21.1			AMD 3 <i>(11a) It is essential in the implementation of the Union budget to ensure respect for the values on which the Union is founded and for the Charter of Fundamental Rights of the European Union, which includes important principles such as non-discrimination and equality between men and women. It is therefore necessary to provide for the measures to be taken where a breach of the Charter puts the legality of expenditure at risk. In that connection, it is possible to address complaints to the Commission about a breach of Union law by authorities in a Member State. The Commission should handle such complaints expeditiously.</i>

To address the increased complexity of those operations and in order to ensure better visibility of their content, a comprehensive overview of borrowing and lending operations carried out by the Commission should be added to the document annexed to the section of the budget relating to the Commission. That overview should include the legal basis, outstanding amounts of bonds and bills, maturity profile, disbursed grants and loans, repayment schedule of the disbursed loans and cost of funding.	

			<i>underlying data and the methodology used by the Commission to estimate the interest due.</i>		
54.1				(43a) Article 224 of this Regulation provides that the Commission is empowered, in the relevant basic act, to borrow on behalf of the Union or Euratom for the purpose of on-lending the corresponding amounts to beneficiary Member States or third countries under the conditions applicable to the borrowings. In that regard, the cash flows between the borrowed funds and the loans are matched one-to-one. This means that the Union must carry out market operations based on disbursement needs for each specific case of lending, which limits the possibility to coherently plan various borrowing operations and to structure maturities to achieve the best costs.	
54.2				(43b) Financing individual programmes of financial assistance through separate funding methods creates cost and complexity as different programmes of financial assistance compete for a limited number of funding opportunities. It fragments the supply of Union debt securities and reduces liquidity and investor interest in the separate programmes, even though all Union debt securities have the same high credit quality. Financial assistance should thus be organised under a single funding method that enhances the liquidity of Union bonds and the attractiveness and cost-effectiveness of Union issuance.	
54.3				(43c) The need for a single funding method is emphasised in particular in the context of financial support to Ukraine given its urgent financing needs. Recent	

				experience with the funding needs for Ukraine has highlighted the disadvantages of a fragmented approach to the organisation of the Union's debt. In order to strengthen the Union's position as an issuer of euro-denominated debt, it is of paramount importance that all new issuance be organised through a single funding method.	
54.4				(43d) The model for a single funding method, and most elements of the infrastructure needed for its implementation, have already been established in the form of a diversified funding strategy under Council Decision 2020/2053. That strategy has allowed the successful mobilisation of funds for grants and loans under Regulation (EU) 2021/241 of the European Parliament and of the Council* and for a range of other Union programmes referred to in Council Regulation (EU) 2020/2094**. In view of the expected complexity of operations needed to satisfy the urgent financing needs of Ukraine, and to anticipate possible future borrowing and lending operations, it is appropriate to establish a diversified funding strategy as the single funding method for implementation of borrowing operations. * Regulation (EU) 2021/241 of the European Parliament and of the Council of 12 February 2021 establishing the Recovery and Resilience Facility (OJ L 57, 18.2.2021, p. 17). ** Council Regulation (EU) 2020/2094 of 14 December 2020 establishing a European Union Recovery Instrument to support the recovery in the aftermath of	

				the COVID-19 crisis (OJ L 433I, 22.12.2020, p. 23).	
54.5				(43e) The use of a diversified funding strategy should allow the flexible implementation of the funding programme, while fully respecting the principles of budgetary neutrality and budgetary balance as set out in Article 310(1) of the Treaty on the Functioning of the European Union (TFEU). The costs of the funding programme should be fully borne by the beneficiaries based on a single cost allocation methodology that ensures the transparent and proportional allocation of costs. Repayment obligations should remain with the beneficiaries of the financial assistance, in compliance with Article 224(5), point (e), of this Regulation.	
54.6				(43f) The implementation of a diversified funding strategy would require a single set of rules to be followed in respect of all borrowing and lending programmes relying on it. Those rules should therefore be added to the horizontal financial rules laid down in this Regulation.	
54.7				(43g) A diversified funding strategy should provide the Commission with more flexibility concerning the timing and the maturity of single funding transactions and allow regular and steady disbursements to different beneficiary countries. Such a strategy should be based on the pooling of funding instruments. This would give the Commission flexibility to organise payments to the beneficiaries independently of market conditions at the time of disbursement, while also reducing the risk that the Commission would have to raise fixed amounts in	

				volatile or adverse conditions.	
54.8				(43h) Giving the Commission that flexibility would require putting into place a common liquidity pool. Such a centralised liquidity function would render the Union's funding capacity more resilient, and able to withstand temporary mismatches between all inflows and outflows, based on a robust liquidity forecasting capacity.	
54.9				(43i) The Commission should implement all necessary transactions aiming at a regular capital market presence, at achieving the best possible funding costs and at facilitating transactions in debt securities of the Union and Euratom.	
54.10				(43j) In extending the diversified funding strategy to a wider range of programmes, it is therefore appropriate for the Commission to establish the necessary arrangements for its implementation. Those arrangements should comprise a governance framework, risk management procedures, and a cost allocation methodology, which should respect Article 224(5), point (e), of this Regulation. To ensure transparency, the Commission should regularly and comprehensively inform the European Parliament and the Council about all aspects of its borrowing and debt management strategy.	
54.11				(43k) In the interest of legal certainty and clarity in respect of already granted financial assistance and in respect of financial assistance under Regulation (EU) .../... of the European Parliament and of the Council establishing an instrument for providing support to Ukraine for 2023 (macro-financial assistance +), Article 224 of this	

				Regulation should only apply to programmes of financial assistance the basic acts of which enter into force on or after 9 November 2022.

225		~~(140214)~~ In recent years the Union has increasingly used financial instruments that allow a higher leverage of the budget to be achieved but, at the same time, they generate a financial risk for the budget. Those financial instruments include not only the financial instruments covered by Regulation (EU, Euratom) No 966/2012, but also other instruments, such as budgetary guarantees and financial assistance, that previously have been governed only by the rules established in their respective basic acts. 230.1			<u>AMD 27</u> <i>(219a) When the Commission is empowered, in a relevant basic act, to borrow on behalf of the Union or Euratom for the purpose of on-lending the corresponding amounts to beneficiary Member States or third countries under the conditions applicable to the borrowings, if the cash flows between the borrowed funds and the loans are matched one-to-one, the Union must carry out market operations based on disbursement needs for each specific case of lending, which limits the possibility to coherently plan various borrowing operations and to structure maturities to achieve the best costs.</i>		
230.2			<u>AMD 28</u> <i>(219b) Financing individual programmes of financial assistance through separate funding methods creates cost and complexity as different programmes of financial assistance compete for a limited number of funding opportunities. It fragments the supply of Union debt securities and reduces liquidity and investor interest in the separate programmes, even though all Union debt securities have the same high credit quality. Financial assistance should thus be organised under a single funding method that enhances the liquidity of Union bonds and the attractiveness and cost-effectiveness of Union issuance.</i>		
230.3			<u>AMD 29</u> <i>(219c) Recent experience with the funding needs for Ukraine has highlighted the disadvantages of a fragmented approach to the organisation of the Union's debt. In order to strengthen</i>		

			<i>the Union's position as an issuer of euro-denominated debt, it is of paramount importance that all new issuance be organised through a single funding method.</i>		
230.4			AMD 30 <i>(219d) The model for a single funding method, and most elements of the infrastructure needed for its implementation, have already been established in the form of a diversified funding strategy under Council Decision (EU, Euratom) 2020/2053. That strategy has allowed the successful mobilisation of funds for grants and loans under Regulation (EU) 2021/241 of the European Parliament and of the Council and for a range of other Union programmes referred to in Council Regulation (EU) 2020/2094. To anticipate possible future borrowing and lending operations, it is appropriate to establish a diversified funding strategy as the single funding method for implementation of borrowing operations.</i>		
230.5			AMD 31 <i>(219e) The use of a diversified funding strategy should allow the flexible implementation of the funding programme, while fully respecting the principles of budgetary neutrality and budgetary balance as set out in Article 310(1) of the Treaty on the Functioning of the European Union (TFEU). The costs of the funding programme should be fully borne by the beneficiaries based on a single cost allocation methodology that ensures the transparent and proportional allocation of costs. Repayment obligations should remain with the</i>		

			<i>beneficiaries of the financial assistance, in compliance with Article 224(5), point (e).</i>		
230.6			AMD 32 <i>(219f) The implementation of a diversified funding strategy requires a single set of rules to be followed in respect of all borrowing and lending programmes relying on it.</i>		
230.7			AMD 33 <i>(219g) A diversified funding strategy should provide the Commission with more flexibility concerning the timing and the maturity of single funding transactions and allow regular and steady disbursements to different beneficiary countries. Such a strategy should be based on the pooling of funding instruments. This would give the Commission flexibility to organise payments to the beneficiaries independently of market conditions at the time of disbursement, while also reducing the risk that the Commission would have to raise fixed amounts in volatile or adverse conditions.</i>		
230.8			AMD 34 <i>(219h) Giving the Commission that flexibility would require putting into place a common liquidity pool. Such a centralised liquidity function would render the Union's funding capacity more resilient, and be able to withstand temporary mismatches between all inflows and outflows, based on a robust liquidity forecasting capacity.</i>		
230.9			AMD 35 <i>(219i) The Commission should implement all necessary transactions aiming at a regular capital market presence, at</i>		

			<i>achieving the best possible funding costs and at facilitating transactions in debt securities of the Union and Euratom.</i>		
230.10			AMD 36 <i>(219j) In extending the diversified funding strategy to a wider range of programmes, it is therefore appropriate for the Commission to establish the necessary arrangements for its implementation. Those arrangements should comprise a governance framework, risk management procedures, and a cost allocation methodology, which should respect Article 224(5), point (e). To ensure transparency, the Commission should regularly and comprehensively inform the European Parliament and the Council about all aspects of its borrowing and debt management strategy.</i>		
230.11			AMD 37 <i>(219k) In view of the potential risks arising when the Union budget is used as a guarantee for borrowing operations, and in order to increase scrutiny and democratic accountability, it is important that the European Parliament and the Council, as budgetary authority, approve the maximum amount that the Commission is authorised to borrow under the diversified funding strategy during each financial year, within the limits set by the basic act empowering the Commission to borrow the funds on behalf of the Union.</i>

		the Union for certain investments should be increased.			
304		(211) In order to encourage Member States to make use of appraisals of major projects by independent experts, the declaration of expenditure relating to the major project to the Commission prior to the positive appraisal by the independent expert should be allowed once the Commission has been informed about the submission of the relevant information to the independent expert.		[deletion accepted]	
305		(212) In order to promote the use of joint action plans which will reduce administrative burden for beneficiaries, it is necessary to reduce regulatory requirements linked to the setting up of a joint action plan while maintaining an appropriate focus on horizontal principles, including gender equality and sustainable development, which have generated important contributions to the effective implementation of the ESI Funds.		[deletion accepted]	
306		(213) In order to avoid unnecessary administrative burden for beneficiaries, the rules on information, communication and visibility should respect the principle of proportionality. Accordingly, it is important to clarify the scope of application of those rules.		[deletion accepted]	
307		(214) With a view to reducing the administrative burden and ensuring the effective use of technical assistance across the ERDF, the ESF and the Cohesion Fund and across categories of regions, flexibility for the calculation and monitoring of the respective limits applicable to technical assistance of Member States should be increased.		[deletion accepted]	

308		(215) With a view to streamlining implementation structures, it should be clarified that the possibility for the managing authority, certifying authority and the audit authority to be part of the same public body is also available to programmes under the European territorial cooperation goal.		[deletion accepted]	
309		(216) The responsibilities of the managing authorities regarding the verification of expenditure when simplified cost options are being used should be specified in more detail.		[deletion accepted]	
310		(217) In order to ensure that beneficiaries can fully benefit from the simplification potential of e-governance solutions in the implementation of the ESI Funds and the Fund for European Aid to the Most Deprived (FEAD), especially with a view to facilitating full electronic document management, it is necessary to clarify that a paper trail is not necessary if certain conditions are met.		[deletion accepted]	
311		(218) In order to increase proportionality of controls and to ease the administrative burden resulting from overlapping controls, especially for small beneficiaries, without undermining the principle of sound financial management, the single audit principle for the ERDF, the ESF, the Cohesion Fund and the EMFF should prevail and the thresholds below which an operation is not to be subject to more than one audit should be doubled.		[deletion accepted]	
312		(219) It is important to enhance the visibility of the ESI Funds and to raise awareness of their results and achievements with the public. Information and communication activities and measures to enhance		[deletion accepted]	

		visibility for the public remain essential in publicising the achievements of the ESI Funds and in demonstrating how the Union's financial resources are invested.			
313		(220) With a view to facilitating access of certain target groups to the ESI, the collection of data for certain indicators referred to in Annex I to Regulation (EU) No 1304/2013 of the European Parliament and of the Council ⁴⁶ should not be required.		[deletion accepted]	
314		(221) In order to ensure equal treatment of operations supported on the basis of this Regulation, it is necessary to establish the date of application of certain amendments to Regulation (EU) No 1303/2013.		[deletion accepted]

⁴⁷— Regulation (EU) No 223/2014 of the European Parliament and of the Council of 11 March 2014 on the Fund for European Aid to the Most Deprived (OJ L 72, 12.3.2014, p. 1).

		legal basis for the signature of funding agreements allowing for use of escrow accounts for equity-based instruments, it is necessary for some of the amendments to this Regulation to apply with effect from 1 January 2018. By providing for a retroactive application of those amendments, the advanced facilitation of the financing of projects through combined support from the ESI Funds and the EFSI is ensured and a legal gap between the expiry date of certain provisions in Regulation (EU) No 1303/2013 and the date of entry into force of their extension by virtue of this Regulation is avoided.			
317		(224) The simplifications and changes made to sector-specific rules should apply as soon as possible in order to facilitate an acceleration of implementation during the current programming period and should therefore apply from 2 August 2018.		[deletion accepted]	
318		(225) The European Globalisation Adjustment Fund (EGF) should continue, after 31 December 2017, to temporarily provide assistance to young people not in employment, education or training (NEETs) who reside in regions disproportionately impacted by major redundancies. In order to allow for continued assistance to NEETs, the amendment to Regulation (EU) No 1309/2013 of the European Parliament and of the Council⁴⁸ ensuring such continued assistance should apply with effect from 1 January 2018. 319		(226) It should be possible to establish blending facilities under Regulation (EU) No 1316/2013 of the European Parliament and of the Council ⁴⁹ for one or more of the Connecting Europe Facility (CEF) sectors. Such blending facilities could finance blending operations which are actions combining non-reimbursable forms of support, such as support from Member States' budgets, CEF grants, the ESI Funds and financial instruments from the Union budget, including combinations of CEF equity and CEF debt financial instruments and financing from the EIB Group, from national promotional banks, from development or other finance institutions, from investors and private financial support. Financing from the EIB Group should include EIB financing under the EFSI and private financial support should include both direct and indirect financial contributions as well as support received through public-private partnerships.		[deletion accepted]	
320		(227) The design and set up of blending facilities should be based on an <i>ex ante</i> assessment carried out in accordance with this Regulation and should reflect the results of lessons learned from the implementation of the CEF 'Blending Call' referred to in the Commission Implementing Decision of 20 January 2017 amending Commission Implementing Decision C(2014)1921 establishing a Multi-Annual Work Programme 2014-2020 for financial		[deletion accepted]

		assistance in the field of Connecting Europe Facility (CEF) – Transport sector. CEF blending facilities should be established by the multiannual and/or annual work programmes and adopted in accordance with Articles 17 and 25 of Regulation (EU) No 1316/2013. The Commission should ensure transparent and timely reporting to the European Parliament and to the Council on the implementation of any CEF blending facility.			
321		(228) The objective of CEF blending facilities should be to facilitate and streamline one application for all forms of support, including Union grants from the CEF and private sector finance. Such blending facilities should aim to optimise the application process for project promoters by providing a single evaluation process, from the technical and financial points of view.		[deletion accepted]	
322		(229) CEF blending facilities should increase flexibility for submitting projects and simplify and streamline the process of project identification and financing. They should also increase the ownership and commitment of the financial institutions involved, thereby mitigating risks associated with the projects.		[deletion accepted]	
323		(230) CEF blending facilities should result in enhanced coordination, exchange of information and cooperation between Member States, the Commission, the EIB, national promotional banks and private investors with the aim of generating and supporting a healthy pipeline of projects pursuing CEF policy objectives.		[deletion accepted]	
324		(231) CEF blending facilities should aim to enhance the multiplier effect of Union		[deletion accepted]	

		spending by attracting additional resources from private investors, thus ensuring a maximum degree of private investor involvement. In addition, they should ensure that the actions supported become economically and financially viable and help to avoid a lack of investment leverage. They should contribute to the achievement of the Union objectives on meeting the targets set at the Paris Climate Conference (COP 21), job creation and cross border connectivity. It is important that, when the CEF and the EFSI are both used for financing actions, the Court of Auditors examine whether the financial management has been sound in accordance with Article 287 TFEU and with Article 24(2) of Regulation (EU) No 1316/2013.			
325		(232) In most cases, grants in the transport sector are expected to remain the primary means of supporting policy objectives of the Union. The application of CEF blending facilities should therefore not reduce the availability of such grants.		[deletion accepted]	
326		(233) Participation of private co-investors in the transport projects could be facilitated by mitigating the financial risk. First loss guarantees provided by the EIB under the joint financial mechanisms supported by the budget such as blending facilities can be appropriate to that end.		[deletion accepted]	
327		(234) Funding from the CEF should be based on the selection and award criteria established in the multiannual and the annual work programmes pursuant to Article 17(5) of Regulation (EU) No 1316/2013 regardless of the form of funding used, or combination thereof.		[deletion accepted]	

328		(235) The experience gained with blending facilities should be taken into consideration in the evaluations of Regulation (EU) No 1316/2013.		[deletion accepted]	
329		(236) The introduction of CEF blending facilities by this Regulation should not be understood to prejudge the outcome of the negotiations on the post-2020 multiannual financial framework.		[deletion accepted]	
330		(237) Taking into account the very high rate of execution of the CEF in the transport sector and in order to support the implementation of projects with most value added for the Trans-European Transport Network concerning the core network corridors, cross-border projects, projects on the other section of the core network and projects eligible under the horizontal priorities as listed in Annex I to Regulation (EU) No 1316/2013, it is necessary to exceptionally allow for additional flexibility in the use of the multiannual work programme allowing the amount of the financial envelope to reach up to 95 % of the financial budgetary resources referred to in Regulation (EU) No 1316/2013. It is, however, important that further support be provided in the remaining CEF implementing period to priorities covered by annual work programmes.		[deletion accepted]	
331		(238) Due to the different nature of the CEF telecom sector as compared to the CEF transport and CEF energy sectors, namely the smaller average size of grants and differences in the type of costs and the type of projects, unnecessary burden on beneficiaries and Member States participating in related actions should be avoided through a less burdensome certification		[deletion accepted]	

		obligation, without weakening the principle of sound financial management.			
332		(239) Under Regulation (EU) No 283/2014 of the European Parliament and of the Council ⁵⁰ , it is currently only possible to use grants and procurement to support actions in the area of digital service infrastructures. In order to ensure that digital service infrastructures function as efficiently as possible, other financial instruments which are currently used under the CEF, including innovative financial instruments, should also be made available to support such actions.		[deletion accepted]	
333		(240) In order to avoid unnecessary administrative burden for managing authorities that could hinder efficient implementation of the FEAD, it is appropriate to simplify and facilitate the procedure for amendment of non-essential elements of operational programmes.		[deletion accepted]	
334		(241) With a view to further simplifying the use of the FEAD, it is appropriate to establish additional provisions as regards eligibility of expenditure, in particular as regards the use of standard scales of unit costs, lump sums and flat rates.		[deletion accepted]	
335		(242) In order to avoid unfair treatment of partner organisations, irregularities that are imputable only to the body in charge of purchasing the assistance should not affect the eligibility of expenditure of partner organisations.		[deletion accepted]

		implementation of the ESI Funds and the FEAD and avoid legal uncertainty, certain responsibilities of Member States with regard to management and control should be clarified.			
337		(244) Considering the need for the coherent application of the relevant financial rules within the financial year, it is in principle advisable that Part One of this Regulation (the Financial Regulation) starts applying at the beginning of a financial year. However, in order to ensure that important simplification provided for in this Regulation, both as regards the Financial Regulation and the amendments to sector specific rules, benefit the recipients of Union funds as early as possible, it is appropriate to provide, exceptionally, for the application of this Regulation from its entry into force. At the same time, in order to allow additional time for adaptation to the new rules, Union institutions should continue to apply Regulation (EU, Euratom) No 966/2012 until the end of the financial year 2018 with regard to the implementation of their respective administrative appropriations. AMD 41 (256) Some modifications regarding the transmission to the Commission of data on recipients for the purposes of publication, and regarding the electronic recording and storage of data on recipients and the use of the single integrated IT system for data-mining and risk-scoring referred to in Article 36(2) to access and analyse those data should apply only to programmes adopted under and financed from the post-2027 multiannual financial framework as of 1 January 2026 in order to ensure a smooth transition by allowing sufficient time for the necessary adaptation of electronic data systems and of relevant agreements, as well as the provision of guidance and training for national, regional and local authorities. <i>Justification: Waiting for the adoption of the programmes under the post-2027 MFF in order to start using the new single integrated and interoperable information and monitoring system is disproportionately long. A date of application of 1 January 2026 should provide sufficient time for the development of the system and the adaptation of the various involved systems.</i>	(256) Some modifications regarding the transmission to the Commission of data on recipients for the purposes of publication, and regarding the electronic recording and storage of data on recipients and the use of the single integrated IT system for data-mining and risk-scoring to assess and analyse those data should apply only to programmes adopted under and financed from the post-2027 multiannual financial framework in order to ensure a smooth transition by allowing sufficient time for the necessary adaptation of electronic data systems and of relevant agreements, as well as the provision of guidance and training.
