"Draft Regulation on Explosive Precursors -

Suggestion by the EE delegation for Article 3 (10a new):"

'online intermediation services' means services which meet all of the following requirements:

- (a) they constitute information society services within the meaning of Article 1(1)(b) of Directive (EU) No 2015/1535 of the European Parliament and of the Council⁹;
- (b) they allow business users to offer goods or services to consumers, with a view to facilitating the initiating of direct transactions between those business users and consumers, irrespective of where those transactions are ultimately concluded;
- (c) they are provided to business users on the basis of contractual relationships between, on the one hand, the provider of those services and, on the other hand, both those business users and the consumers to which those business users offer goods or services.

This is the same formulation which will be used in this regulation on promoting fairness and transparency for business users of online intermediation services.
