FLASH Working Party Technical Harmonisation Nr. 1

Working party on Measuring Instruments Directive Monday, 07-07-2025

Dear Colleagues,

We are pleased to invite you to the first Working Party in Technical Harmonisation on the targeted amendment of the Measuring Instruments Directive on July 7. The meeting is planned as a full day meeting dedicated to discussions on the compromise text presented in doc ST 11021/25. The compromise text is building on the excellent work done by our Polish colleagues, and the compromise text discussed in the Working Party on March 19 and May 21.

During the meeting we will go through the proposal chronologically starting with the articles, and continuing with the annexes. We would like to draw special attention to some of the changes, including:

- Point 3 in Annex 1 that adds point 10.6 on the indication of measurement results;
- The scope of Annex IV (Va) on EVSE;
- Additionally, we would welcome input on whether or not point 7 in Annex IV (Va) on EVSE should contain requirements for putting into use, and in that case what these requirements could be;

- And if there is a need to define specific requirements for self-service devices and arrangements in Annex VI (VIIa) on compressed gas dispensers that would justify to keep the respective definitions in Annex VI.

Following our meeting, the Member States will be invited to submit their comments on the 2nd compromise text by July 22. Based on the results from the meeting and the written contributions we will prepare a new text to be discussed at the next working party on September 8.

We look forward to seeing you on July 7 and hope for a fruitful and technical discussion.

With Kind regards,

DK Presidency Team
