not be economically feasible to build new physical infrastructure. Moreover,		

⁹ Commission Directive 2002/77/EC of 16 September 2002 on competition in the markets for electronic communications networks and services ([OJ L 249, 17.9.2002, p. 21](#)).

Commission proposal	Drafting Suggestions	Comments
<p>synergies across sectors may significantly reduce the need for civil works relating to the deployment of very high capacity networks. This reuse can also reduce the social and environmental costs linked to these works, such as pollution, noise and traffic congestion.</p> <p>Therefore, this Regulation should apply not only to operators but also to owners or holders of rights to use extensive and ubiquitous physical infrastructure suitable to host electronic communications network elements, such as physical networks for the provision of electricity, gas, water and sewage and drainage systems, and heating and transport services. In the case of holders of rights, this does not change any property rights of third parties.</p>		
<p>(14) To improve the deployment of very high capacity networks in the internal market, this Regulation should lay down rights for</p>		

Commission proposal	Drafting Suggestions	Comments
<p>undertakings providing public electronic communications networks or associated facilities (including undertakings of a public nature) to access physical infrastructure regardless of its location under fair and reasonable terms consistent with the normal exercise of property rights. The obligation to give access to the physical infrastructure should be without prejudice to the rights of the owner of the land or of the building in which the infrastructure is located.</p>		
<p>(15) In particular, taking into account the fast development of providers of wireless physical infrastructure such as ‘tower companies’, and their increasingly significant role as providers of access to physical infrastructure suitable to install elements of wireless electronic communications networks, such as 5G, the definition of ‘network operator’ should be</p>		

Commission proposal	Drafting Suggestions	Comments
<p>extended beyond undertakings providing or authorised to provide electronic communications networks and operators of other types of networks, such as transport, gas or electricity, to include undertakings providing associated facilities, which thus become subject to all the obligations and benefits set out in the Regulation, except the provisions regarding in-building physical infrastructure and access.</p>		
<p>(16) In view of their low degree of differentiation, the physical facilities of a network can often host a wide range of electronic communications network elements at the same time without affecting the main service provided and with minimum adaptation costs. These elements include those capable of delivering broadband access services at speeds of at least 100 Mbps in line with the technological neutrality principle. Therefore,</p>		

Commission proposal	Drafting Suggestions	Comments
<p>physical infrastructure, that is intended to only host other elements of a network without becoming an active network element itself, such as dark fibre, can in principle be used to accommodate electronic communications cables, equipment or any other element of electronic communications networks, regardless of its current use or its ownership, security concerns or future business interests of the infrastructure's owner. The physical infrastructure of public electronic communications networks can in principle also be used to accommodate elements of other networks. Therefore, in appropriate cases, public electronic communications network operators may give access to their networks so that other networks can be deployed. Without prejudice to the pursuit of the specific general interest linked to the provision of the main service, synergies between network operators</p>		

Commission proposal	Drafting Suggestions	Comments
<p>should at the same time be encouraged to contribute to achieving the digital targets set out in Decision (EU) 2022/2481.</p>		
<p>(17) In the absence of a justified exception, physical infrastructure elements owned or controlled by public sector bodies, even when they are not part of a network, can also host electronic communications network elements and should be made accessible to facilitate installing network elements of very high capacity networks, in particular wireless networks. Examples of physical infrastructure elements are buildings, entries to buildings, and any other asset, including street furniture, such as light poles, street signs, traffic lights, billboards, bus and tramway stops and metro stations. It is for Member States to identify specific buildings owned or controlled by public sector bodies in their territories where access</p>	<p>17) In the absence of a justified exception, physical infrastructure elements owned or controlled by public sector bodies, even when they are not part of a network, can also host electronic communications network elements and should be made accessible to facilitate installing network elements of very high capacity networks, in particular wireless networks. planned civil works under transparent, proportionate and non-discriminatory conditions and without prejudice to the safeguards adopted to ensure network security and integrity, protection of confidentiality, as well as operating and business secrets.		
(28) Advanced transparency of planned civil works via single information points should be incentivised. This can be done by easily redirecting operators to such information whenever available. Transparency should also be enforced by making permit-granting applications subject to prior publication of information on planned civil works via a single information point.		
(29) The discretion that Member States retain to allocate the functions of the single information points to more than one competent		Les autorités françaises accueillent favorablement la possibilité laissée aux Etats membres de désigner plus d'un organe pour

Commission proposal	Drafting Suggestions	Comments
<p>body should not affect their ability to effectively fulfil those functions. Where more than one single information point is set up in a Member State, a single national digital entry point consisting of a common user interface should ensure seamless access to all single information points by electronic means. The single information point should be fully digitised and provide easy access to the relevant digital tools. This will enable network operators and public sector bodies exercise their rights and comply with the obligations set out in this Regulation. This includes fast access to the minimum information on existing physical infrastructure and planned civil works, electronic administrative procedures for granting permits and rights of way, and the applicable conditions and procedures. As part of this minimum information, the single information point should give access to georeferenced information on the</p>		<p>l'exercice des fonctions de point d'information unique, à différents niveaux : national, régional ou local.</p>

Commission proposal	Drafting Suggestions	Comments
<p>location of existing physical infrastructure and planned civil works. To facilitate this, Member States should provide automated digital tools for the submission of the georeferenced information and conversion tools to the supported data formats. These could be made available to network operators and public sector bodies responsible for providing this information via the single information point. Furthermore, where georeferenced location data are available via other digital tools, such as the INSPIRE Geoportal under Directive 2007/2/EC of the European Parliament and of the Council¹¹, the single information point could provide user-friendly access to this information.</p>		
(30) To ensure proportionality and security, the requirement to provide information on	<u>Proposition de prévoir un dispositif plus opérationnel de mise en œuvre des</u>	Les autorités françaises accueillent favorablement la possibilité de déroger aux

¹¹ Directive 2007/2/EC of the European Parliament and of the Council of 14 March 2007 establishing an Infrastructure for Spatial Information in the European Community (INSPIRE) (OJ L 108, 25.4.2007, p. 1).

Commission proposal	Drafting Suggestions	Comments
<p>existing physical infrastructure via the single information point need not apply for the same reasons as those justifying a refusal of an access request. In addition, providing information on existing physical infrastructure via the single information point could, in very specific cases, be burdensome or disproportionate for network operators and public sector bodies. This could arise, for example, where the mapping of relevant assets is not yet available and it would be very costly to map or where access requests are expected to be very low in certain areas of a Member State or in respect to certain specific physical infrastructure. Where it appears that providing information is disproportionate based on a detailed cost-benefit analysis, network operators and public sector bodies should not be obliged to provide such information. Member States should conduct such detailed cost-benefit analysis based on a consultation with</p>	<p>dérogations aux obligations de transparence et de partage d'informations, à savoir permettre aux Etats d'arrêter des listes de catégories d'exemptions de ces obligations à la place de la disposition de la proposition de règlement prévoyant la réalisation, au cas par cas, d'une analyse de proportionnalité des coûts à chaque infrastructure.</p>	<p>obligations de transparence et de communications d'informations notamment lorsque le respect de celles-ci aurait un coût disproportionné pour l'opérateur de réseau ou l'organisme du secteur public.</p> <p>Toutefois, le dispositif dérogatoire proposé semble difficile à mettre en oeuvre car il ne tient pas compte du nombre d'infrastructures physiques potentiellement concernées. La mise en place de dérogation au cas par cas, après réalisation d'une analyse détaillée et consultation des parties, générera une charge administrative significative alors même que l'infrastructure concernée n'est pas privilégié par les opérateurs pour le déploiement de leurs réseaux. Un dispositif plus opérationnel impliquerait de permettre aux Etats d'arrêter des listes de catégories d'infrastructures exemptées</p>

Commission proposal	Drafting Suggestions	Comments
<p>stakeholders on demand for access to existing physical infrastructure, and the analysis should be updated regularly. The consultation process and its outcome should be made public, and the specific physical infrastructure to be exempted from this obligation should be notified to the Commission.</p>		<p>de ces obligations, et ce, d'autant plus si des mises à jour régulières doivent être réalisées. Les autorités françaises s'interrogent également quant à la nécessité de procéder à une notification à la Commission de l'exemption accordée et du processus de consultation, dans la mesure où elle pourra recueillir les informations voulues en application des dispositions du règlement.</p>
<p>(31) To ensure consistency, the competent bodies performing the functions of the single information point, the national regulatory authorities fulfilling their tasks under Directive (EU) 2018/1972 or other competent authorities, such as national, regional or local authorities in charge of cadastre or the implementation of Directive 2007/2/EC (INSPIRE), as appropriate, should consult and cooperate with each other. The purpose of such cooperation should be to</p>		<p>Les autorités françaises s'accordent avec le projet de texte de la Commission s'agissant de la nécessité d'éviter les interférences et surpositions entre les obligations prévues par le projet de règlement d'une part, et celles imposées à l'opérateur gestionnaire d'infrastructures physiques et exerçant une puissance significative sur le marché associé (SMP). Les obligations imposées à ce dernier sont, d'une part, plus adaptées à sa position</p>

Commission proposal	Drafting Suggestions	Comments
<p>minimise the efforts in complying with transparency obligations on network operators and public sector bodies, including the undertakings designated with significant market power ('SMP' operators), to make information available about their physical infrastructure; Where a different data set on physical infrastructure of the SMP operator is required such cooperation should result in establishing useful interlinks and synergies between the SMP-related database and the single information point and proportionate common practices of data collection and data provision to deliver results that are easily comparable.</p> <p>Cooperation should also aim at facilitating access to information on physical infrastructure, in light of national circumstances. If regulatory obligations are modified or withdrawn, the parties affected should be able to agree on the best solutions to adapt the collection and</p>		<p>dominante et, d'autre part, mises en œuvres en concordance avec la taille du patrimoine d'infrastructures dont il est gestionnaire ou propriétaire.</p> <p>Dès lors, une discrétion doit être laissée aux Etats membres concernés par ce cas de figure, afin de prévoir des « <i>interlinks</i> » ou « <i>synergies</i> » les plus pertinents et en concertation avec les parties prenantes, de manière à atteindre les objectifs du texte sans engendrer d'opérations indûment coûteuses pour un ou plusieurs acteurs.</p>

Commission proposal	Drafting Suggestions	Comments
provision of physical infrastructure data to the newly applicable regulatory requirements.		
(32) The transparency obligation for the coordination of civil works need not apply to civil works for reasons of national security or in an emergency. This could be the case, for civil works performed if there is a risk of public danger as a result of degradation processes to civil engineering works and their associated installations, which are caused by destructive natural or human factors and are needed to ensure their safety or their demolition. For reasons of transparency, Member States should notify the types of civil works falling under those circumstances to the Commission and publish them via a single information point.		Les autorités françaises comprennent la volonté de la Commission de suivre l'application du présent texte, toutefois, s'agissant des notifications des travaux de génie civil non soumis aux obligations de transparence pour des raisons de sécurité nationale ou en cas d'urgence, une notification à la Commission n'apparaît pas justifiée (la Commission ne fournit aucune précision quant à l'utilité de cette remontée d'information systématique) et est susceptible d'empiéter sur les compétences mêmes des Etats membres.
(33) To ensure significant savings and minimise inconveniences to the area affected by		

Commission proposal	Drafting Suggestions	Comments
<p>the deployment of new electronic communications networks, regulatory constraints preventing as a general rule the negotiation among network operators of agreements to coordinate civil works to deploy very high capacity networks should be prohibited. If civil works are not financed by public means, this Regulation should be without prejudice to the possibility for network operators to conclude civil works coordination agreements according to their own investment and business plans and their preferred timing.</p>		
<p>(34) Member States should maximise the results of civil works fully or partially financed by public means, by exploiting the positive externalities of those works across sectors and ensuring equal opportunities to share the available and planned physical infrastructure to deploy very high capacity networks. The main</p>		

Commission proposal	Drafting Suggestions	Comments
<p>purpose of civil works financed by public means should not be adversely affected. However, timely and reasonable requests to coordinate the deployment of elements of very high capacity networks should be met by the network operator carrying out the civil works concerned directly or indirectly (for example, through a subcontractor) under proportionate, non-discriminatory and transparent terms. For example, the requesting operator should cover any additional costs, including those caused by delays and keep changes to the original plans to a minimum. Such provisions should not affect the right of Member States to reserve capacity for electronic communications networks even in the absence of specific requests. This will enable Member States to meet future demand for physical infrastructures to maximise the value of civil works or to adopt measures giving similar rights to operators of other types of</p>

deployments exempted from permits under Union law should no longer be subject to permits under national law.	deployments exempted from permits under Union law should no longer be subject to permits under national law.	
(43) To facilitate the deployment of elements of very high capacity networks, any fee related to a permit, other than rights of way, should be limited to the administrative costs related to processing the permit request according to the principles established in Article 16 of Directive (EU) 2018/1972. In the case of rights of way, the provisions established in Articles 42 and 43 of Directive (EU) 2018/1972 apply.		
(44) Achieving the targets set out in Decision (EU) 2022/2481 requires that, by 2030, all end users at fixed locations are covered by a gigabit network up to a network termination point and all populated areas are covered by next-generation wireless high-speed networks with at		Les autorités françaises accueillent favorablement la volonté de la Commission de s'assurer que les nouveaux immeubles et les immeubles ayant fait l'objet d'une rénovation majeure soit équipés en infrastructures physiques et cablage interne adapté à la fibre.

Commission proposal	Drafting Suggestions	Comments
<p>least 5G-equivalent performance, in accordance with the principle of technological neutrality.</p> <p>Providing gigabit networks up to the end user should be facilitated, in particular through fibre-ready in-building physical infrastructure.</p> <p>Providing for mini-ducts during the construction of a building has only a limited incremental cost, while equipping buildings with gigabit infrastructure may represent a significant part of the cost of deploying a gigabit network.</p> <p>Therefore, all new buildings or buildings subject to a major renovation should be equipped with physical infrastructure and in-building fibre wiring, enabling the connection of end users to gigabit speeds. New multi-dwelling buildings and multi-dwelling buildings subject to major renovation should also be equipped with an access point, accessible to one or more undertakings providing or authorised to provide public electronic communications networks.</p>		<p>Elle s'interroge néanmoins sur la place des dispositions dans le présent règlement, qui ne concerne pas en tant que telles la construction même des réseaux.</p>

Commission proposal	Drafting Suggestions	Comments
<p>Moreover, building developers should provide for empty ducts from every dwelling to the access point, located in or outside the multi-dwelling building. Major renovations of existing buildings at the end user's location to enhance energy performance (pursuant to Directive 2010/31/EU of the European Parliament and of the Council¹³) provide an opportunity to also equip those buildings with fibre-ready in-building physical infrastructure, in-building fibre wiring and, for multi-dwelling buildings, an access point.</p>		
<p>(45) The prospect of equipping a building with fibre-ready in-building physical infrastructure, an access point or in-building fibre wiring may be considered disproportionate in terms of costs, namely for new single dwellings or buildings undergoing major</p>		

¹³ Directive 2010/31/EU of the European Parliament and of the Council of 19 May 2010 on the energy performance of buildings (OJ L 153, 18.6.2010, p. 13).

Commission proposal	Drafting Suggestions	Comments
renovation works. This may be based on objective grounds, such as tailor-made cost estimates, economic reasons linked to the location, or urban heritage conservation or environmental reasons (for example, for specific categories of monuments).		
(46) Prospective buyers and tenants should be able to identify buildings that are equipped with fibre-ready in-building physical infrastructure, an access point and in-building fibre wiring and that therefore have considerable cost-saving potential. The fibre readiness of buildings should also be promoted. Member States should therefore develop a compulsory ‘fibre-ready’ label for buildings equipped with such infrastructure, an access point and in-building fibre wiring in accordance with this Regulation.		

Commission proposal	Drafting Suggestions	Comments
<p>(47) Undertakings providing or authorised to provide public electronic communications networks deploying gigabit networks in a specific area could achieve significant economies of scale if they could terminate their network to the building's access point by using existing physical infrastructure and restoring the affected area. This should be possible irrespective of whether a subscriber has expressed explicit interest for the service at that moment in time and provided that the impact on private property is minimised, Once the network is terminated at the access point, the connection of an additional customer is possible at a significantly lower cost, in particular by means of access to a fibre-ready vertical segment inside the building, where it already exists. That objective is also fulfilled when the building itself is already equipped with a gigabit network to which access is provided to any public</p>		<p>Si les ambitions en matière de déploiement de la fibre sont pleinement partagées par les autorités françaises, elles estiment que ces dispositions pourraient avoir pour effet de favoriser le déploiement de la fibre au détriment d'autres technologies alors même que le choix de la technologie dépend tout de même de la faisabilité technique et de son coût.</p>

Commission proposal	Drafting Suggestions	Comments
<p>communications network provider, which has an active subscriber in the building, under transparent, proportionate and non-discriminatory terms and conditions. That could in particular be the case in Member States that have taken measures under Article 44 of Directive (EU) 2018/1972.</p>		
<p>(48) In order to contribute to ensuring availability of gigabit networks to end users, new buildings and majorly renovated buildings should be equipped with fibre-ready in-building physical infrastructure, in-building fibre wiring and, in the case of multi-dwelling buildings, an access point. Member States should have a degree of flexibility to achieve this. This Regulation, therefore, does not seek to harmonise rules on related costs, including the recovery of costs of equipping buildings with</p>	<p><u>Proposition de préciser ce qui est indiqué en commentaire à ce considérant.</u></p>	<p>Les autorités françaises reconnaissent qu'un certain degré de flexibilité doit être laissé pour l'établissement des prescriptions techniques en matière de fibrage. Elles s'interrogent donc sur la possibilité qui pourrait être donnée de laisser l'adoption de ces standards à des professionnels du secteur, qui, en France, ont déjà cette fonction. Le résultat de leurs travaux (guide pédagogique, référentiel technique) sont régulièrement utilisés par les opérateurs d'infrastructures, ou encore les promoteurs pour s'assurer du bon raccordement à la fibre. Les</p>

fibre-ready in-building physical infrastructure, in-building fibre wiring and an access point.		autorités françaises souhaiteraient donc qu'une telle possibilité, en ce sens, soit maintenue et précisée dans les considérants.
(49) In line with the subsidiarity principle and to take national circumstances into account, Member States should adopt the standards or technical specifications necessary for the purpose of equipping newly constructed or majorly renovated buildings with fibre-ready in-building physical infrastructure and in-building fibre wiring; and new or majorly renovated multi-dwelling buildings with an access point. Those standards or technical specifications should set out at least: the building access point specifications; fibre interface specifications; cable specifications; socket specifications; specifications for pipes or micro-ducts; technical specifications needed to prevent interference with electrical cabling, and the		Les autorités françaises estiment que les considérants 46 et 49 en particulier, n'explicitent pas suffisamment la distinction entre le “fibre ready label” et les “certification schemes”, de telle sorte qu'il est difficile de comprendre la bonne articulation entre les deux. Dans le cas où un système de certification serait mis en place, l'utilité d'un label en supplément soulève des interrogations quant à sa pertinence, notamment au regard des coûts supplémentaires que sa mise en place impliquerait d'une part, et de l'apport qu'il pourrait avoir une fois un système de certification mis en place d'autre part.

Commission proposal	Drafting Suggestions	Comments
<p>minimum bend radius. Member States should make the issuance of building permits conditional on compliance of the relevant new building or major renovation works project requiring a building permit with the standards or technical specifications based on a certified test report. Member States should also set up certification schemes for the purpose of demonstrating compliance with the standards or technical specifications as well as for qualifying for the ‘fibre-ready’ label. Moreover, to avoid an increase in red tape related to the certification scheme set up under this Regulation, Member States should take into account the procedural requirements applied to certification schemes pursuant to Directive 2010/31/EU and also consider the possibility to enable the combined launch of both request procedures.</p>		

Commission proposal	Drafting Suggestions	Comments
(50) In view of the social benefits stemming from digital inclusion and taking into account the economics of deploying very high capacity networks, where there is neither existing passive or active fibre-ready infrastructure serving end users' premises nor alternatives to providing very high capacity networks to a subscriber, any public communications network provider should have the right to terminate its network to a private premise at its own cost, provided that the impact on private property is minimised, for example, if possible, by reusing the existing physical infrastructure available in the building or ensuring full restoration of the affected areas.		
(51) Requests for access to the in-building physical infrastructure should fall under the scope of this Regulation, whereas a request for access to fibre wiring is to fall under the scope of Directive (EU) 2018/1972. Moreover, access		Les autorités françaises souhaitent attirer l'attention sur le fait que la malgré la distinction technique existante entre d'une part, l'accès à l'infrastructure physique à l'intérieur de l'immeuble et d'autre part, l'accès au cablage,

Commission proposal	Drafting Suggestions	Comments
<p>to in-building physical infrastructure could be refused if access to in-building fibre wiring is made available under fair, reasonable and non-discriminatory terms and conditions, including price.</p>		<p>ces deux problématiques sont très proches l'une de l'autre. Or, la première étant déjà régie par la directive 2018/1972, il est important que la seconde, si elle est régie par un autre texte (le règlement gigabit), ne devrait pas avoir pour conséquence de perturber ou remettre en cause le cadre établi par la directive précitée, et précisé par les autorités nationales de régulation.</p>
<p>(52) To ensure consistency of approaches, the Commission, in close cooperation with BEREC, could provide guidance on the applications of provisions on access to in-building physical infrastructure, including but not only on the terms and conditions thereof. The views of stakeholders and national dispute settlement bodies should be duly taken into account in the preparation of the guidance.</p>	<p>(52) To ensure consistency of approaches, the Commission, in close cooperation with BEREC, could provide guidance on the applications of provisions on access to in-building physical infrastructure, including but not only on the terms and conditions thereof. The views of stakeholders and national dispute settlement bodies should be duly taken into account in the preparation of the guidance.</p>	<p>Compte tenu du précédent commentaire, l'élaboration d'orientations par la Commission pourrait justement avoir pour effet d'empêcher sur le cadre établi par la directive 2018/1972 et complété par l'autorité nationale de régulation, qui exerce également la fonction de règlement des litiges. Dans la mesure où la pratique démontre que la régulation et le règlement des différents tranchés par cette autorité en matière d'accès au cablage internet et d'accès aux infrastructures fonctionne, l'adoption</p>

Commission proposal	Drafting Suggestions	Comments
		d'orientations par la Commission n'est pas nécessaire, et peut avoir pour effet de rigidifier un cadre nécessitant de faire preuve d'une certaine souplesse.
(53) To foster the modernisation and agility of administrative procedures and reduce the cost of and time spent on the procedures for deploying very high capacity networks, the services of single information points should be performed fully online. To that end, single information points should provide easy access to the necessary digital tools, such as web portals, digital platforms, and digital applications. The tools should give access in an efficient manner to the minimum information on existing physical infrastructure and planned civil works and the possibility to request information. Such digital tools should also give access to the electronic administrative procedures for		Les autorités françaises reconnaissent la nécessité de faciliter l'accès aux informations au moyen d'outils numériques. Elles souhaitent néanmoins appeler l'attention sur le fait que la mise en place de "single information point" en particulier pour les administrations nécessiterait une période transitoire permettant la mise en place ou son adaptation. Ainsi, cette réalité doit être prise en compte dans les délais impartis pour la mise en oeuvre du règlement.

Commission proposal	Drafting Suggestions	Comments
<p>granting permits and rights of way and related information on the applicable conditions and procedures. Where more than one single information point is set up in a Member State, all single information points should be easily and seamlessly accessible, by electronic means, via a single national digital entry point. This entry point should have a common user interface ensuring access to the online single information points. The single national digital entry point should facilitate interaction between operators and competent authorities performing the functions of the single information points.</p>		
<p>(54) Member States should be allowed to rely on, and where necessary improve, digital tools, such as web portals, digital platforms, and digital applications that might already be available at local, regional or national level to provide the functions of the single information</p>		<p>Les autorités françaises s'interrogent sur ce qu'il convient d'entendre par "interconnection" et "intégration totale ou partielle" des points d'information uniques.</p> <ul style="list-style-type: none"> - Est ce que cela signifie qu'un même point d'information unique peut avoir

Commission proposal	Drafting Suggestions	Comments
HAVE ADOPTED THIS REGULATION:		
Article 1		
Subject matter and scope		
1. This Regulation aims to facilitate and stimulate the roll-out of very high capacity networks by promoting the joint use of existing physical infrastructure and by enabling a more efficient deployment of new physical infrastructure so that such networks can be rolled out faster and at a lower cost.	1. This Regulation Directive aims to facilitate and stimulate the roll-out of very high capacity networks by promoting the joint use of existing physical infrastructure and by enabling a more efficient deployment of new physical infrastructure so that such networks can be rolled out faster and at a lower cost.	Les autorités françaises souhaitent rappeler que l'instrument choisi par la Commission pour faciliter, stimuler et accélérer le déploiement des réseaux à très haute capacité, à savoir le règlement, n'est pas le plus adapté. Elles considèrent qu'une refonte de la directive demeure plus efficace pour atteindre l'objectif poursuivi tout en tenant compte des circonstances nationales (en particulier concernant l'organisation interne des pouvoirs publics, le rythme et de l'efficacité constatée des déploiements sur le territoire national).

Commission proposal	Drafting Suggestions	Comments
2. If any provision of this Regulation conflicts with a provision of Directive (EU) 2018/1972 or Directive 2002/77/EC, the relevant provision of those Directives shall prevail.		
3. Member States may maintain or introduce measures in conformity with Union law which contain more detailed provisions than those set out in this Regulation where they serve to promote the joint use of existing physical infrastructure or enable a more efficient deployment of new physical infrastructure.	3. Member States may maintain or introduce measures in conformity with Union law which contain more detailed provisions than those set out in this Regulation-Directive where they serve to promote the joint use of existing physical infrastructure or enable a more efficient deployment of new physical infrastructure.	
4. By way of exception to paragraph 3, Member States shall not maintain or introduce in their national law provisions diverging from those laid down in Article 3(3) and (6), Article 4(4), Article 5(2) and (4), Article 6(2) and Article 8(7) and (8).		Les autorités françaises souhaitent attirer l'attention sur le fait que la plupart des dispositions ne pouvant donner lieu à l'adoption de mesures nationales s'écartant de celles prévues par le présent projet de texte, cela ne concerne que les dispositions prévoyant des dérogations. Il est donc indispensable que

Commission proposal	Drafting Suggestions	Comments
		chacunes d'elles aboutissent à un compromis permettant de tenir compte des particularités nationales.
Article 2		
Definitions		
For the purposes of this Regulation, the definitions in Directive (EU) 2018/1972 apply.		
The following definitions also apply:		
(1) ‘network operator’ means:		
(a) an operator as defined in Article 2, point (29), of Directive (EU) 2018/1972;		Les autorités françaises accueillent favorablement la volonté de soumettre les opérateurs d’infrastructures (“tower companies” notamment) aux dispositions du règlement afin qu’ils bénéficient des mêmes droits et

Commission proposal	Drafting Suggestions	Comments
		obligations que les entreprises qui fournissent ou sont autorisées à fournir des réseaux de communications électroniques. Ces entreprises sont déjà considérées, en droit français, comme des gestionnaires d'infrastructures soumis aux exigences de la directive 2014/61/UE.
(b) an undertaking providing a physical infrastructure intended to provide:		
(i) a service of production, transport or distribution of:		
- gas;		
- electricity, including public lighting;		
- heating;		

Commission proposal	Drafting Suggestions	Comments
- water, including disposal or treatment of wastewater and sewage, and drainage systems;		
(ii) transport services, including railways, roads, ports and airports;		
(2) ‘physical infrastructure’ means:		
(a) any element of a network that is intended to host other elements of a network without becoming an active element of the network itself, such as pipes, masts, ducts, inspection chambers, manholes, cabinets, antenna installations, towers and poles, as well as buildings or entries to buildings, and any other asset including street furniture, such as light poles, street signs, traffic lights, billboards, bus and tramway stops and metro stations;	(a) any element of a network that is intended to host other elements of a network without becoming an active element of the network itself, such as pipes, masts, ducts, inspection chambers, manholes, cabinets, antenna installations, towers and poles, as well as buildings or entries to buildings, and any other asset including street furniture, such as light poles, street signs, traffic lights, billboards, bus and tramway stops and metro stations;	Le premier critère de définition d’infrastructure physique (2a) semble trop large en ce qu’il conduit à englober entre autres les bâtiments, entrées des bâtiments et toute autre élément et pourrait être redondant avec le 2b. La distinction avec le second critère de définition (2b) n’est donc pas évident et pourrait soulever des difficultés de mise en oeuvre. Des précisions devraient donc être apportées.

Commission proposal	Drafting Suggestions	Comments
<p>(b) where they are not part of a network and are owned or controlled by public sector bodies: buildings or entries to buildings, and any other asset including street furniture, such as light poles, street signs, traffic lights, billboards, bus and tramway stops and metro stations.</p>		<p>L'approche extensive retenue par la Commission pour définir la notion d'infrastructure physique (2b) conduit à qualifier comme telle un certain nombre de constructions sans pouvoir en exclure pour des raisons tenant à la sécurité publique, la sûreté, la sécurité ou de leur finalité (écoles, hôpitaux refuges etc.).</p> <p>Cette approche pourrait avoir pour effet d'empêcher les Etats membres ou leurs collectivités de s'assurer du bon déploiement sur leurs territoires (déploiement harmonieux, organisé) alors que les problématiques d'acceptabilité sociétales des réseaux (opposition des riverains au niveau local, oppositions par craintes des ondes électromagnétiques) sont grandissantes.</p>

Commission proposal	Drafting Suggestions	Comments
		<p>Il conviendrait alors que la définition de l'infrastructure physique tienne compte des objectifs poursuivis en matière de déploiement des réseaux mais aussi des autres considérations d'intérêt général qui entrent en jeu.</p> <p>Il n'est d'ailleurs pas certain que l'ensemble des éléments figurant dans la définition puisse effectivement servir de support, d'une manière ou d'une autre, au déploiement des réseaux de communications électroniques à très haute capacité.</p>
Cables, including dark fibre, as well as elements of networks used for the provision of water intended for human consumption as defined in Article 2, point 1, of Council (EU) 2020/2184 of the European Parliament and of the Council ¹⁹		<p>Les autorités françaises s'interrogent sur la possibilité de considérer qu'un château d'eau est une infrastructure physique .</p> <p>Aujourd'hui, les châteaux d'eau sont utilisés</p>

¹⁹ Directive (EU) 2020/2184 of the European Parliament and of the Council of 16 December 2020 on the quality of water intended for human consumption (OJ L 435, 23.12.2020, p. 1).

Commission proposal	Drafting Suggestions	Comments
are not physical infrastructure within the meaning of this Regulation;		pour le déploiement des réseaux sans fil (le mobile). Une exclusion de ces infrastructures reviendrait sur une pratique admise et pourrait être contre-productif dans un contexte marqué par la raréfaction des infrastructures disponibles pour le déploiement de certains réseaux.
(3) ‘civil works’ means every outcome of building or civil engineering works taken as a whole that is sufficient in itself to fulfil an economic or technical function and entails one or more elements of a physical infrastructure;		
(4) ‘public sector body’ means a State, regional or local authority, a body governed by public law or an association formed by one or several such authorities or one or several such bodies governed by public law;		

Commission proposal	Drafting Suggestions	Comments
(5) 'bodies governed by public law' means bodies that have all of the following characteristics:		
(a) they are established for the specific purpose of meeting needs in the general interest, not having an industrial or commercial character;		
(b) they have legal personality;		
(c) they are financed, in full or for the most part, by state, regional or local authorities or by other bodies governed by public law; or are subject to management supervision by those authorities or bodies; or have an administrative, managerial or supervisory board, more than half of whose members are appointed by state, regional or local authorities or by other bodies governed by public law;		

Commission proposal	Drafting Suggestions	Comments
(6) ‘in-building physical infrastructure’ means physical infrastructure or installations at the end user’s location, including elements under joint ownership, intended to host wired and/or wireless access networks, where such access networks are capable of delivering electronic communications services and connecting the building access point with the network termination point;		
(7) ‘in-building fibre wiring’ means optical fibre cables at the end user’s location, including elements under joint ownership, intended to deliver electronic communications services and connecting the building access point with the network termination point;		
(8) ‘fibre-ready in-building physical infrastructure’ means in-building physical		

Commission proposal	Drafting Suggestions	Comments
infrastructure intended to host optical fibre elements;		
(9) ‘major renovation works’ means building or civil engineering works at the end user’s location encompassing structural modifications of the entire in-building physical infrastructure or a significant part thereof and that require a building permit;		<p>Il pourrait être pertinent d’ajouter en complément un critère financier qui pourrait être utilisé, de manière alternative, pour définir la notion de “major renovation works”.</p> <p>Actuellement, pour déterminer si un logement ayant fait l’objet d’une rénovation importante est concerné par l’obligation de fibrage des bâtiments prévue à l’article L. 113-10 du code de la construction et de l’habitation, le critère retenu est celui du coût global des travaux : l’obligation ne s’applique pas dans le cas où le coût des travaux d’équipement en lignes de communications électroniques à très haut débit en fibre optique (y compris les travaux induits), est supérieur à 5 % du coût des travaux faisant l’objet du permis de construire.</p>

Commission proposal	Drafting Suggestions	Comments
(10) ‘permit’ means an explicit or implicit decision or set of decisions taken simultaneously or successively by one or several competent authorities that are needed for an undertaking to carry out building or civil engineering works necessary for the deployment of elements of very high capacity networks;	(10) ‘permit’ means an explicit or implicit decision or set of decisions taken simultaneously or successively by one or several competent authorities that are needed for an undertaking operator to carry out building or civil engineering works necessary for the deployment of elements of very high capacity networks;	<p>La proposition de règlement fait davantage référence à l’opérateur plutôt qu’à une entreprise, un changement terminologique peut être utile.</p> <p>Pour faciliter l’application du présent règlement et notamment de son article 7, il conviendrait de faire le lien entre la notion de “ permit” et celle de “right of way”, voire définir les contours de cette seconde notion.</p>
(11) ‘access point’ means a physical point, located inside or outside the building, accessible to one or more undertakings providing or authorised to provide public electronic communications networks, where connection to the fibre-ready in-building physical infrastructure is made available.		

Commission proposal	Drafting Suggestions	Comments
Article 3		
Access to existing physical infrastructure		
1. Upon written request of an operator, public sector bodies owning or controlling physical infrastructure or network operators shall meet all reasonable requests for access to that physical infrastructure under fair and reasonable terms and conditions, including price, with a view to deploying elements of very high capacity networks or associated facilities. Public sector bodies owning or controlling physical infrastructure shall meet all reasonable requests for access also under non-discriminatory terms and conditions. Such written requests shall specify the elements of the physical infrastructure for which the access is requested, including a specific time frame.		Une précision pourrait être apportée quant au sens du terme “price”, qui selon les autorités françaises renvoie non seulement au prix mais également, plus généralement, aux conditions financières pouvant être demandées en contrepartie de l'accès aux infrastructures qui est fourni à l'opérateur demandeur. Cette approche large est celle actuellement retenue, par les autorités françaises, pour l'application de la directive 2014/61/UE car elle permet de traiter la diversité des situations existantes.

Commission proposal	Drafting Suggestions	Comments
<p>2. When determining prices as part of fair and reasonable terms and conditions for granting access, network operators and public sector bodies owning or controlling physical infrastructure shall take into account at least the following:</p>	<p>2. When determining prices as part of fair and reasonable terms and conditions for granting access, network operators and public sector bodies owning or controlling physical infrastructure shall take into account at least the following:</p>	<p>Les autorités françaises reconnaissent qu'il est important de préciser au sein du texte les critères permettant d'apprécier les caractères équitable et raisonnable des conditions d'accès proposées par l'opérateur de réseaux ou l'organisme du secteur public.</p> <p>Toutefois, compte tenu de la diversité des situations et infrastructures concernées, il est important de laisser une marge d'appréciation suffisante aux opérateurs de réseaux et organismes publics fournissant l'accès à leurs infrastructures et, par suite, en cas d'échec des négociations ou refus d'accès, à l'organisme chargé de régler les litiges. Dès lors, l'énumération des éléments d'appréciation de ce paragraphe ne devrait pas être exhaustive.</p> <p>En outre, la pratique actuelle démontre que les fournisseurs d'accès aux infrastructures ont établi des conventions d'accès avec les entreprises exploitantes ou autorisées à exploiter des réseaux de communications électroniques qui les satisfont. Une remise en cause de l'équilibre trouvé n'apparaît donc pas nécessaire.</p>

Commission proposal	Drafting Suggestions	Comments
		Par ailleurs, concernant la détermination, par les organismes du secteur public, des conditions financières d'accès à leurs infrastructures, la proposition de la Commission ne devrait pas remettre en cause le système de redevance français.
(a) the need to ensure that the access provider has a fair opportunity to recover the costs it incurs in order to provide access to its physical infrastructure, taking into account specific national conditions and any tariff structures put in place to provide a fair opportunity for cost recovery; in the case of electronic communications networks, any remedies imposed by a national regulatory authority shall also be taken into account.		
(b) the impact of the requested access on the access provider's business plan, including

		application des paragraphes 1,2,3 aux infrastructures critiques.
Paragraphs 1, 2 and 3 shall not apply:		
(a) in the case of physical infrastructure that is not technically suitable for the deployment of very high capacity networks or associated facilities'; or		
(b) in specific cases where the obligation to provide information about certain existing physical infrastructure pursuant to paragraph 1, first subparagraph, would be disproportionate, on the basis of a detailed cost-benefit analysis conducted by Member States and based on a consultation with stakeholders.	<p>(b) in specific cases where the obligation to provide information about certain existing physical infrastructure pursuant to paragraph 1, first subparagraph, would be disproportionate,</p> <p style="background-color: yellow;">Member States shall identify the categories of physical infrastructures which are not subject to this obligation, after consulting stakeholders. on the basis of a detailed cost-benefit analysis conducted by Member States and based on a consultation with stakeholders.</p>	<p>Les autorités françaises accueillent favorablement le principe de ne pas appliquer l'obligation de transparence et de communication des informations, lorsque son respect serait disproportionné.</p> <p>Toutefois, les modalités de mise en oeuvre de cette possibilité revêtent une complexité, en particulier dans le cas où la disposition impliquerait de devoir systématiquement</p>

Commission proposal	Drafting Suggestions	Comments
		réalisée une analyse coût-bénéfice dès qu'une dérogation est envisagée. Une solution plus pratique consisterait à laisser aux Etats membres le soin de déterminer les catégories d'infrastructures pour lesquelles le respect de ces obligations apparaît disproportionné. Dans ce cas, la liste des catégories serait arrêtée après consultation de l'ensemble des parties prenantes (collectivités contrôlant ou gérant les infrastructures, opérateurs etc..).
	(c) in cases where physical infrastructures are not subject to access obligations according to Article 3	La proposition de règlement devrait prévoir une possibilité de refuser la communication ou bien une non application des paragraphes 1,2,3 lorsque l'infrastructure physique concernée n'est, en tout état de cause, pas concernée par les obligations d'accès prévus à l'article 3, notamment en application du paragraphe 6 de l'article 3, afin de ne pas entraîner de charge administrative non nécessaire.

Commission proposal	Drafting Suggestions	Comments
Any such exceptions shall be published via a single information point and notified to the Commission.		
5. Operators that obtain access to information pursuant to this Article shall take appropriate measures to ensure respect for confidentiality and operating and business secrets.		
Article 5		
Coordination of civil works		
1. Any network operator shall have the right to negotiate agreements on the coordination of civil works, including on the apportioning of costs, with operators with a view to deploying elements of very high capacity networks or associated facilities.		

Commission proposal	Drafting Suggestions	Comments
<p>2. Any network operator when performing or planning to perform directly or indirectly civil works, which are fully or partially financed by public means, shall meet any reasonable written request to coordinate those civil works under transparent and non-discriminatory terms made by operators with a view to deploying elements of very high capacity networks or associated facilities.</p>		
<p>Such requests shall be met provided that the following cumulative conditions are met:</p>		
<p>(a) this will not entail any unrecoverable additional costs, including those caused by additional delays, for the network operator that initially envisaged the civil works in question, without prejudice to the possibility of agreeing on apportioning the costs between the parties concerned;</p>		

Commission proposal	Drafting Suggestions	Comments
(b) the network operator initially envisaging the civil works remains in control over the coordination of the works;		
(c) the request to coordinate is filed as soon as possible and, when a permit is necessary, at least 2 months before the submission of the final project to the competent authorities for granting permits.		
3. A request to coordinate civil works made by an undertaking providing or authorised to provide public electronic communications networks to an undertaking providing or authorised to provide public electronic communications networks may be deemed unreasonable where both following conditions are met:		Les autorités accueillent favorablement la précision apportée quant à la possibilité de refuser la demande de coordination des travaux présentée par un fournisseur de services de communications électroniques à un autre. Les conditions proposées permettent d'assurer un juste équilibre entre les obligations résultant de la directive 2018/1972/UE et celles envisagées par la présente proposition de règlement. Cette

Commission proposal	Drafting Suggestions	Comments
		articulation est de nature favoriser la coordination des travaux tout en n'entravant pas davantage les déploiements ou perspectives de déploiement annoncés.
(a) the request concerns an area which has been subject to either of the following:		
(i) a forecast of the reach of broadband networks, including very high capacity networks pursuant to Article 22(1) of Directive (EU) 2018/1972;		
(ii) an invitation to declare the intention to deploy very high capacity networks pursuant to Article 22(3) of Directive (EU) 2018/1972;		
(iii) a public consultation in applying Union State aid rules;		

Commission proposal	Drafting Suggestions	Comments
<p>(b) the requesting undertaking failed to express its intention to deploy very high capacity networks in the area referred to in point (a) in any of the most recent procedures among those listed in that point covering the period during which the request for coordination is made.</p>		
<p>If a request to coordinate is considered unreasonable on the basis of the first paragraph, the undertaking providing or authorised to provide public electronic communications networks refusing the coordination of civil works shall deploy physical infrastructure with sufficient capacity to accommodate possible future reasonable needs for third-party access.</p>		
<p>4. Paragraphs 2 and 3 need not apply to civil works that are limited in scope, such as in terms of value, size or duration, or for critical national</p>	<p>4. Information on such the list of civil works or the type of civil works excluded from transparency obligations shall be published via a single information point and notified to the Commission.	
Article 7		
Procedure for granting permits, including rights of way		
1. Competent authorities shall not unduly restrict, hinder or make economically less attractive the deployment of any element of very high capacity networks or associated facilities. Member States shall ensure that any rules governing the conditions and procedures		

Commission proposal	Drafting Suggestions	Comments
<p>applicable for granting permits, including rights of way, required for the deployment of elements of very high capacity networks or associated facilities are consistent across the national territory.</p>		
<p>2. Competent authorities shall make available all information on the conditions and procedures applicable for granting permits, including rights of way, including any information on exemptions on some or all permits or rights of way required under national or Union law, via a single information point in electronic format.</p>	<p>2. Competent authorities shall make available all information on the conditions and procedures applicable for granting permits, including rights of way, including any information on exemptions on some or all permits or rights of way required under national or Union law, via a single information point an appropriate digital tool in electronic format.</p>	<p>Compte tenu du nombre d'autorités concernées, de niveau variable (local, régional, national), la mise en place d'un point d'information unique pourrait susciter des difficultés opérationnelles majeures et s'avérerait disproportionnée au regard de l'objectif recherché. Il conviendrait alors de s'assurer que les informations soient facilement accessibles à partir de leurs outils numériques respectifs, les opérateurs, en principe, ayant déjà une certaine connaissance des autorisations et droits requis pour le déploiement de leurs réseaux ou ressources associées.</p>

Commission proposal	Drafting Suggestions	Comments
3. Any operator shall have the right to submit, via a single information point in electronic format, applications for permits or rights of way and to retrieve information about the status of its application.	3. Any operator shall have the right Member States may provide for the right of every operator to submit, via a single information point in electronic format, applications for permits or rights of way and to retrieve information about the status of its application.	<p>En France, les demandes d'autorisations ou droits de passage nécessaires pour le déploiement des réseaux à très haute capacité ou des ressources associées peuvent déjà être adressées, à l'autorité compétente, par la voie dématérialisée. Plusieurs législations ont été adoptées afin de dématérialiser les procédures administratives de délivrance de ces autorisations. Dans ce contexte, la procédure, les délais et l'état d'avancement de la demande sont communiquées à l'opéateur.</p> <p>La mise en place obligatoire d'un "single information point", qui présenterait une certaine complexité, n'est donc pas nécessaire pour atteindre l'objectif poursuivi.</p>
4. The competent authorities shall, within 15 working days from its receipt, reject	4. The competent authorities shall, within 15 working days 1 month from its receipt, reject	Le gestionnaire du point d'information unique n'est pas pour autant l'autorité compétente pour

Commission proposal	Drafting Suggestions	Comments
<p>applications for permits, including for rights of way, for which the minimum information has not been made available via a single information point, pursuant to Article 6(1) first subparagraph, by the same operator which applies for that permit.</p>	<p>applications for permits, including for rights of way, for which the minimum information has not been made available via a single information point, pursuant to Article 6(1) first subparagraph, by the same operator which applies for that permit.</p>	<p>délivrer l'autorisation ou rejeter la demande de l'opérateur. Le délai de 15 jours ouvrés n'est donc pas suffisant en ce qu'il ne tient pas compte du temps nécessaire à l'échange d'information entre l'autorité compétente et le ou les gestionnaire(s) du point d'information(s) unique(s) (1 ou 2 mois sont nécessaires). Le règlement ne doit pas remettre en cause la répartition des compétences prévue au niveau national, par les Etats membres, pour l'octroi des autorisations et droits de passage ni modifier les règles de traitement, fixées au niveau national, des demandes d'autorisaiton.</p>
<p>5. The competent authorities shall grant or refuse permits, other than rights of way, within 4 months from the date of the receipt of a complete permit application.</p>	<p>5. The competent authorities shall grant or refuse permits, other than rights of way, within 4 6 months from the date of the receipt of a complete permit application.</p>	<p>Le déploiement des réseaux à très haute capacité peut nécessiter l'obtention de plusieurs autorisations administratives (permission de voirie, autorisations urbanisme, autorisations environnementales) qui ne peuvent être délivrées qu'après examen détaillé du projet.</p>

Commission proposal	Drafting Suggestions	Comments
		Les modalités et délais d'instruction prévus sont fixés par la législations concernée, en tenant compte de la spécificité du projet et des intérêts à préserver (environnement, paysage, patrimoine). L'instauration de délais plus courts et un encadrement trop étroit de la faculté de prorogation réduiraient les examens menés pour la protection des intérêts autre que le déploiements des réseaux télécoms.
The completeness of the application for permits or rights of way shall be determined by the competent authorities within 15 days from the receipt of the application. Unless the competent authorities invited the applicant to provide any missing information within that period, the application shall be deemed complete.	The completeness of the application for permits or rights of way shall be determined by the competent authorities within 15 days 1 month from the receipt of the application. Unless the competent authorities invited the applicant to provide any missing information within that period, the application shall be deemed complete.	En raison du nombre de pièces exigées pour la complétude du dossier et la nécessité, pour les autorités compétentes de contacter le demandeur de l'autorisation en cas d'incomplétude de son dossier, le délai de 15 jours fixé pour l'appréciation de la complétude est insuffisant. Le dernier alinéa de cette disposition renverse la charge de la preuve quant à la complétude du dossier et fait peser une charge disproportionnée sur l'autorité compétente pour la délivrance de

Commission proposal	Drafting Suggestions	Comments
		<p>l'autorisation : il est important que le demandeur de l'autorisation soit seul responsable de la complétude de son dossier et soit éventuellement sanctionné en cas de pièce manquante, cette absence, qui lui est imputable, étant en plus susceptible de ralentir le processus d'octroi de l'autorisation.</p> <p>La déclaration automatique de complétude du dossier, au delà de 15 jours sans invitation de l'administration à régulariser le dossier, pourrait engendrer une certaine insécurité juridique, en particulier concernant la possibilité, pour l'administration de refuser, par la suite, l'autorisation en l'absence de la pièce manquante (y compris si celle-ci est déterminante).</p>

Commission proposal	Drafting Suggestions	Comments
<p>The first and second subparagraph shall be without prejudice to other specific deadlines or obligations laid down for the proper conduct of the procedure that are applicable to the permit-granting procedure, including appeal proceedings, in accordance with Union law or national law in compliance with Union law.</p>		<p>Les autorités françaises s'interrogent sur le sens de cette disposition : doit elle être entendue comme autorisant les autorités compétentes à maintenir les délais actuellement prévus par les législations nationales pour l'examen des demandes d'autorisations administratives, quand bien même que le délai pour l'octroi ou le refus dépassent les 4 mois prévus au 1er alinéa du paragraphe 5 ?</p>
<p>By way of exception and based on a justified reason set out by a Member State, the 4 month deadline referred to in the first subparagraph and in paragraph 6 may be extended by the competent authority on its own motion. Any extension shall be the shortest possible. Member States shall set out the reasons justifying such an extension, publish them in advance via single information points and notify them to the Commission.</p>	<p>By way of exception and based on a justified reason set out by a Member State, the 6 month 4 month deadline referred to in the first subparagraph and in paragraph 6 may be extended by the competent authority on its own motion. Any extension shall be the shortest possible. Member States shall set out the reasons justifying such an extension, publish them in advance via single information points and notify them to the Commission.</p>	<p>Si les Etats membres doivent pouvoir proroger le délai d'instruction d'une demande d'autorisation pour des raisons justifiées et la communication de cette prorogation au demandeur légitime, une notification de cette étape intermédiaire à la Commission n'est pas nécessaire dans la mesure où cette dernière n'a pas vocation à jouer un rôle dans l'instruction des demandes. De surcroît, ce processus de notification paraît empiéter sur les compétences</p>

Commission proposal	Drafting Suggestions	Comments
		attribuées aux Etats membres et aux collectivités.
Any refusal of a permit or right of way shall be duly justified on the basis of objective, transparent, non-discriminatory and proportionate criteria.	Any refusal of a permit or right of way shall be duly justified on the basis of objective, transparent, non-discriminatory and proportionate criteria.	Cette disposition prête à confusion : la notion de "permit" doit elle bien être entendue comme englobant le "right of way" ? Il conviendrait de clarifier la notion de "right of way".
6. By way of derogation from Article 43(1), point (a) of Directive (EU) 2018/1972, where rights of way over or under public or private property are required for the deployment of elements of very high capacity networks or associated facilities in addition to permits, competent authorities shall grant such rights of way within the 4 month period from the date of receipt of the application.	6. By way of derogation from Article 43(1), point (a) of Directive (EU) 2018/1972, where rights of way over or under public or private property are required for the deployment of elements of very high capacity networks or associated facilities in addition to permits, competent authorities shall grant such rights of way within the 4 month 6 month period from the date of receipt of the application.	Le délai de 4 mois n'est pas suffisant car il ne permet pas de mettre en oeuvre l'ensemble des étapes préalables à l'établissement d'un droit de passage sur des propriétés privées, et en particulier d'organiser, pendant un délai raisonnable, une consultation des riverains et propriétaires concernés. Actuellement, les servitudes sur les propriétés sont accordées à l'issue d'un délai de 6 mois maximum après réception de la demande, ce

Commission proposal	Drafting Suggestions	Comments
		délai assure un juste équilibre entre les besoins du demandeur et les droits et intérêts des tiers (notamment respect du droit de propriété des personnes privées, qui implique parfois de solliciter un juge).
7. In the absence of a response from the competent authority within the 4-month deadline referred to in paragraphs 5 first subparagraph, and unless such deadline is extended pursuant to paragraph 5 fourth subparagraph, the permit shall be deemed to have been granted. This shall also apply in the case of rights of way referred to in paragraph 6.	7. In the absence of a response from the competent authority within the 4-month deadline referred to in paragraphs 5 first subparagraph, and unless such deadline is extended pursuant to paragraph 5 fourth subparagraph, the permit shall be deemed to have been granted. This shall also apply in the case of rights of way referred to in paragraph 6.	En prévoyant que le silence gardé par les autorités compétentes au delà du délai imparti vaut octroi de l'autorisation, le paragraphe 7 porte une atteinte disproportionnée à un certain nombre de droits garantis par l'ordre constitutionnel français, en particulier : <ul style="list-style-type: none"> - le droit de propriété qui protège les biens des personnes privés et des personnes publiques, celui-ci fait d'ailleurs obstacle à toute forme d'expropriation, en l'absence d'indemnisation. - L'impératif de protection du domaine public; duquel découle l'exigence d'une

Commission proposal	Drafting Suggestions	Comments
		<p>autorisation expresse pour l'occupation de certaines propriétés publiques.</p> <p>Un maintien du principe selon lequel le silence vaut rejet est indispensable.</p>
<p>8. The Commission shall, by means of an implementing act, specify categories of deployment of elements of very high capacity networks or associated facilities that shall not be subject to any permit-granting procedure within the meaning of this Article. This implementing act shall be adopted in accordance with the examination procedure referred to in Article 13.</p>	<p>8. The Commission shall, by means of an implementing act, specify categories of deployment of elements of very high capacity networks or associated facilities that shall not be subject to any permit-granting procedure within the meaning of this Article. This implementing act shall be adopted in accordance with the examination procedure referred to in Article 13</p>	<p>Bien que le Comité des communications électroniques prévu à l'article 13 du projet de règlement soit associé à l'élaboration de l'acte d'exécution que pourrait prendre la Commission en application du paragraphe 8, cette disposition conduira néanmoins la Commission à outrepasser les compétences qui lui sont attribuées par les traités. Elle empiètera aussi sur celles actuellement dévolues aux collectivités territoriales.</p> <p>Si l'idée de principe devait être maintenue, elle devrait être davantage encadrée au sein du règlement, en plus de l'étroite association du comité.</p>

5. Buildings equipped in accordance with this Article shall be eligible to receive a ‘fibre-ready’ label.	5. Buildings equipped in accordance with this Article shall may be eligible to receive a ‘fibre-ready’ label.	Compte tenu du nombre de bâtiments potentiellement concernés, la mise en place d'un label obligatoire pourrait être rencontrer des difficultés opérationnelles. Elle ne parait pas nécessaire pour atteindre l'objectif poursuivi et le coût associé pourrrait être disproportionné.
6. Member States shall set up certification schemes for the purpose of demonstrating compliance with the standards or technical specifications referred to in paragraph 4 as well as for qualifying for the ‘fibre-ready’ label provided for in paragraph 5 before [ENTRY INTO FORCE + 12 months]. Member States shall make the issuance of the building permits referred to in paragraphs 1 and 2 conditional upon compliance with the standards or technical specifications referred to in this paragraph on the basis of a certified test report.	6. Member States shall set up certification schemes for the purpose of demonstrating compliance with the standards or technical specifications referred to in paragraph 4 as well as for qualifying for the ‘fibre-ready’ label provided for in paragraph 5 before [ENTRY INTO FORCE + 12 months]. Member States shall make the issuance of the building permits referred to in paragraphs 1 and 2 conditional upon compliance with the standards or technical specifications referred to in this paragraph on the basis of a certified test report.	Les autorités françaises s'interrogent sur la distinction faite par la Commission entre le système du “fibre-ready label” prévu au paragraphe 5 du présent article et celui de la “certification scheme” institué par le paragraphe 6. Si ces deux dispositifs sont distincts mais poursuivent la même finalité, le maintien d'un seul de ces dispositifs devrait être envisagé. Les autorités françaises s'inquiètent quant à la charge administrative associée à la mise en place d'un système de certification, qui pourrait

Commission proposal	Drafting Suggestions	Comments
		<p>occasionner un ralentissement du rythme de déploiement des infrastructures. Actuellement, les autorités n'ont pas fait le choix d'introduire un tel système en raison de sa complexité et de sa rigidité mais s'appuient plutôt sur les bonnes pratiques de la filière.</p> <p>Conditionner la délivrance de l'autorisation d'urbanisme au respect des spécifications en matière de fibrage rompt avec la tradition française selon laquelle l'examen d'une demande d'autorisation d'urbanisme est uniquement réalisée au regard des prescriptions urbanistiques et non celles prévues par une législation étrangère au code de l'urbanisme.</p> <p>En outre, cette disposition pourrait également s'analyser en une atteinte disproportionnée au droit de propriété.</p>

Commission proposal	Drafting Suggestions	Comments
		La mise en place de cette exigence aurait également des conséquences sur les collectivités qui sont, en principe, compétentes pour la délivrance de ces autorisations. En effet, si elles maîtrisent les règles urbanistiques, elles ne disposent pas nécessairement des compétences techniques pour un examen des spécifications en matière de fibrage.
7. Paragraphs 1, 2 and 3 shall not apply to certain categories of buildings, in particular single-dwelling buildings, where compliance with those paragraphs is disproportionate, in particular in terms of costs for individual or joint owners based on objective elements.	7. Paragraphs 1, 2 and 3, 4 and 5 shall not apply to certain categories of buildings, in particular single-dwelling buildings or shelters , where compliance with those paragraphs is disproportionate, in particular in terms of costs for individual or joint owners based on objective elements. Member States shall identify such categories of buildings based on duly justified and proportionate reasons.	La proposition de règlement ne précise pas comment cette première dérogation peut être mise en oeuvre par les Etats membres : une précision pourrait être apportée concernant la faculté des Etats membres à arrêter la liste de catégories de bâtiments exemptés des obligations prévues aux paragraphes mentionnés. Il convient d'étendre la dérogation aux paragraphes 4 et 5 dans la mesure où leur

Commission proposal	Drafting Suggestions	Comments
		application est conditionnée à celles des paragraphes 1,2,3.
8. Paragraphs 1, 2 and 3 need not apply to certain types of buildings, such as specific categories of monuments, historic buildings, military buildings and buildings used for national security purposes, as defined by national law. Member States shall identify such categories of buildings based on duly justified and proportionate reasons. Information on such categories of buildings shall be published via a single information point and notified to the Commission.	8. Paragraphs 1, 2, and 3, 4 and 5 need not apply to certain types of buildings, such as specific categories of monuments, historic buildings, military buildings and buildings used for national security purposes, as defined by national law. Member States shall identify such categories of buildings based on duly justified and proportionate reasons. The list of information on such categories of buildings shall be published via a single information point and notified to the Commission.	Les autorités françaises considèrent que la liste de catégories de bâtiments pouvant bénéficier de la dérogation prévue par le paragraphe 8 est purement indicative.
Article 9		
Access to in-building physical infrastructure		Dans la mesure où cet article semble spécifiquement concerter la fibre, une référence

Commission proposal	Drafting Suggestions	Comments
		à cette technologie dans le titre de l'article pourrait être pertinente.
1. Subject to paragraph 3, first subparagraph, any public electronic communications network provider shall have the right to roll out its network at its own costs up to the access point.		
2. Subject to paragraph 3, any public electronic communications network provider shall have the right to access any existing in-building physical infrastructure with a view to deploying elements of very high capacity networks if duplication is technically impossible or economically inefficient.	2. Subject to paragraph 3, any public electronic communications network provider shall have the right to access any existing available fibre-ready in-building physical infrastructure with a view to deploying elements of very high capacity networks if duplication is technically impossible or economically inefficient.	Selon les définitions prévues à l'article 2 de la proposition de règlement, la notion de "in-building physical infrastructure" ne concerne pas exclusivement la fibre à la différence de celle "available fibre-ready in-building physical infrastructure". Or l'article 9 semble s'appliquer spécifiquement aux déploiements des réseaux fibrés.
3. Any holder of a right to use the access point and the in-building physical infrastructure shall meet all reasonable requests for access to the	3. Any holder of a right to use the access point and the available fibre-ready in-building physical infrastructure shall meet all reasonable	

Commission proposal	Drafting Suggestions	Comments
access point and the in-building physical infrastructure from public electronic communications network providers under fair and non-discriminatory terms and conditions, including price, where appropriate.	requests for access to the access point and the available fibre-ready in-building physical infrastructure from public electronic communications network providers under fair and non-discriminatory terms and conditions, including price, where appropriate.	
Any holder of a right to use the access point or the in-building physical infrastructure may refuse access where access to in-building fibre wiring is provided pursuant to obligations imposed under Directive (EU) 2018/1972, under Title II, Chapters II to IV, or made available under fair, reasonable and non-discriminatory terms and conditions, including price.	Any holder of a right to use the access point or the available fibre-ready in-building physical infrastructure may refuse access where access to in-building fibre wiring is provided pursuant to obligations imposed under Directive (EU) 2018/1972, under Title II, Chapters II to IV, or made available under fair, reasonable and non-discriminatory terms and conditions, including price.	Les autorités françaises souhaitent que, <u>au moins dans un considérant du texte</u> , il soit précisé que le refus d'accès aux infrastructures internes des immeubles ne peut être justifié par la prévalence de la mutualisation, dans les cas où se réunissent les conditions de (i) disponibilité d'espace, de (ii) non-conformité du produit d'accès « mutualisé » avec les besoins de raccordement du demandeur de l'accès à l'infrastructure (cas, par exemple, des opérateurs desservant des locaux d'entreprises, avec des fibres dédiées), et de (iii) absence de tout autre motif de rejet objectif, non-

Commission proposal	Drafting Suggestions	Comments
		discriminatoire et proportionné, tel que décrit dans les exceptions du (projet de) texte et dans les motifs de rejet au regard de l'article 3.
4. In the absence of available fibre-ready in-building physical infrastructure, every public electronic communications network provider shall have the right to terminate its network at the premises of the subscriber, subject to the agreement of the subscriber, provided that it minimises the impact on the private property of third parties.		
5. This Article shall be without prejudice to the right to property of the owner of the access point or the in-building physical infrastructure where the holder of a right to use that infrastructure or access point is not the owner thereof, and to the right to property of other		

Commission proposal	Drafting Suggestions	Comments
third parties, such as landowners and building owners.		
6. After having consulted stakeholders, the national dispute settlement bodies and other competent Union bodies or agencies in the relevant sectors as appropriate, the Commission may, in close cooperation with BEREC, provide guidance on the application of this Article.	6. After having consulted stakeholders, the national dispute settlement bodies and other competent Union bodies or agencies in the relevant sectors as appropriate, the Commission may, in close cooperation with BEREC, provide guidance on the application of this Article.	L'adoption d'orientation par la Commission européenne pour l'application de cet article est susceptible d'avoir, par ricochet, un impact sur le cadre juridique établi par l'autorité de régulation nationale sur le fondement des chapitres II à IV du titre II de la directive 2018/1972/UE, compte tenu de l'étroite proximité des sujets. Elle pourrait en plus avoir pour effet d'imposer un cadre juridique rigide ne tenant pas suffisamment compte des circonstances nationales.
		Par ailleurs, la nécessité d'orientation n'apparaît pas nécessaire, de prime abord, et semble donc disproportionné au regard de l'objectif poursuivi.
Article 10		

Commission proposal	Drafting Suggestions	Comments
Digitalisation of single information points		
1. Single information points shall make appropriate digital tools available, such as in the form of web portals, digital platforms or digital applications, to enable the online exercise of all the rights and the compliance with all the obligations set out in this Regulation.		<p>Les autorités françaises sont favorables à la mise en place d'outils numériques destinés à aider l'opérateur à exercer les droits prévus par la proposition de règlement, par l'intermédiaire d'un point d'information unique dématérialisé. Toutefois, elles attirent l'attention sur le fait que les Etats membres, et en particulier leurs collectivités doivent conserver une marge de manœuvre suffisante pour déterminer le type d'outils numériques à mettre en place compte tenu des besoins de l'opérateur et des moyens dont elles disposent.</p> <p>Dans ce contexte, les autorités françaises s'interrogent sur la possibilité d'utiliser une adresse électronique comme outil numérique permettant aux acteurs concernés d'exercer leurs droits et de respecter leurs obligations.</p>

Commission proposal	Drafting Suggestions	Comments
<p>2. Member States may interconnect or fully or partially integrate several digital tools supporting the single information points referred to paragraph 1, as appropriate.</p>		<p>Les autorités françaises s’interrogent sur le concept d’interconnection totale ou partielle des outils numériques utilisés par les “single information points”, des précisions devraient donc être apportées à des fins de clarifications (les considérants n’éclairent pas davantage).</p>
<p>3. Member States shall set out a single national digital entry point, consisting of a common user interface ensuring seamless access to the digitalised single information points.</p>		<p>Les autorités françaises reconnaissent l’utilité de mettre en place un guichet unique permettant à l’opérateur de retrouver facilement les accès aux “single information points”.</p> <p>Toutefois, elles souhaitent attirer l’attention sur le fait que la mise en oeuvre opérationnelle de ce dispositif compte tenu des spécifiques techniques envisagées et soulignent que cela va nécessiter une évolution de l’ensemble des processus administratifs, à tous les niveaux de</p>

Commission guidance, the national dispute settlement body referred to in paragraph 1 shall issue a binding decision to resolve the dispute at the latest:	Commission guidance , the national dispute settlement body referred to in paragraph 1 shall issue a binding decision to resolve the dispute at the latest:	<i>Cf.</i> l'ensemble des observations des autorités françaises concernant l'adoption, par la Commission européenne, d'orientations pour l'application des articles du règlement.
(a) within four months from the date of the receipt of the dispute settlement request, with respect to disputes referred to in paragraph 1, point (a);		Les autorités françaises sont favorables au délai de 4 mois pour le règlement des litiges en matière d'accès aux infrastructures physiques.
(b) within one month from the date of the receipt of the dispute settlement request, with respect to disputes referred to in paragraph 1, points (b), (c) and (d).	(b) within one month 2 months from the date of the receipt of the dispute settlement request, with respect to disputes referred to in paragraph 1, points (b), (c) and (d).	Il est indispensable que le délai fixé pour le règlement du litige tienne compte de la mission confiée à l'organe de règlement et des contraintes s'imposant à lui pour mener à bien cette tâche. Le délai d'1 mois proposé est insuffisant pour lui permettre de réaliser les actes d'instructions nécessaires (demande de pièces manquantes, échanges avec les parties, prise de la décision) tout en respectant les principes juridiques s'imposant à l'organe de règlement

Commission proposal	Drafting Suggestions	Comments
		<p>des litiges dans l'exercice de sa mission (ex : respect du principe de contradictoire).</p> <p>Il conviendrait ainsi, au moins, de maintenir les délais de 2 mois actuellement prévus par la directive 2014/61/UE et transposés à l'échelle nationale.</p>
Those deadlines may only be extended in exceptional circumstances.	Those deadlines may only be extended in exceptional circumstances.	Compte tenu des délais particulièrement brefs proposés pour le règlement des litiges (point b à d), la prorogation du délai d'instruction du litige ne devrait pas être restreinte trop strictement.
3. As regards disputes referred to in paragraph 1, points (a), (c) and (d) the decision of national dispute settlement body may consist in setting fair and reasonable terms and conditions, including price, where appropriate.		
Where the dispute relates to access to the infrastructure of an operator and the national

dispute settlement body is the national regulatory authority, the objectives set out in Article 3 of Directive (EU) 2018/1972 shall be taken into account, where appropriate.		
4. The rules laid down in the present Article are in addition to and without prejudice to the judicial remedies and procedures in compliance with Article 47 of the Charter of Fundamental Rights of the European Union ²⁰ .		
Article 12		
Competent bodies		
1. Each of the tasks assigned to the national dispute settlement body shall be undertaken by one or more competent bodies, which can be an existing body.		

²⁰ Charter of Fundamental Rights of the European Union (OJ C 326, 26.10.2012, p. 391–407)

Commission proposal	Drafting Suggestions	Comments
2. The national dispute settlement body shall be legally distinct and functionally independent of any network operator and any public sector body owning or controlling physical infrastructure involved in the dispute. Member States that retain ownership or control of network operators shall ensure effective structural separation of the functions related to the national dispute settlement procedures and those of the single information point from activities associated with ownership or control.		Pour la transposition de la directive 2014/61/UE les autorités françaises ont décidé de confier l'exercice de cette mission à l'autorité de régulation nationale du secteur des communications électroniques, qui exerce déjà un certain nombre de missions prévues par la directive 2018/1972/UE. Son organisation interne a d'ailleurs été modifiée pour satisfaire aux exigences européennes et nationales renforcées en matière d'indépendance et d'impartialité. Ce choix précédemment opéré devrait maintenu pour l'application du règlement, ce dernier s'inscrivant dans la continuité de la directive 2014/61/UE.
3. The national dispute settlement body may charge fees to cover the costs of carrying out the tasks assigned to it.		

Commission proposal	Drafting Suggestions	Comments
4. All parties concerned by a dispute shall cooperate fully with the national dispute settlement body.		
5. The functions of a single information point referred to in Articles 3 to 8 and 10 shall be performed by one or more competent bodies appointed by the Member States at national, regional or local level, as appropriate. In order to cover the costs of carrying out those functions, fees may be charged for the use of the single information points.		
6. Paragraph 2 shall apply <i>mutatis mutandis</i> to the competent bodies performing the functions of a single information point.	6. Paragraph 2 shall apply <i>mutatis mutandis</i> to the competent bodies performing the functions of a single information point.	L'application de l'exigence d'indépendance et de séparation structurelle prévues au paragraphe 2, aux organismes qui exerceront la fonction de point d'information unique pourrait soulever des difficultés majeures dans la mesure où cette fonction serait, en France, exercée par des administrations locales, qui déployent également

Article 14		
Penalties and compensation		
Member States shall lay down rules on penalties, including, where necessary, fines and non-criminal predetermined or periodic penalties, applicable to infringements of this Regulation and of any binding decision adopted pursuant to this Regulation by the competent bodies referred to in Article 12 and shall take all measures necessary to ensure that they are implemented. The penalties provided for shall be appropriate, effective, proportionate and dissuasive.		Les autorités françaises estiment que l'effectivité du règlement repose notamment sur l'établissement de règles visant à sanctionner le non-respect de ces dispositions et sont favorables à ce que les sanctions appropriées soient définies, par l'Etat membre, au niveau national.
Member States shall lay down rules on adequate financial compensation for persons suffering damage as a result of the exercise of the rights provided for in this Regulation.	Member States shall lay down rules on adequate financial compensation for persons suffering damage as a result of the exercise of the rights provided for in this Regulation.
